THE PHYSICAL PARADOX.

It has been said that the blood is the source of life." It is as truly the source of disease and death. No life, that is to say, no healthy tissue can be generated from impure blood, no organ of the body can normally perform its functions when supplied with impure blood. The fluid that should carry life and health to every part, carries only weakness and disease. Blood is the source of life, only when it is pure. If it has become diseased, it must be cleansed by proper medication, else every pulsation of the human heart sends a wave of disease thro the system. To cleanse the blood of all impurities, use Dr. Pierce's Golden 'Medical Dis covery and Pleasant Purgative Pellets, the most offectual alterative, tonic, and cathartic ficient in scrofulous diseases.
