Burdock Blood Bitters permanently cured him of Dyspepsia.

The above picture is a very striking likeness of Mr. John Bonnell, Arthur St., Truro, N. S., the well-known shoemaker of that town, at work in his shop.

Mr. Bonnell is one of those who have great faith in Burdock Blood Bitters, and

on a bench all day long is a poor cure for dyspepsia, as I do not get much exercise and bending over constantly interferes with the proper action of the stomach and bowels, I tried a good many different kinds of medicines but they call a line. of medicines, but they only relieved me for a time, then I would be as bad as ever. Hearing so much about the good Burdock Blood Bitters was doing I thought I would give it a trial, and after taking two bottles and a half I was completely cured, and best of all, the cure has been permanent, for to the present day I have not had any for to the present day I have not had any return of my old trouble and enjoy splendid health. ## SHORTAGE OF PAPER

Immense Quantities of Stock and Machinery Destroyed-Mills Every. where Rushed to Fill Orders

Montreal, May 1.-Mr. W. D. Gillean, manager of the Canada Paper Company, seen by a reporter, said: "The destruction of the Eddy Company's mill at Hull will largely demoralize the newspaper trade of the country for some time to come, Many newspapers will find it extremely difficult to procure their requisite supplies. For over six months all the mills in Caneda have been working right up to their full capacity, and an of them at the present time are over sold. On Friday morning I received telegrams great faith in Burdock Blood Bitters, and it is a confidence based on actual experience. Just read this letter that he recently wrote:

"Some five years ago I was greatly troubled with dyspepsia, pain in my back, and sick headache, besides being very much run down in health.

"I am a shoemaker by trade, and sitting on a bench all day long is a poor cure for dyspepsia as I do not get a much exercise.

Friday morning I received telegrams from 25 newspapers in various parts of Canada asking to be supplied, but it is absolutely impossible for us to do much, if anything. Our first thought must be to protect our contracts; we are compelled to keep a large stock ahead for our own customers. It would be simple folly for us to sell up to the danger mark. And the conditions that prevail in Canada prevail also to a great extent in the the conditions that prevail in Canada prevail also to a great extent in the United States. Very little surplus stock is to be had. The fact of the matter is that paper manufacturing has experienced a great boom in the last half year, and, as I have said, the capacity of all the mills in Canada, the United States and Great Britain has been taxed to the utmost to meet an ever increasing demand.
