Family Reading.

FALSE EXCUSES.

"I COULD NOT GET READY IN TIME."—And unfortunately some persons never are ready; but when all the congregation are quietly listening, perhaps to the lesson, these happen to come up the aisle. From their never being in time for the confession of sins, one might think they had no sins to confess. There is one sin however which they have forgotten, and which should be acknowledged next Sunday, and that is, the disturbing the devotions of the congregation, and the serious interruption of the minister. What can be the reason they are so late invariably? Is it to attract attention? Clarity answers no, and puts the best construction on their lateness. They are perhaps thoughtless, but then they are not so thoughtless as to other things. They can reach the car before starting, and why not be in time for service. Is an engagement with man more important than one with God? Some one suggests that the evil would be cured by a change of hour; so it would, if the fault were in the time, but if service began at 12 o'clock, some would still be late. The sight of a person habitually late in church, reminds one of those virgins who did not fill their lamps in time, and hence sought entrance in vain. Sometimes lateness is unavoidable, and therefore excusable. In such case, "better late than never;" but even then, there will be no interruption, if you will pause at the door till the next change of posture.

"MY CLOTHES ARE NOT SUITABLE FOR CHURCH."—Then of course, you do not show yourself in any company, for if you do, your clothes are suitable for Church. To go to other places with the apparel you have and yet stay from Church, must be on the supposition that it is a kind of fair for the exhibition of finery, and each exhibitor a candidate for prizes. The Jews in public worship rent their garments, because of their sins; some of our people on the contrary, will not go to worship unless they have a bonnet or a coat just from the maker's hand, thereby showing that they regard the opinion of their neighbors more than the favor of their Maker. And, to make the absurdity more glaring, most of the congregation are engaged in worshipping God, not having come to notice whether clothes were old or new. There may, indeed, be some few triflers who come to make observations, but the smile or sneer of such will not affect any sensible person. Be neat in your dress, and you will be respected more for wearing clothes that are old, than for wearing new which you have not the means of paying for; and whether you please man or not you please God and your own conscience. This excuse which keeps you from Church, has its source in vanity, and when you know your own heart and the account to be given to God, you will experience no difficulty in this respect. Should you not have everything exactly as you wish, you will have what is more important, "the clothing of humility."

"HE MUST HAVE MEANT ME."—How do you know that the Minister meant you? Did he tell you so, or point his finger at you, or call you by name? No! but you are sure of it, and for the best of reasons: a guilty conscience accusingly said, "Thou art the man." Then your quarrel is with conscience, not with the Minister. A sermon is intended to warn against some sin, or excite to some duty. It is preached to all: if any have been guilty of the sin, or neglected the duty, it is designed for such. If they have not been guilty, it is no otherwise intended than to guard them against the temptation; but as the Minister cannot see the heart, the existence of any sin can be known only to conscience and to God. The Minister in God's name says "Thou shalt remember the Sabbath day to keep it holy," and "thou shalt not covet." Of course he means all covetous persons and Sabbath breakers, (for a sermon without meaning would be a waste of time), and if you have been guilty of these or any other sin, he certainly meant you, and your duty is to receive the reproof thankfully and to profit by it.—Church Journal.

WHAT TURKS ARE.—Christians are bad enough; but when we come to know the Turks, there is no doubt of their being much worse. Here is a specimen:—The Ramadan month has commenced. You are probably aware that all good Mussulmans refrain from eating and drinking, and even from smoking, during the thirty days, from sunrise to sunset. Just before sunset the pipe-bearers have the pipes filled, and the servants have the raki (spirit) and the dinners ready, so that immediately after the sun disappears they may make up for lost time. The night is spent in feasting and hard drinking at raki. The streets are full till after midnight. In some of the cafes a puppet-show exhibition is made for the amusement of the juveniles—not the innocent fun of Punch, but the most filthy, witless exhibitions that the mind of the most depraved could invent. The audience composed mostly of young boys, from four years of age to twelve or fifteen perhaps, and a few girls of ages rather less, enjoy the loosehouse exhibition intensely. They hail the hero of the play with shouts of applause, and are quite content and willing to explain to a stranger the plot of the infernal drama. The only amusing part is seeing the different children taken home by their papa's servants. "Master Hussein Bey" and "Master Mustafa" are called by name, and are taken out by the policemen at the doors, and handed over, to their infinite disgust. When the rising Turkish generation, male and female, are permitted to witness such vile demoralizing spectacles, it can hardly be expected that when they grow up they will be otherwise than conscienceless, shameless, debauchees, of the very worst description.—Cor. of Evening Journal.

THE UNKNOWN POWER OF FROST.—In the northern parts of Siberia mercury is sometimes frozen, and the frost must there reach a point represented by 40 degrees below zero of Fahrenheit's thermometer. Were such a destructive agent to operate during one of our winters England would become a desert, trees and

shrubs perish, and the ensuing spring call in vain for the return of flowers and foliage. But there are elements in nature which could produce, were they allowed to combine, a far more destructive cold than that which reduces the liquid quicksilver to a hard block of metal. The present arrangements of the Creator prevent the union of such powers, but chemists have produced an artificial combination of natural agents from which has ensued a cold of 91 degrees below zero, and 131 degrees below the freezing point. This fatal degree is caused by a union of two parts of sulphuric acid with one of snow. Now elements are around us which could, therefore, make winter capable of destroying all animal life in a month. A frost equal to 40 degrees below zero penetrates about two hundred yards into the ground, but cold of 91 degrees below the same point must penetrate to a far greater depth, turning the whole crust of the earth into a frozen mass. The consequence of such a degree of cold on the human body can scarcely be imagined; but one notion may be gained from the fact, that no metallic substance can be touched by the hand when the thermometer is 40 degrees below zero, without producing a burn like that caused by the grasping of a hot poker, so similar are the effects of extreme heat and extreme cold. To produce a disorganization in our globe there is but needed fresh distribution of the acids stored up in nature, but which are kept in their present safe arrangement by the agency of an all-wise God. The cold does, indeed, sometimes increase to the highest point of safety; but it never quite passes this line, being held like the ocean, within its appointed limits, and exhibiting through many seasons, a uniformity which attests the control of some invisible power. Thus in the severest winter in our latitude the frost does not penetrate into half that depth, as may be proved by placing a thermometer in the ground during a sharp frost. The waters of the seas around these islands tend to preserve it from the highest rigors of cold; for the temperature of the British Channel is even in the winter not below fifty degrees, and that of the German Ocean seldom lower than forty-two degrees of Fahrenheit. The vast stratum of air around Great Britain is therefore warmed by the Ocean in winter, and thus the cold is continually checked in its intensity.—Sharp's Magazine.

INTERMARRIAGES.—The Frederickburg News gives the following important facts, which are worthy of careful consideration. So sternly does the order of Providence set the seal of its disapprobation upon every thing which might tend to incest. In the country in which we were raised, for twenty generations back a certain family of wealth and respectability have intermarried, until there cannot be found among them a sound man or woman. One has sore eyes, another scrofula, a third is idiotic, a fourth blind, a fifth bandy-legged, a sixth with a head about the size of a turpin, with not one out of the number exempt from physical or mental defects of some kind. Yet this family perseveres to intermarry with each other, with these living monuments constantly before them.—Calendar.

A BEAUTIFUL ALLEGORY.—A traveller who spent some time in Turkey, relates a beautiful parable which was told him by a dervise, and which seemed even more beautiful than Sterne's celebrated figure of the accusing spirit and recording angel. "Every man," says the dervise, "has two angels, one on his right shoulder and another on his left. When he does anything good, the angel on his right shoulder writes it down and seals it, because what is done is done for ever. When he has done evil, the angel on the left shoulder writes it down. He waits till midnight. If before that time the man bows down his head and exclaims, 'Gracious Allah! I have sinned, forgive me!' the angel rubs it out; and if not at midnight he seals it, and the angel upon the right shoulder weeps."

THE SAILOR'S BIBLE.—After a recent heavy storm on the coast of Massachusetts, a sailor's chest, which had been swept from some wrecked vessel, was cast on shore, and opened by those who found it. A narrator says: "But we found a precious treasure in the sailor's chest. No diamond of Brazil—no gem of the western coast. So precious, yea, the price of it was above rubies. It was the Word of God. We were glad to see it. The sight of it sent a tide of pleasant thoughts through our hearts. If we knew not where the tempest had sent the body, we could not but hope this precious Bible had sent the spirit to a heavenly home. No name yet met our eyes. But these beautiful lines cut out of some book or periodical, were pasted on the fly-leaf: 'A parent's blessing on her son, Goes with this holy thing; The love that would retain the one, Must to the other cling. Remember 'tis no common toy, A mother's gift! remember, boy.' 'In company with the Bible, we found a daguerreotype of a lady—beyond description the mother of that son; the giver of that precious book. As we gazed on the placid features, we could not but think those beautiful lines were placed there by her whose image was now before us. Her own fond and pious heart had made this gift, and sought an expression of maternal love in these lines. A pious mother's blessing with such a gift!'"

GREAT FIG TREE.—The correspondent of the New York Observer speaking of his travels in Brazil, says: "In the morning we passed a celebrated Indian fig tree which has been described by almost all the travellers who have visited Brazil. Its branches stretch out 80 feet from the trunk, thus making the diameter of its shade at noonday 160 feet, and within that cool circumference of 480 feet, it is estimated that more than 4000 people can stand. The forests constantly assume a most luxuriant appearance, with their deep and light green verdure, with their thousands of flowering trees, and vines,

and gorgeous parasites. No pen can describe the beautiful flora of Brazil, and the pencil and canvass can but faintly portray and convey to one who has never seen the woods of this tropic region, the brilliancy and superb richness with which God has clothed it."

Colonial.

THE CHOLERA. The Hamilton Board of Health, in order to satisfy the anxiety manifested by the public in regard to the number of deaths occurring, have wisely resolved to publish, during the continuance of the sickly season, a daily statement of the mortality within the city, feeling satisfied that by the truth being made known the fears of many will to a great extent be allayed. By the table which they have just published, it appears that the total number of deaths in Hamilton during the first 15 days of July, has been 129, of which 96 were due to cholera and 33 to other causes. The greatest number of deaths from cholera on one day was on Tuesday the 11th, when they amounted to 19. On Thursday the number had diminished to 4.

MOHAWK INSTITUTION. The semi-annual examination of the pupils of this establishment took place on Saturday last. We regret that our absence on the occasion prevents our being able to give any very detailed account of the proceedings on the occasion; but we have been informed by parties who were present and on whose judgment we can rely, that the appearance of the children, their readiness with which they answered the various questions proposed to them on the subjects in which they were instructed, and the evident progress made by them since last examination, gave great satisfaction to those present, and reflected the highest credit on the parties who have the superintendance of the institution. There are now under instruction in the house forty Indian children, who are taught the usual branches of a sound English education, and at the same time carefully instructed in the principles of the Christian Religion. The institution is, as our readers are aware, under the care of the Rev. A. Nellis, the missionary of the New England Association to the Indians on the Grand River; the teaching department is conducted by Mr. C. R. Griffin, and the charge of the children as to their food &c. in the house is confided to Mr. A. Griffin.—Breadford Courier.

The receipts of the Grand Trunk Railway of Canada for the week ending 10th June, were £4,644 4s 2d., making for the half year ending that date, £76,907 8s 10 1/2d.—Globe. Mr. Sheriff Corbett's second son, who recently took his degree of M. D., has received the honourable and lucrative appointment of Physician on H. M. Provincial Mail Steamer "Charley."

THE CALENDAR OF THE UNIVERSITY OF TRINITY COLLEGE, TORONTO. FOR THE YEAR OF OUR LORD 1854. Price 1s. 10d. HENRY ROWSELL, Publisher, King Street, Toronto.

BOOKS JUST RECEIVED. Greeley's Treatise on Preaching 2 6 8 The History, Object, and Proper Observance of the Holy Season of Lent; by Kip 0 6 9 Christian Morals; by Rev. Wm. Sewall, M.D. 0 3 9 Mant on the Rubrics 0 3 9 Stories on the Church Catechism; by Mrs. Sherwood 0 3 9 The Pastor's Appeal to his Flock; on Confirmation, the Holy Communion, and Christian Life 0 4 7 The Children of the New Testament; by Stork 0 4 7 The Bible for the People; by Rev. Wm. M. F. 0 3 10 The Master of the Church; by Walner 0 3 10 Mrs. M. A. F. Little's Daughter; Sec. by Rev. Wm. M. F. 0 3 10 Our Little Comfort 0 3 11 Love's Lesson; by the author of "The Lucy;" 0 3 11 Love in the World; but not of the World; by Goss 0 3 11 Alice 0 3 11 The Pilgrim's Progress 0 1 10 4 For Sale by HENRY ROWSELL, Bookseller, Stationer, & Printer, King Street, Toronto. 37-1f

HAMILTON AND TORONTO. CALLING AT Wellington Square, Oakville and Credit. THE STEAMER CITY OF HAMILTON, WILL leave Hamilton every morning (Sunday excepted) at 7 o'clock, commencing on Monday next, the 10th instant. Returning, we leave Toronto at 5 P.M., calling at the above Ports going and returning, weather permitting. G. B. HOLLAND, Agent, Toronto, April 5, 1854.

A NEW CHURCH. A BAZAAR in aid of the fund for Building A CHURCH at the Falls of Niagara, C. W. will (D.V.) be held on August 1st, 2nd and 3rd, proximo, in the Village of Drummondville. Any Work will be thankfully received by Mrs. Ingles or Mrs. Murray. Drummondville, July 1854. 50-3in

AN INDEX TO THE STATUTES OF CANADA, FROM 3 & 4 Victoria to 12 & 13 Victoria, inclusive. 1840 to 1850. COMPRISING all the Acts passed and Repealed in Upper and Lower Canada, from the Union Act to the close of last Session, together with a CHRONOLOGICAL INDEX, showing the date of receiving the Royal Assent By JEMELIUS IRVING, BARRISTER-AT-LAW. Royal 8vo., Price ONE DOLLAR. Parties desirous to obtain copies of the above are requested to forward their names and addresses to the Publisher. The work can be sent through the Post, at the cost of three or four pence only, and will be mailed to any address on the receipt of One Dollar.—(Post-paid.) HENRY ROWSELL, Publisher, King Street, Toronto. January 12 1850.

GRADUATE of King's College, Fredericton, N. B., now studying for Holy Orders, is desirous of engaging himself with a clergyman of the Church of England, as Tutor to his sons, and would be happy to assist as Lay Reader in pursuit of his own studies. A situation with a private gentleman may not be objected to. For further particulars apply to A. B., box 217, Toronto. Toronto, Feb. 15th, 1854. 29

PROTECTION FROM LIGHTNING By Spratt's Patent Lightning Rods MANUFACTURED BY E. V. WILSON & H. PYPPER & BROTHER, 60, YONGE STREET.

THE Subscribers are the only authorized agents for the sale of these valuable rods in the Canadas. Manufactured and for sale, wholesale and retail, at their manufactory, 50 Yonge Street, Toronto. CAUTION.—Allow no man to protect your building without first examining the points of his rods; and if they have not the Platinum Wire in the point, they are not Genuine. The coating of the point is of a composition metal that never rusts, retaining its brightness for years; the wire is soft and can be cut with a knife, yet sufficiently hard not to melt under the influence of Electric fluids. Look out for Rods manufactured at St. George, C. W. They purport to be Spratt's Points and Rods, but are not. They are made of steel highly polished, but will become coated with rust after the first night's exposure to the atmosphere; consequently rendering them useless. Always ask for the agent's certificate, and be sure to notice the stamp, SPRATT'S IMPROVED POINTS, near the base. NOTICE.—No Policy of Insurance covers losses by lightning, unless burned down or set on fire. AGENTS WANTED. E. V. WILSON & H. PYPPER & BRO., 60, Yonge Street, Toronto, April 15, 1854. 38-6m.

THREE TIMES A WEEK TO ROCHESTER. CALLING AT Whitby, Oshawa, Darlington, Bond Head Port Hope and Cobourg. THE STEAMER MAPLE LEAF, CAPT. ROBERT KERR.

WILL until further notice (commencing on Saturday next, the 8th instant,) leave this Port for Rochester, every Tuesday, Thursday and Saturday morning at 10 o'clock precisely. Returning, will leave Rochester every Monday, Wednesday, and Friday morning at 9 o'clock, calling at the above Ports going and returning, weather permitting. G. B. HOLLAND, Royal Mail Steam Packet Office, Toronto, April 5, 1854. 37-1f

Circulating Library. THE LIBRARY formerly open for circulation under the management of HENRY ROWSELL, being about to be re-opened with considerable additions, by another party in Toronto, H. R. is desirous of making the sets of Books as perfect as possible. Many complete works as well as odd volumes, were missing at the time the Library closed, and some of them have not yet been returned to him. Any party who may have volumes in their possession, or know where any may be found, will confer a favor by informing H. Rowell of it. Of course no charge is intended to be made for the loan of the books. HENRY ROWSELL, Toronto, April 18, 1854. 38

Bells! Bells! Bells!!! For Churches, Academies, Factories, Steamboats, Plantations, &c., made, and a large assortment kept constantly on hand by the Subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose patterns and process of manufacture so perfected, that their Bells have a world wide celebrity for volume of sound and quality of tone. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to Bell Casting; which secures a perfect casting and even temper; and as an evidence hereof, that their Bells have a world wide celebrity for volume of sound and quality of tone.
