Most Listless Market Since

The Northern Miner says in the course of drilling operations that were intended solely to gain information as to geological conditions, Hollinger has struck ore 2,400 feet below the surface. The amount encountered was not great but the strike was certainly ore.

Together with highly satisfactory information gained about geology, the finding of ore at this record depth in Porcupine, should be sufficient to cause great inbilation among Hollinger shareholders, and to everyone interested in Northern Ontario gold mining.

The Northern Miner is informed that geological conditions have been found to continue similar in character to the upper levels from the deepest level, 1,250 feet, to approximately twice that depth. The formation is the same as in the horizons from which a total of \$37,000,000 of ore has already been produced and a further \$41,000,000 blocked out.

Most Listless Market Since March Sixteenth—Dominion Glass Gains.

Montreal, Aug. 23.—Trading in listed was the dullest for many months, it being the smallest day since March 16 last. Brazilian was the least inactive stock, followed by Laurentide and the Spanish Rivers. The trend of the market was irregular with, however, gains exceeding

Retail sales continue to be steady and good. A large part of the clientele of retailers is composed of the class who are receiving high wages. There is little prospect of immediate wage reduction, so that this demand bids fair to continue. That it is learning to be more discriminating against unwarranted prices, and against luxuries and extravagences, means the cutting away of profiteering, and the lessened manufacture of non-essentials, with an increase in production of essentials. Retail stocks are said to be low. Replenishment should increase the activity of manufacturers and terminate recessions in such lines at least. Readjustment, however, in other lines may continue. Commodity prices have still to go down far to get within sight of normal. This process of deflation is bound to be unpleasant—so far it has been gradual.

The immediate elements of sustaining grace are a bountiful crop and the possibilities for raijroads under the new fork, aug. 23.—Bar silver, 60%d classiver, 60%d classi

 shilities for railroads under the new law. Some time the roads must expend enormous sums to get abreast of even the present needs. Railroad purchasing has always meant prosperity for the United States.—J. S. Bache & Co.

NEW YORK CURB.

New York, Aug. 23.—The market closed fairly strong. During the morning session considerable buying developed in the silver group based on the highly favorable reports emanating from the west and the recent rise in the price of the white metal. The industrials and oils, as groups, held steady.

The largest attention was directed to the mining group with Divide Extension, Gold Zone and Tonopah Divide in good demand. Gold Zone touched 39c, while Divide Extension sold up to 38c. Silver King of Arizona sold at 35c.

Asphalt was reactionary and sold off points to 51. Submarine Boat moved a fraction higher. Retail Candy was steady. Pulp and Paper touched 57%. In the oils, Elk Basin was active, moving up to 8½. White was stronger. Simms reacted to 11.

Canadian Support Remains Intact, However, at

Present Prices.

BELGIAN HOLDERS

Speculation on the Toronto Stock Exchange has about come to a standstill. Money is still tighter than it was, and some recent calling of loans are reported. Renewed liquidation in Brazilian has broken out and this time the stock is said to be coming from Belgium. The Canadian support remains intact and quite a quantity of the shares were taken yesterday on the Montreal exchange at 39. It is still essential to keep the papers and sugar in the foreground and some of the trading in the shares is undoubtedly for effect. The bonus paid on Provincial Paper must be presumed to be responsible for the five point jump in this stock.

Yesterday's market was absolutely without feature in apy section. The Wall street turned soft after last meek's buoyancy and there was nothing in the general news of a eew nature to make any decided change in sentiment. The merger stocks were not strong and Steel Corporation was down to 59½. Banks were dull and Hamilton sold off a point to 179. The demand for the was followed by a bid of 91% with offers for the time being and a sale at 21% was follomed by a bid of 91% with offers held at 92½.

24 % Declines in Commodities Outnumber the Advances

Dun's New York Review says: While no single element fully accounts for the continued hesitation in business, it is even clearer now than recently that the price question remains the dominant factor in the situation. Resistance to market yielding persists in some quarters, but falls to offset the influence of natural economic forces, and declines in commodity quotations this week, as Dun's list demonstrates, again outnumber advances by a considerable margin. Liquidation of goods that could not be moved at previous extreme prices is still a feature in various wholesale and retail channels, the prevailing monetary restrictions hastening the offerings in some intances, and it is significant that openings of new lines of merchandise Jor forward seasons are being made at appreciable reductions from former levels. That most buyers have not rushed to operate at the first sign of price reaction, but have adhered to their policy of limiting commitments as closely as possible, is an indication that further deflation is expected, and predictions of scarcity of supplies to follow, based chiefly on the curtailment of production in some leading industries, are being largely disregarded.

MINNEAPOLIS FLOUR AND GRAIN.

Chicago.

Aug. 23.—The general trend of the grain market was today lower.

Relatively low temperatures had some effect on all cereals, but the sentiment remained generally bearish among the pit element. At the finish wheat was off 4½c to 7c with December \$2.25 to 22.25 to 22.28¼, and March \$2.28; corn ranged from the curtail nearly some provisions ranged from 5c to 30c.

The grain market was under pressure at the start the bears being encouraged by the break in spot wheat prices, a lack of new export demand and a heavy tone
