The Corn Exchange of Montreal composed of men of both politica parties who, as a purely mercantile organization are above mere politics altogether. At their pecent meeting they discussed the operation of the Tariff of Breadstuffs and adopted a report which the Bread-taxing Conservatives will say very little about. One portion of it is as follows :--

According to official statements publish ed in the Canada Gazette, there is a ver-large and accumulating surplus in the De minion Exchequer; and it seems clear that the tariff of 1879 is bringing in more money than the expenditures of the Gov-erument call for. There are rumors, also, to the effect that the Minister of Finance may propose, at next session of Parlia t. to repeal the duties on tea an ment, to repeal the duties on tea as coffee; but, while that would be a popul change, it might be considered whether it would not be better to put breadstuffs or would not be better to put breatstus on the free list again. The duties of 50c. per barrel on flour and 15c, per bushel on wheat are not equable. Shipment of United States wheat, in bond, through Canada to European ports, was expected to remove an obstacle to trade in that article; and the "grinding in bond" arrange ment was intended to give Canadian Mil lers the benefit of manufacturing a particular kind of flour for exportation; so tha any disadvantage that might arise from the unequal duties on wheat and flou might be obviated. But this result he might be obviated. But this result in not been attained; for an opinion is gain might strength that the "grading in bond arrangement has been construed to mean that the bond for United States whea as the loss of revenue. The committee has no direct information on the subject, but enough has been said an but enough has been said among product merchants on change to justify refere.ce-to it, for so loose an interpretation of th-bond would be injurious to the revenue and unjust to the trade, by giving a monopoly of a desirable kind of flour to the larger millers. If there are difficulties in the way of carrying out the law in its true intent and meaning, the best plan would probably be to abolish the dutter based on the state of the state o

on breadstuffs altogether, and thereby place the whole upon an equal footing, as regards the import and export of breadstuffs—a condition which does not exist at present. Perhaps Sir Leonard will call in some illers who are interested in the 'grinding in bond" and grinding the poor swindle to justify his bread-taxing policy. It is, however, possible that he

may be compelled to relieve us of the bread tax. 100 The Winter Port Question.
