

The Call of the North

Do you know of the many advantages that New Ontario, with its millions of fertile acres, offers to the prospective settler? Do you know that these rich agricultural lands, obtainable free, and at a nominal cost, are already producing grain and vegetables second to none in the world.

For literature descriptive of this great territory, and for information as to terms, homestead regulations, settlers' rates, etc., write to

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Supplying Coal for the Dominion Buildings," will be received at this office until 4 p.m., on Monday, July 14th, 1913, for the supply of coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained on application at this office and from the caretakers of the different Dominion Buildings.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, June 14, 1913.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—42889.

**No Gas
No Dust**

Supplies home with pure warm air.
Fused joints cannot leak.

Heating a Home Properly is Something More Than Raising the Temperature. The air must be pure as well as warm. The health of your family demands it. An odor of gas is not only unpleasant but is a menace to the health. Fine coal dust floating in the air is just as bad.

¶ The HECLA Furnace is absolutely gas and dust proof. The Joints, which in other Furnaces are made with bolts and cement, are fused in the HECLA. This process welds the cast-iron and steel into a solid one-piece construction.

¶ Expansion and contraction cannot spread the fused joint. Even after 20 years of service, the joints in the HECLA will be found perfectly tight. The fumes from the fire cannot find an opening. The air in the living rooms is always pure and healthful.

HECLA FURNACE

For Coal and Wood

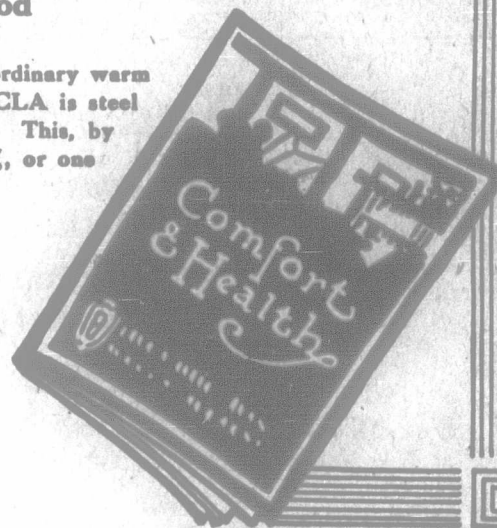

Ribbed Fire-Pot

This healthful heating costs less than ordinary warm air heating. The fire-pot of the HECLA is steel ribbed to radiate the heat rapidly. This, by actual test, makes a saving of 13½%, or one ton of coal in seven.

Do you want to give more thought to the heating of your home?

"MONARCH" Engines Save Running Cost

"Monarch" Engines give more power than their rating, yet use no more fuel. This is due to good material and design. The fuel tank is one solid piece, preventing leakage. Every drop of "Monarch" fuel gives a return in power, and full power at that. It pays to get a "Monarch." The "Monarch" pays for itself by saving fuel.
