THE HOME MONEY MAKER

Machine weighs 17 pounds. It is more wonderful than a sewing machine, just as durable, simple and easy to operate.

To Work at Their Homes Under the Direction of A Pair in 30 Minutes

The GLASGOW WOOLLEN CO.

37 MELINDA ST., TORONTO,

To Fill Large Contracts—Good Wages Easily Earned.

We want a few more workers in this locality, at once, and in order to secure your co-operation without the delay of correspondence, we herewith explain our full plan in this advertisement. The work is simple, and the Machine is easily operated, and with the Guide, requires no teacher. If you wish to join our staff of Workers let us hear from you promptly with the Contract, order form, and remittance, as a guarantee, and we will send machine and outfit to begin work at once.

OUR METHOD OF DOING BUSINESS

We wish to secure the services of families to do knitting for us in their homes. Our method is the same as adopted in England. We are the introducers of this plan and the largest knitting concern in Canada.

After long experience, we have been able to produce an Automatic Machine by which all kinds of seamless knitting is now done by our Family Machine, thereby enabling anyone of ordinary intelligence to quickly learn to do the work from the instruction Guide. All we require is that you use the machine according to directions. The Machine being made expressly for this purpose, and the operation so simple, it cannot possibly make a mistake in its work.

The great demand now is for Bicycle Stockings, Woodmen's Socks, and Motormen's Mittens, and as we are unable to supply the demand, have taken this method of advertising for more help.

The large export trade to the North-west Territories, British Columbia, and the British Colonies furnishes an unlimited demand for our goods, and with the combined operation of the many families we are employing, together with the large amount of knitting we are able to turn out, by which we save rents, insurance, interest on capital, etc., enables us to undersell any manufacturer of this class of goods, and to have sale for all the knitting we can have turned out.

The price we pay for finished bicycle stockings is \$10.00 per hundred, or at the rate of 20c per pair; woodmen's socks, 5c, and motormen's mittens, 12c a pair. All other work in proportion to size.

The machine can be operated by any one of a family, and at our prices any energetic family should be able to sustain themselves comfortably, and in time be a source of independent comfort.

Our plan is to send out each machine to beginners with a sock or stocking partially knitted, and remaining in the machine ready to be continued, and also enough yarn to knit one pair of sample socks or stockings and a simple and complete instruction Guide, showing how the work is to be done. When the samples have been finished and returned to us satisfactorily, we send a quantity of yarn, which you knit and return likewise when finished. We prepay charges on all work one way, and our workers pay return charges on the machine, in simple and rapid done, the machine having a capacity of ten thousand stitches a minute. We have many persons now in our employ who can knit from twenty-five to thirty pairs of socks or stockings a day, and where the time of the family is devoted to the work, you can readily see that \$15.00 or \$20.00 per week can be easily earned.

We furnish our workers all the materials, yarn, etc., free, and everything that is necessary for the work. We also furnish the machines only for the exclusive use of the worker, and we cannot make a distinction with one worker and another, besides, we are doing an extensive business, and must be governed by business principles.

The machine and price of the machine is \$15, and post-charge will not be sold to any others than those who will agree to do knitting for us.

If at any time after you commence, and have done an amount of work equal to the purchase price, and wish to discontinue, we will take back machine and refund the amount paid for same, after deducting cost of our expense only.

There is a Large Demand by the Trade for this class of work, and you can depend upon it year after year, and if you engage with us (whole or spare time) we will keep you supplied with work as long as you do it satisfactorily, and we return it promptly. We entrust our workers with large quantities of valuable yarn, and as we give

NO CONNECTION WITH ANY OTHER COMPANY. MONTREAL TRUE WITNESS.

1832, 653, 628. Plants controlled by the 183 corporations, 2,029 active, 174 idle. Over fifty per cent. of the total number of such corporations were chartered during the eighteen months from January 1, 1899, to June 30, 1900.

The incorporations of companies other than consolidations show a total of \$1,100,000,000.

LET US GO TO DESJARDINS' That is what is being said this season, among all the buyers of choice furs, at reasonable prices, for both poor and rich. It is a well established fact that the great house of Charles Desjardins & Co. gives 80 to 40 per cent. better value than anywhere else, for the same money.

Join the crowd, therefore, for Charles Desjardins & Co., who are in every way the kings of furs in Canada, 1533 to 1541 St. Catherine Street.

MUNICIPAL LODGING HOUSE

Last Saturday evening the new municipal lodging house was formally opened. The City Council some months ago appropriated \$10,000 for the lodging house; but, owing to the depleted condition of the city's treasury, the money was not available. A few public-spirited citizens, therefore, at the suggestion of the City Homes Association, rented and furnished a large building on the West side and presented it to the city. Any one who has less than 50 cents, and who is not an habitual tramp, may obtain free a clean, warm bed for the night, and in the morning coffee and bread. The lodging house is to be conducted along the same lines as are the lodging houses established by the city of New York.—The New World, Chicago.

POTATOES FROM EUROPE

A number of Long Island farmers who have been holding their stock of potatoes for higher prices did not make as wise a move as they at first thought. The importation of potatoes from Europe has cut down the high prices, and the farmers have a large stock on hand which they will have to dispose of at regular prices.

SAVINGS INCREASING.—At the close of the fiscal year the balance at the credit of the depositors in the Postoffice and Government savings banks amounted to \$56,048,957.06, an increase of \$2,899,284.66 over the balance held on June 30, 1900; part of this increase, \$1,589,761.05, represents interest added to the various accounts, and the remainder, \$1,309,523.61, the excess of receipts over withdrawals.

An exchange says: "What do you think of an artist who painted cobwebs on a ceiling so truthfully that the hired girl wore herself into an

attack of nervous prostration trying to sweep them down?" This causes an editor who has had some experience along this line to remark, that there might have been such an artist, but there never was such a hired girl!

THE IRISH-AMERICAN TELEPHONE GIRL. Applicants for employment in the Chicago telephone exchanges have to pass an examination even more trying than those which try the souls and ruin the tempers of so many office seekers. The would-be "Central" must not only demonstrate the ability to hear well and to speak distinctly in just the tone which the telephone likes best, but must also give proof of quickness in receiving mental impressions and translating them into action. This last is considered of special importance in the good operator, and those who lack it, though they may have, as they often do, all the other qualifications, are pitilessly rejected. "A girl," it is stated, "may be able to hear and talk perfectly well, but if slow in perception—that is, slow to catch a conversation or number, and slow to act upon what she hears—she is not a desirable candidate. Quickness of perception is dependent partly on previous training and temperament, and partly on nationality. A large percentage of the operators in the Chicago exchanges are American girls of Irish parentage, as these are found to have to the highest degree the necessary quickness of perception and action. Girls raised in the city are also found to be better in this respect than those raised in the country." That is certainly highly complimentary to "American girls of Irish parentage," particularly as it comes from the Electrical World and Engineer, a paper not given to saying pretty things about anybody except men who deal with figures, forces and machines. In

signs, according to the same authority, the operators are supplied with a teacher of elocution, who gives instruction covering points of correct breathing, vocal delivery, articulation, reserve force, pitching the voice, and acuteness of comprehension and perception. There are hints in all this for the telephone-using public, many members of which have yet to acquire the first correct notion about talking into the great-est of modern miracles.—New York Times.
