For something that surely suits you

AMUSEMENTS

A CHANGE OF BILL AT THE ORPHEUM.

The Lancashire Lassies announced for yesterday at the Orpheum only played in the afternoon. Their act not being of that nature which dovetails into the policy of the Orpheum management arrangements were at once commenced to procure an attraction with which to substitute. As this could not be done in time for the evening's show, an evening without vaudeville was given and the price cut to five cents. Although many were disappointed, yet they will doubtless not offend the management for adhering to what is thought the most desirable method of conducting the house. Another vaudeville attraction will be secured for to-night, although the names were impossible to secure in time for this paper.

BAND AND CITY CHAMPIONSHIP AT THE VIC TONIGHT.

The cold weather has put the ice at the Vic in ideal condition, and everything is thus favoring the three mile

ASEPTO SOAP POWDER
sweetens the home
ASK YOUR GROCER

race this evening, which will be skated between the third and fourth band.

This is the third race of the series, and by many anticipated as the most interesting of all. Four of the best long distance skaters in the city are out after the scalp of Belyea, who they are determined to dethrone and remove from his previous unimpeachable position as the bright particular long distance skater. There will be some record broken at the Vic this evening if they claim it. Belyea retains his former position. The race is so smooth that opportunity for breaking records will be excellent.

TEMPLE OF HONOR SPORTS AT THE VICTORIA MONDAY.

Alexandra Temple of Honor have the reputation of never doing anything in a half hearted way, and the manner in which they are looking for success in connection with their sports is a most day evening plainly indicates that they will have the policemen very hard for supremacy. They have exposed or hundreds of tickets and arranged for a splendid series of events. Keep your feet from the station at Honor sports.

BURNING OF ROME CREATES A FUROR AT THE UNIQUE.

Notwithstanding the disagreeable weather the Unique was crowded at the show last evening to see the much anticipated picture feature, Nero, or the Burning of Rome. That anticipation was really realized would be but mildly expressing the delight with which every scene in the wonderful story was received. The grand climax, when Nero is watching the city burn, was especially applauded by the audience, as few believed such motion picture realism was possible.

This grand subject will be shown again today and tomorrow, and those who have not had time to see the fall to be present. Mrs. Tufts was received splendidly, and her singing was greatly appreciated, as evidenced by the number of recalls received.

Edison's big feature, "The Fishing Industry of Gloucester, Mass.," will be included in Wednesday's programme.

NEW VAUDEVILLE ATTRACTION AT THE ORPHEUM.

Owing to the fact that the act engaged at the Orpheum for this week not coming up to the standard which the management carefully insists upon, new arrangements have been made for the programme. The original act was withdrawn after the first performance, Monday afternoon, and satisfactory terms made with the performers.

A new act has been engaged today, namely, Signor Maximo, who is billed as the World's Champion Tight Wire performer.

The novel performance of this artist created almost a sensation when he appeared at the leading vaudeville house in Halifax last week, and as a substitute to the attraction billed for the week he is expected to be more than satisfactory.

QUEEN'S RINK.

The children's carnival takes place tomorrow afternoon.

The skating rink and now all is in readiness for the children's big winter event.

The tickets are now on sale at E. G. Nelson and Co., and at the rink office, and the names of the children are being taken in the entire more than satisfactory.

THE GEM.

A Cowboy's Reward, the great sensational western drama, scored a hit with large audiences at the Gem last night. The story deals with life on the plains and proved all that the management claimed for it. This subject has been the feature over all the leading circuits of motion picture houses. The film is over a thousand feet long, and not a dull moment in the entire production. The Cowboy's Reward is full of merit, splendid action, in a word, a sensational story.

Dr. Williams' Posthumous Revenge is a novelty of motion picture development. This is a dramatic study, as enacted by Mr. Alexander and Mr. Berthier of the Naurantes Theatre, of Paris. The famous "Rouge et Noir" Hall of Paris, the famous gambling place, is depicted. In this film a miniature motion picture is shown, one of the latest novelties of moving pictures.

This story deals with the life of a man who is a victim of a woman's love. The film is a masterpiece of acting and direction. The story is a masterpiece of acting and direction. The story is a masterpiece of acting and direction.

NEW YORK CENTRAL TAKES UP FARMING

Purchases First of Three Places for Demonstration

Nothing Altruistic, Declares Railroad President—Practical Experiments to Show How to Increase Yield.

NEW YORK, Feb. 7.—Not content with merely showing how two blades of grass can be grown where only one has grown before, but to show how to produce four or five bushels of potatoes where only one has been obtained before, and other produce in proportion, the New York Central Railroad has purchased the first of the demonstration farms. It will establish throughout the State.

This is the first step in a comprehensive campaign for agricultural education which has for its purpose the education of the farm owner as to how the greatest yield at the greatest profit can be obtained. Mr. William C. Brown, president of the New York Central, Mr. James J. Hill and other railroad men have foremost among the advocates of the movement for the increase in the yield of farm products, which would also increase the profits of the farmer and decrease the cost of living.

The raising of potatoes will illustrate what is sought to be accomplished. The average yield an acre in New York State is eighty-five bushels, and in Germany, Belgium and Great Britain it is 250 bushels. Experiments in this State have shown it is possible to increase the yield to 300 and 350 bushels an acre. But if the yield could be increased to 250 bushels on the crop of 1908, more than \$25,000,000 would have been added to the bank accounts of the farmers.

The first farm property obtained by the railroad is in Monroe county, a few rods from the station at West Berger. It is a so-called "rundown" farm, and it is proposed to show by practical example how, with a reasonable expenditure, by fertilization and intelligent cultivation the farm can be made profitable. There will be nothing like a scientific experimental farm, but common sense methods will be employed, and the co-operation of the farmers of the neighborhood is invited.

This is one of three farms which the railroad will establish. The other two are the Mohawk Valley and the third will be in the western slope of the Adirondacks. When the farms are developed to the highest degree of efficiency they will be sold and the railroad will start in to build up other "rundown" farms in the Mohawk Valley and the third will be in the western slope of the Adirondacks. When the farms are developed to the highest degree of efficiency they will be sold and the railroad will start in to build up other "rundown" farms in the Mohawk Valley and the third will be in the western slope of the Adirondacks.

On the West Bergh farm, which is a "less than average" farm, efforts will be concentrated to develop it four present crops, potatoes, cabbage, alfalfa and wheat. Experiments will be conducted with and without fertilizers and spraying, so as to show the greatest possible cash yield in proportion to actual expenditure.

The railroad company is anxious that the experiments shall not be regarded as foolish or extravagant, and the expenditures will be within reach of the average farmer. The purpose of the railroad is to point the way to the farmers of the particular section in which the demonstration farms are located. There is no altruism about the company's assumption that it is inspired by an altruistic motive in making this experiment.

"Prosperous farmers along our lines would mean increased traffic," said Mr. Brown yesterday in discussing the plan. "There is no altruism about the plan. It means that it is good business for the railroad to do it all to increase the products of the farm and better farming conditions. If the railroad, by moderate expense and thought, can make these conditions radically better for the farmer, it is plainly in its own interest to do so. That is why we have planned the three farm stations here in New York State."

Mr. Brown admits that he is an enthusiast on the subject and believes

that the movement will be continued wide in its scope. The results of the experiments will be carefully watched and tabulated, and if the results are at all like what the railroad anticipates it is believed that other lines in all parts of the country will take up the work as a practical business plan for increasing traffic.

The experiment is of particular interest to all the people now in view of the agitation over the present high price of food. Experts have declared that the most reasonable remedy, and perhaps the only one, for the high prices is the increase in the production of agricultural products, and as there is little chance for this increase through acreage it must be by more intelligent methods and along the lines proposed by the New York Central.
