

LOOK AT THE SIZE of the ordinary pill. Think of all the trouble and disturbance that it causes you. Wouldn't you welcome something easier to take, and easier in its ways, if at the same time it did you more

good? That is the case with Dr. Pierce's Pleasant Pellets. They're the smallest in size, the mildest in action, but the most thorough and far-reaching in results. They follow nature's methods, and they give help that lasts. Constipation, Indigestion, Bilious Attacks, Sick and Bilious Headaches, and all derangements of the liver, stomach and bowels are promptly relieved and permanently cured.

"If we can't cure your Catarrh, no matter how bad your case or of how long standing, we'll pay you \$500 in cash." That is what is promised by the proprietors of Dr. Sage's Catarrh Remedy. Doesn't it prove, better than any words could, that this is a remedy that cures Catarrh? Costs only 50 cents

HOW TO GET WELL, KEEP WELL AND LIVE LONG

Dr. DANELSON'S COUNSELOR WITH RECIPES

A TRUSTY GUIDE FOR THE FAMILY

An illustrated book of nearly 800 pages, treating Physiology, Hygiene, Marriage, Medical Practice, etc. Describing all known diseases and ailments, and giving plain prescriptions for their cure with proper directions for home treatment.

The **RECIPES** are endorsed by eminent physicians and the medical press. Remedies are always given in a pleasant form, and the reasons for their use. It describes the best Washes, Liniments, Salves, Plasters, Infusions, Pills, Injections, Sprays, Syrups, Tonics, etc. These are valuable to the physician and nurse, making it a manual for reference.

The chapter upon **POISONS** is exhaustive and every poison appears in the index, so that the antidote can be readily and, if need be, hurriedly found.

18 pages upon **MARRIAGE** treat the subject historically, philosophically and physiologically. It should be read by everybody.

67 pages upon **HYGIENE** or the Preservation of Health; a chapter of inestimable value. "Everybody wishes to be healthy, and everybody when they think of it at any rate, wishes to avoid such things as might bring disease and suffering."

500 pages which follow present **MEDICAL TREATMENT** with Sensible and Scientific Methods of Cure.

Sent, postage paid, on receipt of \$1

OXFORD PUBLISHING COMPANY,

5 Jordan Street, Toronto.

The High Speed Family Knitter

Will knit a stocking heel and toe in ten minutes. Will knit everything required in the household from homespun or factory. Coarser or fine yarn. The most practical knitter on the market. A child can operate it. Strong, Durable, Simple, Rapid. Satisfaction guaranteed or no pay. Agents wanted. For particulars and sample work, address, Carden & Gearhart, Dundas, Ont., Canada.

FAT FOLKS
using "Anti-Corpulence Pills" lose 15 lb in 1 month. They cause no sickness, contain no poison and never fail. Sold by Druggists everywhere or sent by mail. Particulars (enclosed) 4c. **WILCOX, BRIDGES & CO.,** Falls, Pa.

SCIENTIFIC AND SANITARY.

Starch of the lower qualities is now successfully and profitably bleached by electricity.

A 2,000 candle-power arc lamp has been erected on the obelisk in St. George's Circus, London.

A chemical company has ordered a large generator for use in the manufacture of bleaching powders, the amperage to be equal to affording sufficient heat to decompose common salt, from which chlorine is obtained.

Messrs. Sarasin and De la Rive read a paper before the French Academy of Science showing that the velocity of propagation of electrical waves was the same in the air and conducting wires. The experiments were made in a very large hall in Geneva, with the aid of very large metallic surfaces, and by the method of interferences. They also proved that a circular resonator has a constant wave length independent of the dimensions of the oscillator, the intensity of oscillation alone varying. The quarter of a wave length of a circular resonator is very nearly equal to twice its diameter. A short description of their experiments may be found in *L'Electricien*, January 21.—*Electrical World*, February 18.

The Sydney correspondent of the Western Daily Mercury states that H.M.S. Curacoa arrived there from Samoa and the Polynesian Islands, having been absent about six months. While passing through the Yandi waters she struck on an unknown rock, but, fortunately, without any serious consequences. The spot where she struck is marked on the chart as having twelve fathoms of water. Thanks to the rising tide, she was got off the rock in about an hour's time, and an examination of her bottom by the ship's divers showed that, beyond the tearing off of a sheet or two of copper, no damage had been sustained. The ship was afterwards anchored near by and a survey of the spot made.

The report of Mr. G. J. Symons, F. R. S., on the rainfall of 1892, shows that it was an average quantity, without exceptional wet anywhere. The rainfall of August was generally above the average; but in September it was excessive in the Lake regions and in the West of Scotland. The records, however, show the same old fact against those who foretell the weather: at Seathwaite, Cumberland, a total fall of 129.5 inches was registered, and only 20.72 inches at Winslow, Bucks. In Mr. Symon's list there are more minus than plus marks, the greatest excess in England being at Bury St. Edmunds. The rainfall was very heavy in the eastern counties during October; but the weather prophets did not foretell that. The planets do not seem to have much control over the weather even in a little place like England, while they appear to be in regular opposition to the almanack prophets, and in conjunction with those who laugh at the efforts of the vaticinators.—*English Mechanic*.

An enlightened Bengali, Babu Govind Chandra Laha, has contributed fifteen thousand rupees towards the expenses of the proposed snake laboratory at Calcutta. We may expect, therefore, that the institution will soon be in full working order. According to the Pioneer Mail, two main lines of research will be followed in the laboratory. So-called cures for snake-bites will be tested under strictly scientific conditions, and the properties of the snake poison as such will be investigated. The laboratory will be the only institution of its kind in the world, and the Committee of the Calcutta Zoological Gardens, who have taken the matter in hand, expect that it will be largely resorted to by the scientific inquirers who visit India during cold weather. In accordance with the practice of scientific laboratories in Europe, a charge will be made for the use of the tablets and instruments at a rate sufficient to cover working expenses. Work done on behalf of the Government will also be charged for according to a regular scale.—*Nature*.

Pianos

For Catalogue etc., address

The Bell Organ & Piano Co., Ltd.
GUELPH, ONT.

MONSARRAT HOUSE

1, CLASSIC AVE., TORONTO.
BOARDING AND DAY SCHOOL FOR YOUNG LADIES
MISS VENNOR, PRINCIPAL

(Late Trebovir House, London, Eng.)
