

FIFTY DOLLARS SPENT FOR MY SHINGLES ADDS \$500.00 TO THE VALUE OF ANY HOUSE OR BARN

ANY building good enough to be roofed right is too good by far to be roofed with wooden shingles. No building worth carrying fire insurance on deserves any roof less good than "Oshawa" Galvanized Steel Shingles. Simply because—

"Oshawa" Shingles, of 28-gauge semi-hardened sheet steel, make the only roof that absolutely and actually will be a good roof for a hundred years. If any "Oshawa"-shingled roof shows the least sign of leaking in twenty-five years, this company will replace that roof with a new roof, free. That's the kind of a written guarantee you get when you buy "Oshawa" Shingles—and there's \$250,000 back of the guarantee.

Thousands of "Oshawa"-shingled roofs cover farm buildings, residences, public edifices, churches, all over Canada. They make a roof

handsome enough for any building whatever—and it is the most practical of roofs—for the simple reason that an "Oshawa"-shingled roof can NOT leak.

It can't leak because, to start with, it is made of extra-heavy, extra-tough steel, special galvanized. The galvanizing makes these shingles wholly proof against rust—and rust is the only enemy steel has when it's used for roofing. That Pedlar process galvanizing makes it needless to paint

an "Oshawa"-shingled roof. Long years of weather-wear won't show on these shingles. That one item of paint saved—of the need for painting entirely done away with—saves you the cost of an "Oshawa"-shingled roof in the first few years it's on any of your buildings. And just remember—it will be a good roof for a hundred years.

Such a roof is not only rain-proof, snow-proof, and fire-proof, but it is wind-proof. It makes any building it covers warmer in winter and cooler in summer—because—

The Pedlar four-way-lock—every shingle locked to adjoining shingles underneath, on all four sides—makes an "Oshawa"-shingled roof

G. A. Pedlar.

practically one solid sheet of steel, without a crevice or a crack.

**"OSHAWA"
GALVANIZED STEEL
SHINGLES**

A new roof for nothing if they leak by 1934

That keeps out the slightest suspicion of moisture—it keeps out the winter winds and keeps in the warmth—and in summer it wards off the sun's rays—won't let them get through.

And "Oshawa"-shingled roofs are fire-proof—as a matter of course. How could you set fire to a roof of solid sheet steel? The fire-insurance people will make lower rates on a building protected by "Oshawa" Galvanized Steel Shingles. That saving alone will pay for the roof within ten years.

Some think a corrugated iron roof is fire-proof and about as good as an "Oshawa"-shingled roof. That isn't so. We make corrugated iron roofing—and it's all right, for its kind. Nobody makes any better. But corrugated iron isn't the roof for a farm building—nor for any building that is meant to stand a long while. It is a good enough roof for structures that are meant to last only a few years—

but only "Oshawa" Shingles are sure to last a hundred years and are good for a century.

Another thing about these shingles—They make a building lightning-proof—insulate it far better than any lightning-rod system ever could. Last year lightning destroyed over half a million dollars' worth of farm property. Not a cent of that loss could have happened if the buildings that were struck had been roofed right, which means roofed with "Oshawa" Galvanized Steel Shingles.

Maybe you think the first cost of these shingles is so high as to outweigh all the savings they make and all the merits they have? Would it surprise you to know that you can "Oshawa"-shingle any roof for \$4.50 a square. (A "square" means 100 square feet—an area 10 by 10 feet.

Just about the price of Al cedar or cypress shingles—and they'll be rotted to dust before even the first ten years of the Pedlar guarantee have passed. An "Oshawa"-shingled roof will outlast ten wood-shingled roofs—and be a better roof every minute of the time, in every way a roof ought to be good.

Anybody can put on these shingles—a hammer and a tinner's shears are all the tools necessary. It is impossible to

get them on wrong—you'll see why when you send for a sample shingle and a book about "Roofing Right." Suppose you send for the book and the sample to-day—now. It will pay you to get at the real facts about the right roof.

Pedlar products include every kind of sheet metal building materials—too many items to even mention here. You can have a catalog—estimate—prices—advice—just for the asking. We'd like especially to interest you in our Art Steel Ceilings and Side Walls—they are a revelation to many people. More than 3,000 designs. May we send you booklet and pictures of some of them?
