THE STUDY OF GEOGRAPHY

(4) The lack of close connection and steady coherency of the facts treated in any topic.

(5) The failure to use maps, to make them concrete and real rather than purely formal and symbolic.

THE PROVINCIAL GEOGRAPHIES

The supplementary volumes called "Provincial Geographies," which will be issued almost immediately, will be found to be of great value in working out the general scheme of geographical study. These volumes will be four in number: Ontario and Quebec; the Maritime Provinces; Manitoba and the North-West Territories; British Columbia and the Yukon. The "Provincial Geographies" will give an opportunity for an elaborate, picturesque, descriptive treatment of topics, which, for lack of space, is not possible in the general geography. In pictures, maps, and detailed descriptions, there will be a richer, more interesting and more instructive treatment of important provincial topics than can be secured in any other way. This is a kind of treatment of topics, which appeals to To put this interesting descriptive material children. early into the school course will give a certain richness and vitality to all later study of geography.

The general principle underlying the "Provincial Geographies" is that children will be more interested in the important topics of their own province, and of the provinces close at hand, than they will be in questions
