Export Contact: Mr. Paul Rodrigues, President

Euro-Care Furniture Limited was founded in 1991 and is owned and operated by skilled European craftsmen. The five partners have a combined total of 139 years experience in the furniture industry, and 56 years experience in the specialized healthcare furniture industry.

Euro-Care's expertise rests on construction of wood-based case goods designed for healthcare installation. Highly specialized seating and tables for the patient and/or visitor round out the company's line of fine furniture. Customizing is another option that with drawings and specifications can be achieved. State-of-the-art finishing with catalytic lacquers and inherently flame retardant polyurethane foams assure the end user of the finest responsible and highest quality available.

Currently, Euro-Care distributes its products in Canada to clinics, hospitals, and nursing/personal care homes where special needs furnishings are a must. Euro-Care is particularly interested in expanding sales to the United States. Through broadened distribution, the company expects to increase its share in the healthcare market. The company prefers to distribute its products through agents and representatives.
