Boots and Shoes

Just arrived a large stock of Mens' Heavy Grain Boots at \$2.50 - Boys' Heavy Grain Boots at \$1.80 Youths Heavy Grain Boots at \$1.60 Ladies Tan Oxfords at \$1.80 Ladies Black Oxfords at \$1.80 and other lines of Boots Shoes and Rubbers at reasonable prices.

WANTED: Potatoes, Eggs and Butter in exchange for goods.

JOSEPH I. FOSTER

GRANVILLE ST.

The Gourlay Piano appeals particularly to an Appreciative Class of Buyers. The more discriminating the Buyer, the more easily is the Superiority of the Gourlay apparent.

Gourlay Pianos

are all of One Quality—the Very Best. If we took a commission to make a single Piano for \$1,000 it could be of No Better Material or Workmanship than we regularly use in any one of our simpler, more moderately-priced styles. We could spend more money on ornamentation, but nothing to improve quality.

Will you examine a Gourlay?

BE WISE; STICK TO FARM.

It Stands For Everything Attractive, Wholesome and Profitable.
 For the restless boy or girl who wants to go away from the farm and get out into the big world to do something, no better bit of earnest reading can be found than this extract from the New York Independent.
 "The new farm children," it says, "live a third dispensation. The sciences began to take hold of the land at least fifty years ago, but there was an off-putting necessity. The transition period was protracted, mainly because the land was already in possession of a race of farmers that must die off."
 "The agricultural college applied the sciences to tillage and to crops and to animal life on the farm twenty-five years ago. It was slow work, not only to awaken the farmer, but to investigate, discover, and then to apply. The age is now rapidly falling into the hands of men who are alive to the great fact that production has never yet approached its maximum. The orchards and all this while, thanks to moths and caterpillars, become more and more an entomological laboratory. Gradually it has come about that not a thing can be grown on the land without a fight. This has not by any means been a permanent loss, but has awakened a spirit of scientific examination and determination to master conditions. The microscope and the crucible are the necessary today as the plow and the hoe. The farm boy is not without stimulants, nor is he without interesting conditions; rather it will now take the brighter boys to do the farming."
 "The development of farm machinery and the application of new forces on the land have gone on at the same time. In every department of the home, in the house as well as in the barn, machinery takes the place of men, and the help problem is now driving us to a still more complete age of mechanism."
 "There is no lot on earth so enviable today as that of an American farm boy or girl. They have room, fresh air, beautiful surroundings, while the arts and sciences are involved in their work, and isolation is absolutely abolished."
 "Nothing can be gained any longer by quitting the farm. It stands for everything that is attractive, wholesome and profitable; but at the same time it stands for the new and the stimulating. Country life cannot be made dull, unless it wilfully severs itself from advantages that are freely offered."

WILD MUSTARD GREAT PEST.

Not Useful Like its Estable Cousins, but an Indefatigable Foe.
 About as troublesome a weed as the farmer the world over has to deal with is the charlock or wild mustard. It is prolific in the extreme and, unlike its black and white cousins, is not only worthless, but harmful. About the only way to control it is to use a spray

made up of either a 2 per cent solution of copper sulphate or a 15 per cent solution of iron sulphate. The quantity needed is from fifteen to twenty gallons to the acre, and American grain growers go after it with a sort of zealous care.
 It is particularly obnoxious in wheat-fields, not only choking growth, but making the harvesting of the crop a matter of great difficulty.

Creek an Ideal Farm Hand.

A wide-awake farmer noticed that his creek, if dammed at a certain place, would produce a six foot waterfall. He built a dam and put in a water wheel—a \$300 turbine that yielded twenty-five horsepower. Over the water wheel he built a powerhouse in which he placed a dynamo for the water wheel to run. The electricity was wired 1,700 feet to the farm buildings.
 Then he put his electricity to work in every possible place about the premises. He heated and lighted the house, did the cooking and the washing and ironing, did the sweeping and dusting, beat eggs—and at three different speeds too—turned the ice cream freezer and in summer ventilated the house with fans.
 Now with a vacuum milking machine he milks twenty cows, two at a time; drives the cream separator, churns, pumps water into every room in the house and into the stall of each horse and cow, drives lathes and drills in a workshop, drives a circular saw to cut cordwood and drives an ensilage cutter. It pays to be up to date.

THE MONEY-MAKING MULE.

The mule is a slave animal. At two years he is ready to do considerable work and will from that age on make a profit over and above his feed and expense bill in the value of his labor and at the same time he is growing more valuable until four or five years old, at which age he will command the top of the market in his age class.

Canada's Crops

Ottawa, Sept. 14—A bulletin on the field crops of Canada issued today gives their average condition by provinces at the end of August, together with estimates of the production of spring wheat, oats and barley at that time. The per cent. condition of wheat is given as 86.80, of oats 84.44 and of barley 84.75, which is about five to seven per cent. higher than last year and nearly the same as two years ago. The other crops range in condition from 80 to 86 per cent., and are generally somewhat lower than in 1909 and 1910. The rains of August hindered the ripening of grain and some injury was caused by hail storms, low temperature and rust. Towards the end of the month frost prevailed in many sections of the Northwest provinces, the full extent of which could not be determined at the date of the reports, but in the case of wheat, oats and barley production was lowered by probably twelve per cent., which has been followed in the table. In the older provinces the grains ripened earlier and little damage was sustained excepting from drought in some localities, and the reported condition was seventy-five or over.

The average yield of spring wheat is estimated at 19.14 bushels per acre for the Dominion, which is seven bushels more than last year, and the total yield at 186,928,000 bushels. The fall wheat was reported last month at 17,706,000 bushels, being grown almost wholly in Ontario and Alberta. The total wheat yield of the country is therefore estimated to be 204,634,000 bushels or 81,849,000 bushels more than last year at the same date. The average per acre is 19.50 bushels, or 6.30 bushels per acre more than last year.

For the Dominion the yield of oats is given as 368,153,000 bushels, which is 84,906,000 bushels more than last year's estimate at the same date, and the average at 35.81 bushels per acre, being more than last year by 7.10 bushels. The average for barley is also higher than last year by 7.31 bushels, and the total yield is estimated at 51,559,000 bushels as against 39,388,000 bushels for last year.

The estimated yield of spring wheat for Manitoba, Saskatchewan and Alberta this year is 181,535,000 bushels, of fall wheat 3,193,000 bushels, of oats 204,758,000 bushels and of barley 30,205,000 bushels, as compared with 98,808,000 bushels spring wheat, 1,082,900 bushels fall wheat, 92,201,000 bushels oats and 14,723,000 bushels barley in the previous year.

In Prince Edward Island, Nova Scotia and New Brunswick the estimated yield of spring wheat is 1,453,000 bushels, of oats 16,699,000 bushels and of barley 437,000 bushels; in Quebec 1,777,000 bushels spring wheat 44,619,000 bushels oats and 2,389,000 bushels spring wheat, 14,513,000 bushels fall wheat, 102,077,000 bushels oats and 18,528,000 bushels barley.
 The final estimates of last year printed in the December Monthly gave the production for the whole country as 16,610,000 bushels fall wheat, 133,373,000 bushels spring wheat, 323,449,000 bushels oats, and 45,147,600 bushels barley.
 The October number of the Census Monthly will give the statistics of the areas of field crops of the Dominion this year as taken by the census of the first of June.

Warren Has a Preparation That Will Grow Hair Abundantly

This is an age of new discoveries. To grow hair after it has fallen out today is a reality.
 SALVIA, the great Hair Tonic and Dressing, will positively create a new growth of hair.
 If you want to have a beautiful head of hair, free from dandruff, use SALVIA once a day and watch the results.
 SALVIA is guaranteed to stop falling hair and restore the hair to its natural color. The greatest Hair Vigor known.
 SALVIA is compounded by expert chemists.
 Watch your hair if it is falling out. If you don't, you will sooner or later be bald.
 SALVIA prevents baldness by fastening the hair to the roots.
 Ladies will find SALVIA just the hair dressing they are looking for. It makes the hair soft and fluffy and is not sticky. A large bottle, 50c.
 Ottawa, Sept. 25—It is possible that the departure of Earl Grey, who planned to leave here next week may be delayed and possibly also the coming of the Duke of Connaught. The reason given is that the new government will not be installed before the arrival of the duke, who is inexperienced in the position of governor-general. The Laurier administration will not likely resign within a week and possibly not within two weeks.
 Lame back is one of the most common forms of muscular rheumatism. A few applications of Chamberlain's Liniment will give relief. Sold by all dealers.

2 in 1

SHOE POLISH

No labor. Shines easily. No dirt.
 Does not rub off or soil clothing.
 Preserves the leather, containing neither Turpentine, Acid or other injurious ingredients.
 Brilliant and Lasting.
 It is good for your shoes.

Selecting Seed Potatoes

Breeding plants is becoming as great and important a science as ever the consistent breeding and improvement of live stock has been. A few years ago, the popular mind troubled itself little about such things. Not that it was by any means a new thing, for there were always men who realized this, and practised it too. Many years ago, old Aberdeenshire farmers, as well as others of a progressive type used to select their seed with care, and progress in the acquisition of new varieties were constant. But the public never really grasped its true importance. Today work along these lines is developing on every hand and farmers are beginning to realize the possibilities there are in it. A few years ago, the practice of saving only the smaller potatoes for seed was a common one. Then the importance of using good, healthy, plump specimens only was advocated. Recent investigations indicate the wisdom of going still further in this work, and using only good potatoes from the most prolific and healthy looking hills. Here is how to do it:

When digging the potatoes, dig up a large number of hills, and leave the potatoes lie for the time right where they were dug up. Then fix a certain number of hills in your mind, which will be selected as the ones from which to choose seed for the following year. Go all over the plot, and pick out the number which look the best in all respects. Select from these the best specimens and keep them as seed for the following year. This is a simple matter. It is only following the system by which a progressive and careful breeder of high-class pure-bred stock endeavors to select his breeding animals from each successive crop of youngsters, but it is a plan which can be followed by any farmer, and it will give such results as will encourage him to extend the same system to every department on the farm.

Fight to Finish For Social Reform

The Battle Against Race Track Gambling and the Social Evil in Canada to be Bitter.

TORONTO, Sept. 27—A fight to the finish is what the Social Reform Council of Canada, at its annual meeting yesterday afternoon, designated its warfare against various forms of vice throughout the Dominion. Through resolutions unanimously adopted the announcement was made that the battle against race track gambling and the social evil, especially, will be waged with redoubled energy. The militant spirit was strongly in evidence, and various reports indicated what spirited action the council is taking.
 The struggle over reciprocity in the House of Commons is blamed for the fact that comparatively little progress has been made during the past year in the securing of legislation bearing upon morals.
 The following officers were elected: Hon. President, Archbishop Mathison, of Winnipeg; President, Rev. Dr. Carman; vice-president, Allan Studholme, M. L. A.; secretaries, Rev. Dr. Shearer and Rev. T. Albert Moore; treasurer, Rev. W. T. Graham.
 Before marriage there is the life preserver of love clinging to, but afterward it is a case of sink or swim.

Nova Scotian Dies in Boston

Boston, Sept. 23—Alfred S. Woodworth, a tea merchant who resided at 204 Commonwealth Avenue, and a native of Nova Scotia, left \$2,000 each to the home for Aged Women and the Y.M.C.A. by his will, filed in the probate office yesterday. The will was executed April 20, 1899.
 He left \$100,000 in trust to his wife, Sam E. Woodworth, who with his son, Herbert G. Woodworth, are made trustees. On her death the principal will go to the four children, Herbert G. Woodworth, Gertrude James, wife of Frank H. James, of Brookline; Arthur V. and Stewart C. Woodworth, equally. Each also gets \$20,000. His son, Arthur V., the testator says, already has received a gift for that amount. The residuary estate is given to all the children in equal shares.
 Alfred S. Woodworth, a grandson, gets \$5,000, with a request that it be allowed to accumulate until he is of age.

THE DOCTOR'S QUESTION

Much Sickness Due to Bowel Disorders.

A doctor's first question when consulted by a patient is, "are your bowels regular?" He knows that ninety-eight per cent. of illness is attended with inactive bowels and torpid liver, and that this condition must be removed gently and thoroughly before health can be restored.
 Rexall Orderlies are a positive, pleasant and safe remedy for constipation and bowel disorders in general. We are so certain of their great curative value that we promise to return the purchaser's money in every case when they fail to produce entire satisfaction.
 Rexall Orderlies are eaten like candy, they act quietly, and have a soothing, strengthening, healing influence on the entire intestinal tract. They do not purge, gripe, cause nausea, flatulence, excessive looseness, diarrhoea or other annoying effects. They are especially good for children, weak persons or old folks. Two sizes, 25c. and 10c. Sold only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.

THE FAVORITE LAXATIVE

One at Night Makes the Next Day Bright; No Charge if It Doesn't.

Because of its extremely gentle and effective action, Rexall Orderlies have become the most popular Remedy for Constipation.
 We are so positive that Rexall Orderlies will do all that is claimed for them that we positively guarantee to hand back the money you paid us them upon your mere request, if you are not entirely satisfied.
 Rexall Orderlies are eaten like candy, are very pleasant to the taste, do not gripe, cause nausea, or any other annoyance usually experienced when ordinary cathartics are used.
 Rexall Orderlies have a positive regulative effect upon the bowels and tend to provide permanent relief from Constipation and the myriad of associate ailments. Besides, they help to overcome the necessity of the constant use of laxatives to keep the bowels in normal condition.
 We honestly believe there is no similar medicine so good as Rexall Orderlies, especially for children, aged, or delicate people. They are prepared in convenient tablet form in three sizes of packages. Prices, 10c., 25c., and 50c. Why not try them at our risk or our guarantee?
 Remember, Rexall Remedies can be obtained in this community only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren, Bridgetown.
