RECENT DEATHS

Friends of Mr. and Mrs. Louis Devine will regret to hear of the death of their little son, Arthur Lorne Devine, at the age of three and one-half months. The child died yesterday at a home of his parents, Acadia street.

After an illness of about two months, Percy F. Ellingwood, eldest son of Albert and Catherine Ellingwood, died at the home of his parents, 18 Camden street, yesterday morning, at the age of eighteen years. In addition to his parents, he is survived by five brothers and one sister. The funeral will take place tomorrow afternoon.

A telegram received on Thursday evening by Mrs. Edgar Archibald contained the news of the death of her brother, George Frederick Lovett, at Melrose (Mass.), where he had resided for many years. He formerly belonged to this city and was the son of the late George L. and Olivia S. Lovett. The announcement came as a great shock, as previously no word had been received of his illness. One son and one daughter, and one sister, Mrs. Archibald, survive.

Mrs. Edgar Archibald, of this city on Thursday received the sad news of the death of her brother, George Frederick Lovett, at Melrose, Mass. He was formerly of this city, and leaves, besides his sister, one son and one daughter.

Thin Folks Who Would Be Fat Increase in Weight Ten Pounds or More

A Physician's Advice. 'T'd certainly give most anything to be able to fat up a few pounds and stay that way,' declares every excessively thin man or woman. Such result is not impossible, despite past failures. Thin people are victims of mal-nutrition, a condition which prevents the fatty elements of food from being taken up by the blood as they are when the powers of nutrition are normal. Instead of getting into the blood, all the fat and flesh producing elements stay in the intestines until they pass from the body as waste.

To correct this condition and to produce a healthy, normal amount of fat the nutritive processes must be artificially supplied with the power which nature has denied them. This can best be accomplished by eating a Sargol tablet with every meal. Sargol is a scientific combination of six of the best strength-giving, fat-producing elements known to the medical profession. Taken with meals, it mixes with the food and turns the sugars and starches into rich, ripe nourishment for the tissues and blood, and its rapid effect is remarkable. Reported gains of from ten to twenty-five pounds in a single month are by no means infrequent. Yet its action is perfectly natural and absolutely harmless. Sargol is sold by good druggists everywhere and every package contains a guarantee of weight increase or money back.

Caution—While Sargol has produced remarkable results in the treatment of nervous indigestion and general stomach disorders, it should not, owing to its remarkable flesh producing effect, be used by those who are not willing to increase their weight ten pounds or more.
