

Income is average annual family income in constant 1980 dollars.
 Each \$ = \$2,500 of average annual income.

- Above average population growth
- Below average population growth

MONEY AND MIGRATION

The 1970s were a golden decade for Alberta, British Columbia, the Yukon and the Northwest Territories. As their economies boomed a great many Canadians in other provinces moved west. The growth slowed down in the early eighties but the trend remains intact.

CANADA
 Population: 24,343,181
 Income: \$24,450
