BACKYARD GARDENS.

Every citizen can render service in the production of foodstuffs. Even in the heart of populous cities something can frequently be done. Cellars and roofs have been utilized for this purpose in New York. One fact worth bearing in mind is that every ounce of needed produce grown is so much added to the wealth of the country. If some part of the energy of every householder in Canada were bent upon producing something eatable, no matter how small, thousands of tons of valuable produce would be forthcoming, all of which whether consumed in the household or not, would help to make available for use in other ways on equal quantity and would aid in modifying the cost of living. Last year considerable progress was made in the appropriation of seemingly waste land in towns and cities to useful purposes. Considerable success was achieved and this year it is not to be doubted the experiment will be extended with greater results. In fact in many centres plans made last fall or during the winter are already being carried out.

Germany has laid down utilization of the land, every foot of land, as one of her first principles. Every inch of land, according to the Teutonic proclamation, that is not used is so much of the country's resources wasted. France has adopted a regulation to the effect that every bit of space must be used for production; failing this being done by the owner the state is to take possession. Britain has given orders that golf courses and all meadow land are to be used for grazing purposes, and that previous pastures are to be put down in crops. Private parks are also being wooded out and the land devoted to practical agriculture. A campaign is being conducted, having for its object the utilization of backyard gardens and all manner of vacant land. Thus the chief belligerents are setting the world an example in production and thrift that Canada would be wise to profit by as widely as possible, and that municipalities and public bodies should do their utmost to encourage.

Scores of reports of the operations carried on in the season of 1915 by small householders speak of produce being grown worth from twenty-five to fifty dollars, every dollar of which meant so much added to the wealth of the country as well as saved in the cost of living. Financial profit is not the only gain forthcoming. Lessons of industry and thrift are inculcated and the whole household, from the oldest to the youngest, come under the influence of those qualities. They also have the gratification of eating fresh vegetables, the enjoyment of which is tremendously enhanced by the proud knowledge that they are home grown. What the families cannot eat themselves they have the pleasure of giving or selling to their neighbors or sending to some charity. It is hard to imagine any greater or more enduring satisfaction than a household in modest circumstances can experience than that to be derived as the reward of loving industry in a backyard garden.

Lovers of drama are sure to welcome this play.

School Matters Discussed.

A special meeting of the School Board was held last night to discuss the high and public school inspectors' reports. It was suggested that any shortage in supplies in either school be attended to at once. The question of water supply for the Dufferin Ward school was left in abeyance until the commission decided upon the mains on Victoria street. In Victoria Ward the mains pass the school, and the Contingent Committee were instructed to get an estimate and report on cost of water and sewerage for that school. Messrs. McCallum, McNeely and the Chairman were appointed a committee to prepare a programme for Empire Day. The high school inspector's report was considered satisfactory for this year only, certain accessories to be provided, but a new school is imperative if Carleton Place is to remain on the list. This phase of the report is to be considered later.

THE BEST MEDICINE FOR THE BABY.

The best medicine for the baby is the one that never fails to cure and which, at the same time, the mother may give with perfect assurance that it is absolutely safe. Such a medicine is Baby's Own Tablets. They are the only medicine absolutely guaranteed entirely free from injurious drugs and what is more they never fail to free the baby from those minor ills of babyhood and childhood. Once a mother has used them she would use no other medicine. They regulate the stomach and bowels; drive out constipation; expel worms and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.
