## THE PATENT **Eureka Club Skate.**

The above-named Comprises the following Advantages  
**Every Other Skate Extant.**

- 1st. All nuts, bolts, levers, springs and loose pieces are avoided.
- 2nd. The Skate requires no adjustment to fit any size or shaped boot.
- 3rd. There being no spring, it is impossible for the Skate to become detached from the boot while performing the most violent and difficult exercises.
- 4th. The fastening being simple and very strong, requires no wrenches or other appliance, it being emphatically and beyond all question a self-adjusting Skate.
- 5th. If during skating the sole of the boot becomes wet and soft, thus tending to loosen the hold, it can at once be tightened by a simple turn of the thumb and finger without delay or inconvenience to the skater.
- 6th. All the Skates (except No. 2) are *solid steel faced* of the very best material. A point of merit to be found in few (if any) other make of Skates, now or ever offered to the public.
- 7th. It never varies in quality of material—good finish, or general appearance, in all of which points it is second to none in the world.
- 8th. A child four years old can attach it to *and take it off the foot in a minute.*

### **THE PATENT EUREKA CLUB SKATE.**

*The best and really the only perfect self-fastening Skate manufactured. It differs a little from other Self-fastening Skates as it never leaves the Skater and goes alone. Always ready for any size of boot. No setting of clamps; no pieces to lose. Impossible to jump it off your boot. Put on and taken off in a moment, without the least trouble.*
