

Special attention will be given to Practical Anatomy by the Demonstrator and an efficient staff of assistants. The dissecting room is large and well ventilated, and supplied with every requisite for comfort and convenience.

During the dissecting of each part, the student shall be examined at least three times by the Demonstrator, who, when he is satisfied, will certify to the work done.

PHYSIOLOGY.

PROFESSOR MCCALLUM.

The course in this subject will consist of demonstrations and didactic lectures. The relation of Physiological facts to Practical Medicines and Pathology will receive that attention it merits. Lectures will be illustrated by diagrams, charts and instruments.

GENERAL CHEMISTRY AND CHEMICAL PHYSICS.

PROFESSOR BOWMAN.

In these subjects the lectures will be accompanied by experimental demonstrations. To this end the Chair has been fully equipped with all necessary apparatus. Organic Chemistry will be taught, with special reference to its application to medicine.

PRACTICAL CHEMISTRY.

PROFESSOR W. E. SAUNDERS.

The laboratory of Practical Chemistry is probably second to none in the Dominion in the matter of fittings, no expense having been spared to make the room convenient and useful to the students, each of whom performs for himself every operation of the course, which embraces Inorganic and Organic Chemistry, Toxicology, and Urinary Analysis, and is kept within the limits of that which will be of ultimate practical value, rather than that which would be merely crammed, and then forgotten.
