INVITE especial attention to the New Screw STEERING GEER manufactured by them, which can be seen at their Establishment. They confidently recommend to all Ship Owners and Masters, as the best Ship-Steerer now in use. It works easier, and more promptly than the common tiller with ropes and blocks, and can be worked easily by one man in the heaviest gale. By an ingenious arrangement, a gradually increased power over the Rudder is obtained, which prevents sudden jirks, so well known to nautical men with the common gear. Its action is direct, prompt, and is not liable to get out of order. For strength and durability it is superior to any other apparatus that has yet been applied, and will be sold considerable lower than they can be imported.

May 22, 1857. 6w.

To Ship Builders and Owners.

THE Subscribers begs to call attention to a new and superior description of *CAMBOOSE*, which they are now manufacturing, suitable for a Vessel of from 1500 to 2000 tons, which from its great thickness of plate and improved arrangements will be found fully equal if not superior to any Camboose heretofore in use, it having numerous improvements of vast importance to its utility and durability, which have been hitherto neglected They have also made similar improvements to their former Stock of PATTERNS, which they feel confident will make them superior to any others at present in the market, and will sell them lower than can be imported.
