

LISTERINE

A non-toxic antiseptic of known and definite power, prepared in a form convenient for immediate use, of ready dilution, slightly, pleasant, and sufficiently powerful for all purposes of asepsis. These are advantages which Listerine embodies.

The success of Listerine is based upon merit, and the best advertisement of Listerine is—Listerine.

LISTERINE DERMATIC SOAP

(FOR USE IN THE ANTISEPTIC TREATMENT OF DISEASES OF THE SKIN.)

Listerine "Dermatic" Soap contains the essential antiseptic constituents of thyme, eucalyptus, mentha and gaultheria, which enter into the composition of Listerine. The quality of excellence of the soap-stock which serves as the vehicle for this medication, will be readily apparent when used upon the most delicate skin, and upon the scalp.

Listerine "Dermatic" Soap contains no animal fats, and none but the very best vegetable oils enter into its composition; in its preparation unusual care is exercised, and as the antiseptic constituents of Listerine are incorporated with the Soap after it has received its surplus of unsaponified emollient oil, they retain their peculiar antiseptic virtues and fragrance.

A sample of Listerine Dermatic Soap may be had upon application to the Manufacturers—

Lambert Pharmacal Co., St. Louis, U. S. A.

Be assured of genuine Literature by purchasing an original Package.

The bone-forming and nerve-strengthening hypophosphites in Scott's Emulsion make it especially useful for young children. Scott's Emulsion contains nothing that children should not have and everything that they should.

We'll send you a sample free upon request.
