

Short System Milling Means Long Profits

Whether for the individual, the milling company or the co-operative society the Marvel Flour Mill indicates the way to a successful business and a big financial return at a small investment and little labor. Install a

MARVEL MILL

in your community. Be the miller of the local wheat crop and return a better flour at a lower cost and a bigger profit to you. The Marvel Mill requires no previous experience. You—with no knowledge of milling—can return a higher grade flour containing all the natural oils and nut-like flavor of the grain in 45 seconds by means of this one-man, single-unit, self-contained mill. And you can do it at a smaller investment and lower upkeep cost than by the long process mill.

The Marvel Mill offers a paying investment for you, for your firm or your co-operative society, returning profits of \$500 to \$1000 a month under the proper management.

Let us tell you about the installation, operation and selling methods necessary to the successful operation of a flour mill in your town. Mail the attached coupon today.

AS RELIABLE AS ITS NAME

"Received your churn safely and gave it a fair test; I am perfectly delighted with it," writes one recent purchaser of a "Reliable" Churn—and there is a reason.

You get your butter the easiest, quickest and most profitable way, when you use

THE FAMOUS

RELIABLE CHURN

Its clever mechanism gives that efficient perpendicular stroke, but with a high-geared rotary drive, and it is easier to keep clean, too, just lift out the smooth, white, double glazed jar and rinse.

You can get a book which illustrates every part, gives you full information of hand drive (which can be operated by a child of six,) belt drive and electric drive Reliable Churns.
