A Ten-Day Tube of Pepsodent to show you its effects. See coupon.

Learn the Cause of Decay

Dental science has now traced most tooth troubles to a film. To that slimy film which you can feel.

That is what discolors—not the teeth. It is the basis of tartar, it holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

The film is clinging. It enters crevices and stays. No ordinary tooth paste can dissolve it. It is a soapy tooth paste makes it more viscous.

So, despite your brushing, much film stays. Night and day it does its damage. It is the great tooth wrecker.

Science now has found a way to combat that film. The fact has been proved by many clinical tests. The method is now advocated by leading dentists everywhere.

For daily use it is embodied in a dentifrice called Pepsodent. And we are mailing 10-Day Tubes so that every home may try it.

Do This and See

We urge you for your own sake to write for this 10-Day Tube. See the results for yourself.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it.

Pepsin must be activated, and science has discovered a harmless activating method. The usual method is an acid, harmful to the teeth, so pepsin long seemed impossible. Now everyone may apply it, morning, noon and night. And the evidence is that this invention brings a new dental era.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears.

Compare results with the methods you use now. Then judge for yourself what is best. Cut out the coupon now.

Look in 10 Days

Note how the teeth glisten. You can see that the film is gone.

MUCH DONE IN QUIET WAY BY S. P. C. IN YEAR

Annual Meeting Being Held
This Afternoon

A Lot Accomplished That
Cannot Be Detailed—Re-
gret at Death of R. W. W.
Frink—Reports from Several
Branches.

The thirty-ninth annual meeting of the Society for the Prevention of Cruelty to Animals is being held this afternoon. Reports of interest were presented in which chief interest centered locally in that of S. M. Wetmore, secretary, who gave a comprehensive review of the work of the year. He told of cases of cruelty checked, referred to the loss the society had sustained in the death of R. W. W. Frink, and gave praise to those who have assisted in the success attending the efforts of the society. The meeting is being held in the rooms of the provincial government, Prince William street.

Secretary's Report.
The annual report of S. M. Wetmore, secretary, was as follows:
In submitting the thirty-ninth annual report of the work of the society for the year past, while I cannot report any new work accomplished, may say that quite a large amount of work has been done in a quiet way. One cannot enter into all the details of the society's operations, or give any adequate idea of the care, patience and judgment which our work demands. We take as few cases as possible into court and when we can get any good results without resort to law, we strive for success in that way. There is so much of cruelty due to want of knowledge, to lack of appreciation of the nature and instinct of animals, to custom or fashion, that all offenders do not err alike, all of which calls for care, judgment and good temper, which I strive to follow out as best I can, and hope good results have been obtained. To do justice to this work it really needs a person's whole time, which as you are all aware I am not able to give, owing to the many other duties I have on hand, but I always strive to give this part of my work all the attention I possibly can, and in any urgent cases have laid all other work aside when it requires immediate attention, and at times when I find it impossible to go, I have only to call upon the chief of police or any of his officers (in any case in the city) when they will at once act for me.

Ever since I have acted as agent of this society I have always found the city and county police officers ever willing to assist us in our work, and they not only have reported many cases of cruelty but have acted on the spot. We miss very much the valuable aid and assistance given to our work by ex-County Officer J. H. Saunders on the Loch Lomond and Marsh roads and other parts of the county districts, where many persons through Mr. Saunders have been brought to court and fined for their cruel ill-treatment and over-driving of horses and other animals. For the past year there has not been any other

officer appointed in his place in that section of the county.

Cruelty Punished.

Speaking generally of our work, I think it can be said to be fairly good, and if we do not solve all the difficult problems which come up we manage to do some good, and we appreciate very much the assistance given us by the ladies and gentlemen who do so much for us for the pure love of doing good. One case of cruelty I might mention which caused several trips to Annapolis, and quite a bill of expenses was that of a horse being ill-treated and over-worked by its owner, a man from Cornhill, Kings county. Several people at Annapolis, seeing the condition of this horse, applied to Newton De Bo, a justice of the peace there, to take the horse away from its owner to protect it from further cruelty, which he did at once, and placed the animal in care of Mrs. Frank Smith of Annapolis. Word was then sent to me and I, with our veterinary, Dr. George R. Bowyer, went to Annapolis and found the action of Mr. De Bo was fully justified, as we found the horse totally unfit for the work it had been compelled to do by its owner, and the horse was old, lame, and had several sores and bruises on its body and legs. We then left the horse in charge of Mr. Smith. After giving the said animal a rest cure and good care for about a month, our veterinary said it had improved so much that it was fit for light work. The owner failing to meet us after being given due notice, by direction of our solicitor, J. King Kelley, K. C., offered the horse for sale by public auction at Annapolis, and the former owner of the horse was, we were informed, would give it the care and attention it required. Later the former owner of the horse was brought before Police Magistrate H. W. Polkin, of Sussex, and was fined \$25. While this case meant quite an expense to the society, I feel it will have a good effect throughout the province, in fact, seeing the posters sent out announcing the sale of the horse by public auction, we are so pleased to know that we had such power in cases of this kind that she sent letters expressing her appreciation and how pleased she and others were in what we had done, also enclosing \$5 to assist us in our expenses. This shows that this case was pretty well known throughout the province, and will have its good effect.

Loss of Mr. Frink.

Since our last annual meeting we have met with a very great loss in the death of R. W. W. Frink, who was elected as president at the annual meeting of Feb. 21, 1914. Mr. Frink took a very deep interest in the work of the society. He was regular in attendance at all its meetings, and always ready and willing to assist me in any way to suppress acts of cruelty. In many of my calls out of the city he went with me, and his good judgment was of great value to me in my work. Always on the alert during his walks around the city for any acts of cruelty, he acted at once whenever he noticed any. Personally I have met with a very great loss by his death as he was always so willing to act or advise me in any matters pertaining to my work, and in any way to relieve the sufferings of our dumb animals.

Our president, D. Carleton Clinch, is taking a very active part in the work of the society, and his knowledge of the horse and how it should be treated, is a very great assistance to us in our work. Every one knows him to be a thorough and competent judge of a horse, and other animals, and I feel we were very fortunate in getting Mr. Clinch as our presiding officer.

Words of Praise.

Our very best thanks are due to the ladies who have established the Animal Rescue League who are doing so much for the comforts of the dogs and cats. I have had many calls from people who

in cases where they wish to have their dogs or cats either cared for while they are away or in cases of old or disabled ones to have them humanely destroyed, and have only to report it to the league when they at once attend to it. They also, when called upon, will send for any deserted or injured cats and dogs, and if found to be suffering or unfit for further use, will humanely destroy them. By this means very many stray or deserted dogs and cats are saved much suffering.

I wish to extend my very best thanks to J. King Kelley for his valuable advice given me in my work, also to the members of the S. P. C., and particularly the case referred to at Annapolis, he having spent a whole day there. I wish to thank Mr. G. R. Bowyer, V. S., for his valuable advice, and for the many times he has examined horses for me. I have always found him ready and willing to assist us in any way he can in this work.

To the chief of police and his officers I wish to extend my very best thanks for the great help they have given me in my work. Always ready and willing to render any assistance they can to suppress suffering and for many cases in which they acted for me when I could not be reached, or when out of the city.

Respectfully submitted,
S. M. WETMORE,
Secretary.

Fredericton.

The report from Fredericton follows:
To the President, other officers and members of The S. P. C., Saint John:
Ladies and Gentlemen:
It is my duty to present the annual report of the Fredericton Branch, and I shall be brief.

A review of the year 1919 reveals much the same activities as former years. The report from branches were as follows:
Reports from branches were as follows:
F. M. Thompson for Hillsboro wrote: "I am very glad to be able to report to you that during 1919 there was little evidence in this county of cruelty to dumb animals. There was one case, however, which came under my sight of the cruel whipping of a horse. I found it necessary to lay an information before Magistrate Blight against the

and I am pleased to be able to assure you that our society continues in a useful and prosperous career.

At our recent annual meeting the secretary-treasurer, Miss Jeanette Beverly, who is one of the pillars of our organization, was able to report the fact that in excellent shape, all bills paid and a credit balance in the bank of \$179.89. Our revenue during the year was \$308.61 and expenditure \$128.72. Our membership keeps up to the average, and our agent, James Roberts, was active during the year. Unfortunately, he is now laid aside by an illness that is likely to permanently unfit him for further duty, but we have been fortunate in securing as his successor William Hughes, a gentleman who, we feel sure, will make good.

Following are the officers for the current year:—President, L. C. MacNutt; vice-president, Mrs. A. V. Rowan; secretary-treasurer, Miss Jeanette Beverly; solicitor, J. J. P. Winslow; veterinary, Dr. G. C. McCoy; agent, William Hughes; executive committee, Mrs. L. C. MacNutt, Mrs. W. P. Keenan, Mrs. A. V. Rowan, Mrs. W. C. Crockett, Miss Edith Gregory, Mrs. C. K. Palmer, Rev. J. S. Sutcliffe, J. W. Spurdin, J. H. Fleming, G. N. C. Hawkins, Geo. A. Taylor, and Dr. G. C. McCoy.

In conclusion I desire to express the regret which the members of our society feel at the lamented death of your president, Frink, whom I was glad to count my personal friend for many years. Wishing you continued success,
Yours very truly,
L. C. MACNUTT,
Pres. F'lon Branch.

Fredericton, Feb. 6th, 1920.

The balance sheet from Fredericton for the year ending December 31st, 1919, was:—

Cats destroyed.....6
Total.....20

Children and others:—

Children ill-treated.....17
Children neglected.....9
Women neglected.....9
Women ill-treated.....6

Total.....49

Cases taken to court included in above:—

Ill-treating and over-driving horse, one, fined \$50.
Ill-treating and over-working horse, one, fined \$25.
Ill-treating and injuring horses, three, fined \$1 each and one week in jail.

Ill-treating horse, one, admonished by court.

Total, six.

Branch Reports.

Reports from branches were as follows:

F. M. Thompson for Hillsboro wrote: "I am very glad to be able to report to you that during 1919 there was little evidence in this county of cruelty to dumb animals. There was one case, however, which came under my sight of the cruel whipping of a horse. I found it necessary to lay an information before Magistrate Blight against the

ZAM-BUK

This illustrates but one of the many uses to which Zam-Buk, the great herbal balm, is daily put. Accidents will happen, especially where there are children. Mothers should never be without Zam-Buk. Zam-Buk is the best "First Aid." Its strong antiseptic properties kill all germs, preventing blood-poisoning and inflammation. Its rich, herbal essences quickly ease pain and build up new healthy tissue. Zam-Buk is entirely different from all other ointments. It is purely herbal and contains no poisonous coloring matter. Take no substitute. See the name on every box before paying.

ZAM-BUK HEALS SEVERE CUT
Mrs. J. E. Blawie of Canfield, Sask., writes: "My little son cut the end of his finger. As it was such a severe cut, I was going to take him to a doctor, but in the meantime to ease the pain, I applied some Zam-Buk. This stopped the bleeding and gave him much relief that he ceased crying and seemed quite at ease. I therefore decided to see if Zam-Buk would heal the wound. Next day I replaced the dressing, and continued to do so each day, using nothing but Zam-Buk. Complete cure resulted."

YOUR HOME NEEDS IT!

THE FIFTIETH ANNIVERSARY

Just fifty years ago this winter Dr. Pierce gave to the world his famous "Favorite Prescription" for the distressing weaknesses and complaints of women. For many years he had been in the active practice of medicine and his specialty was the diseases of women. Later he desired to give this to the public, and he received a trademark protection from the United States patent office for this medicine, which is an herbal, "temperance" prescription with all the ingredients printed on the bottle wrapper. In his every day practice in the early days he also used a tonic and alternative for the blood, which was so universally beneficial that he determined to place this medicine in the drug stores of the United States and Canada where it could be readily procured. This he called his "Golden Medical Discovery," which he had prescribed many years for the stomach, liver and blood. Both these medicines met with instant success, and during the past half century have sold in greater quantities than any other proprietary medicines. Neither of Dr. Pierce's medicines contain alcohol and both are herbal extracts of native medicinal plants. For the past fifty years forty-eight million bottles have been used by the American public, and they are today the standard tonics for men and women. They are now put up in tablet as well as liquid form, and sold by every druggist in the land. A trial package can be obtained by sending 10 cents to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y. Write Dr. Pierce if you want free confidential medical advice. All Dr. Pierce's medicines are made at branch Laboratory in Bridgeburg, Ont.

Young man responsible for the cruelty, and a fine of \$10 was imposed upon him, which he paid, and I think has been taught a salutary lesson.

A report was made to me in December of a wounded moose lying by the roadside in the lower end of the county. I was in doubt as to my jurisdiction in the case of a wild animal, but got in communication with the Hon. Dr. Smith, who advised what was to be done. Beyond this I am glad to report that no other cases of cruelty came to my attention.

"I am not sure that I will be able to be with you on the occasion of your annual meeting on the 17th inst. inasmuch as I shall feel obliged if you will come all right, as it was pitiable to see the poor horse having to travel in that condition."

I feel that the society is always doing a good, and noble work, though we may not always see and know the results at the time. I have not yet been able to form a branch here, as there are so few in number but I have secured a new member, Mrs. Jack Wathen, and were not taking proper care of their animals and they have done differently. One man was keeping his horse in a wretched place, where the snow came in and I am sure the animal would have frozen this cold weather. It was reported to me. I saw the thing and had him fix a proper place for it where it has been comfortable. Another young fellow was driving his horse with some iron wires with its foot. After I spoke to him about it he got something to relieve it and is resting the horse. It is much better and I am hoping it will come all right, as it was pitiable to see the poor horse having to travel in that condition."

I feel that the society is always doing a good, and noble work, though we may not always see and know the results at the time. I have not yet been able to form a branch here, as there are so few in number but I have secured a

Abbey's SALT

Acts Like Fresh Fruit

Keeps You Healthy

For over a quarter of a century, Abbey's Salt has been keeping people well who are well, and helping those, who are in poor health, to be better.

Abbey's Salt is a blood purifier—a tonic—a laxative—a kidney regulator. Its beneficial effects are felt on every organ of the body. It cleanses and purifies the whole system. It invigorates mind and body. It quickly relieves such distressing troubles as attacks of Biliousness, Indigestion, Headaches and Pain in the Back; and effectively prevents more serious ailments.

Try this pleasant way of keeping well. Get a bottle of Abbey's Salt and take a glass every morning before breakfast.
