

There are times **WHEN** children seem not to be quite up to par, then it is that the watchful parent is doubtful as to the seriousness of the symptoms, and naturally the question arises as to whether it be wise **TO SEND** for medical advice. To have the answer to this query always at hand in the simplest and most untechnical manner possible, and yet with sound scientific caution, a little book has been written **FOR** fathers, mothers, and teachers. It is planned differently from all other books in the field. It is the result of both medical and psychological experience gained in clinical and general practice. The book tells when not to send for **THE DOCTOR** and exactly when to do so. It catalogues the simple, every-day, well-known ailments by their common names, tells how to treat them, and sharply marks them off from the serious diseases demanding a doctor's advice. When an emergency arises it tells you

What to Do Before the Doctor Comes

When to Send for the Doctor
And What to Do Before the Doctor Comes

By DR. F. E. LIPPERT and DR. ARTHUR HOLMES. Sixteen full-page illustrations and frontispiece in color. 12mo. Cloth, \$1.25 net. Postpaid, \$1.37.

"The best book of its kind which I have ever seen."—Mrs. Mary I. Wood, Manager, General Federation of Women's Clubs.
