FRIDAY, JAN' ARY 16, 1841.

A BAD BEGINNING.

The editor of the News-Advertiser is doing his best to convince the readers of transacting the public business of the the election. It is a matter in which not province. He is ready to believe the only every elector, but every resident of public men, and to act upon them as if they had been proved to be unquestion- is to a greater or less extent charge the surveys of the embankments, they had been proved to be unquestionably true. The representative of the people who places reliance on every lected or badly conducted, all its rumor which is circulated to the preju- inhabitants suffer. The health, the comdice of even his opponents is certain to fort and the convenience of every partisan who desires to use him for his ewn purposes. Giving credence to such Council, which is soon to be elected, do rumors, repeating them and drawing conclusions from them, are the surest evidences of a weak mind and an ill-bal-

the most offensive language he can comwhom he must work and on whose him whether Mr. A. or Mr. B. is elected so-operation he must depend properly and efficiently to perform borne in mind that the sanitary state of too malignant and too impracticable to the energy and the faithfulness of the make an efficient or an influential mem- members of the City Council. If the ber of a deliberative body. No prudent right measures are not taken at the right man throws obstacles in his own way, or time to preserve the public health, there deliberately and without necessity makes enemies for himself or for his party.

The editor of the News-Advertiser will, officials of the Education Department, besides being malicious, is most unwise. Those who read the insulting language which he uses with respect to men who have not offended him in any way, and who have done nothing contrary to the public interest, will be certain to form a very low opinion of his ability to perform his duties as the representative of Vancouver in the Provincial Assembly. Every one knows that an egotistical and a malignant man, who goes out of his way to traduce and misrepresent men of the opposite party never makes a useful member of a deliberative body. And this is the character that the editor of the News-Advertiser is doing his best to earn for himself.

THE COMPETENT MEN.

The canvass for the positions of Mayor between now and election day, be brisk. Council of 1891 will have, besides its the market house. The area just taken west, says about it : within the city's limits must be incorfinances of the city must be put on a better consternation through the business and footing. A better system of dealing with financial world, and promote monetary appropriations and of keeping accounts contraction and panic. But the country is needed. To do all this, and to keep still refuses to believe that its representatives will sanction any such suicidal acthe regular machinery of the city govern-ment in good working order, require bility of free coinage there stand the all the business ability that ten ex- House of Representatives and the Pr siperienced men possess.

room at the Council Board for cranks or imbeciles. The system of doing the executive work of the committees requires sufficient time for the country to understand the financial question, and to learn what the destruction of councillors to be a clear-headed practical man of business. Even a single obstructionist or au impracticable faddist and we still hope that it may be done beprevent good work being done.

There are indications that many of the electors are alive to the necessities of the situation, and are determined to vote only Farmers' Alliance, which has become a for men of proved business ability. We power in the United States, is in favor of tion given, and the proclamation must be for men of proved business ability. We power in the United States, is in favor of tion given, and the proclamation must be respectful consideration. A few years earnestly hope that these form a large the free coinage of silver. One of its issued soon if it is to be convened early since he discovered the cause of tubermajority of the electorate. The citizens great objects is to make money plenty in in that month. The reason given for the cul sis, and this discovery at the present of Victoria have seen the folly of voting the country, and its members think that lateness of the session, by an ingenious for men because they liked them as if there are only greenbacks enough correspondent of a western paper, is that neighbors and fellow-citizens, and not be- printed and silver dollars enough coined, cause they esteemed them as upright and every one can have all the money le the Government wants to have Parlia- this also will soon become an acknowtrustworthy men of business. Every one needs without having to work too hald ment in session when the results are ledged fact." knows that a candidate can be in many for it. They have yet to learn that there known, so that a redistribution measure ways a most estimable man and yet wholly are many things to be thought of in this annit to perform the duties of the office currency business that they have not true, a general election may be expected upon and believed in, Dr. Flat tells in full confidence that an adequate imwhich he aspires to fill. Many of them Victoria, like every other ci y and town may support the mischievous silver bill. on the continent, has not at its command | believing that the farmers will continue any more brains and business experience some time longer at their present stage than it needs. When there is a chance of advancement. of choosing a man of talent and experience in preference to a candidate who is known not to have had experience, and who has shown no proofs of possessing ability, personal liking should not stand in the way of voting for the man whose papacity has been proved. We do hope

that competency will be made the sole test at the coming election. This is what man does when his private interests are conc rned, and there is equally good reason for his acting in the same way in matters in which the public welfare is

involved. We hope, too, that every person who has a vote will take a lively interest in high or how humble his position, can say with any approach to truth, "It is nothing to me who is elected." It is a The man who, without provocation, in great deal to him and to any one living duties of his position, is the city depends upon the intelligence, will be sure to be some victims to the ignorance and the apathy which are he causes of the neglect. Can any one tell before he is much older, find that the who will be those victums? If the incourse which he has pursued with respect telligent elector will reflect for a few to the stupid reports raised by ill-natured moments he will be convinced that it is and unscrupulous persons, relative to the of a great deal of consequence to him who will be in charge of the city's affairs for the next twelve months. This reflection should cause him to make it a point to poll his vote and to poll it for the most competent of the candidates.

FROM BAD TO WORSE.

The hill to provide against the contraction of the currency, to make way for which the Force Bill was thrust aside, is, in the opinion of very many, not less mischievous than the Force Bill itself. Its object is to give silver a fictitious value by making the Government a very large purchaser of this metal and there is an amendment which is intended to compel the people of the United States to accept United States who believe that it is no more the business of government to deal and Aldermen will, during the interval in silver than to deal in pork or wheat. But the silver men have much influence There are many candidates in the field, in Congress, and they are experts in the and some of them are men who have art and mystery of obtai ing votes. proved themselves to possess high busi- Whether or not they will succeed in enness ability. We sincerely trust that gineering this silver bill, which comthese men will be elected. Reversing the ratio and of the loss of heat with the ratio ing temperature in ascending method the lecturer then proceeded to excourse of the trade winds and winds and to show on a page on heat winds, and to show on a map on a Projection how the variations in a stant currents are made intelligit effect of larg: masses of land in effect of larg: masses or land in tudes in raising the temperature mense absorption of the solar heat, position of land in relation to the as productive of monsoons, were na upon, which thus introduced the laws of climate, of which Mr. Gr. North America and Europe as the terresting as emphifications, as show North America and Europe as the teresting exemplifications, as show very plain manner the effect of and plain in attracting warmth an cold respectively. The laws of at as yet, too little understood to duced with advantage. We see how rapid is the radiation constant on from the still boiling heat in the of the earth. To-night, however, confine ourselves to the outmost the atmosphere. And, first, howeigh it? The lecturer here gav planation of the barometer. Secon always the same? No: dry all heavier than aqueous vapor, and sun is perpetually drawing up

us trace the origin of winds, the causes, and the laws that gover. They are caused by the intense evant the equator, produced by the swhere they do not blow in regular the reasons for their variability car erally assigned. Frank Divis, who went Eist sor ago in the interests of Vianen's salmon business, returned by the Papress to Westminster, on Mond satisfied with the results of his trip Davis visited all the large cities, a he will ship this year more fresh as the Eistern market than ever befor umbian.

sun is perpetually drawing up vapor from the ocean and from a surfaces, it is constantly disturateness, it is constantly disturated constant disturbance the air woul and be unable to support life. I stant disturbance takes the form of fents or as wareall them, wind

rents, or, as we call them, wind.
