# CAMP COFFEE

'Camp' steaming hot gives the maximum of pleasure, vigour and satisfaction at the minimum of cost, time and trouble

Try 'CAMP' to-day!

Simply 'Camp'—boiling water—sugar and milk to taste—you can't go wrong!

Of all Stores.

R. PATERSON & SONS,  
COFFEE SPECIALISTS, GLASGOW

## DO YOU HEAR WELL?

We agree to make you hear ordinary conversation, providing you can still hear thunder.

We wish you to see a new electrically sensitized hearing device called the Electrophone, that instantly causes even the deafest people to hear clearly.

The very best result we can promise you as a reward for using the Electrophone is the complete, lasting restoration of your hearing.

Next to that in importance is the certainty that the moment you apply this marvellous little instrument you will be able to hear clearly and distinctly, either in public or in private.

This scientific electrical sound-conducting instrument fits snugly over the ear, as shown in cut. Its purpose is to magnify sound waves and throw them directly on the ear drum in a manner according to nature. The result is your deaf ear is exercised just as well ears are, and after a while most people find their hearing has become as good as ever. Meanwhile, however, with the Electrophone attached you can hear even the faintest sound without strain, effort or embarrassment, and your pleasure is vastly increased by the assurance that no harm is being done, as is the case with artificial ear drums, trumpets etc., that poison and ruin the ears of all who use them. Come and test the Electrophone free. We agree to make you hear.

You will receive courteous attention and not be urged to purchase. We would advise, however, that when you have tried an Electrophone exactly suited to your degree of deafness, you pay a deposit on it and try it at home. Those who cannot call should write for our free illustrated booklet and list of satisfied users of the Electrophone.

SENT ON TRIAL ANYWHERE IN CANADA  
Remember, the Electrophone will open up a new world to you. Perhaps you are only looking for temporary relief, but you will find that it will do much more. The Electrophone gradually restores the natural hearing.

We satisfy 99 per cent. of our patrons, because we sell all instruments subject to one full month's trial. Free trial to all who call. Free booklet to all who write.

## Hints for the Housewife.

### Faithful Soldiers.

Be thou faithful, Christian soldier,  
faithful till thy day is done,  
Faithful till the Master calls thee, calls  
thee to receive thy crown.  
Hold aloft the cross of Jesus! high  
above the storms of earth,  
Keeping ever in His footsteps, Who  
has saved thy soul from death.

Fierce and long the conflict rages, ever  
watchful thou must be,  
Praying ever for His guidance, who  
has given His life for thee,  
Hear His voice forever ringing high  
above the toll and strife,  
"Be thou faithful till the finish, I will  
give the Crown of Life."

Help us, O Thou great Redeemer! all  
our lives to follow Thee,  
We would be Thy loving servants, we  
would give our all to Thee;  
When the road is dark and dreary be  
Thou ever by our side;  
When the path is bright and cheerful,  
be Thou still our constant Guide.

Many things will surely tempt us, fiery  
trials we each shall see,  
But we have Thy gracious promise, if  
we still but follow Thee;  
Help us, then, to follow fully; fill our  
hearts with Thy great love;  
Then at last we each shall see Thee,  
in Thy glorious home above.

We shall see Thee in Thy kingdom, we  
shall hear Thy gracious voice,  
Thou wilt gladly give us welcome, Thou  
wilt bid our souls rejoice:  
"Well done, good and faithful servant!  
thou hast now the victory won."  
And we answer, "Yea, Lord, truly! by  
the merits of Thy Son!"

"By His love alone we triumph, He  
has led our hearts to Thee,  
He has kept us through life's journey,  
to His praise our song shall be;"  
Safe at last in Heaven's bright man-  
sion, safe through all the toll and  
strife,  
We will tune our harps right gladly,  
when we take the Crown of life.  
—Chas. D. Powell

### MISCELLANEOUS.

A little salt added to the water when scrubbing willow furniture will give it a fresh appearance.

Match marks on a polished or varnished surface may be removed by first rubbing them with a cut lemon and then with a cloth dipped in water.

By rubbing nickel and silver ornaments with a woolen cloth saturated with spirits of ammonia they may be kept bright with but little trouble.

Tall flower vases should be weighted by pouring in a small quantity of shot or pebbles that they may not be easily overturned. Sand is also useful in this connection.

To extract juice from a lemon without extracting the seeds, roll the lemon until soft and puncture one end of it with a fork, when the juice may be easily squeezed out.

An enameled kettle which has been allowed to boil dry should be immediately filled with boiling water. Cold water poured in in such a case would cause the enamel to chip.

Looking glasses ought always to be washed with soapsuds and warm water and then polished with a newspaper made into a pad. This will give them a very brilliant polish.

Teapots that are made of metal, if unused for some time, will often give a musty flavor to the tea when next used. This may be prevented by placing a lump of sugar in the teapot before putting it away.

Diamonds, whether genuine or imitation, should always be cleaned by rubbing them with a soft brush dipped in soap and water. This will remove the dust around the setting of the stones. Then rinse the jewel in some alcohol, such as eau de cologne or spirits of lavender, and place in some fine bran or sawdust. Leave them for a little time; when quite dry the sawdust can be easily removed.

In packing away winter clothes a good way to avoid the disagreeable smell of moth balls is to pack clothes away in lavender. This not only keeps away moths, but imparts a delicious odor to your clothing when taken out in the fall.

**A Simple Lubricator.**—The ice-cream freezer needed oiling badly, but no oil of a suitable character was to be found in the house, and no time to spare to get any from the store. In the emergency hot lard was used with the desired result.

The life of old linoleum may be lengthened by giving it a coat of clear varnish. When dried the varnished surface is easily kept clean with a damp cloth. When there is a badly worn spot in the center it is sometimes a good plan to cut the linoleum through the middle and bring the two outer edges together before varnishing.

To prevent insects from infesting bird cages great cleanliness is necessary. An occasional scrubbing with household ammonia and water will purify the cage wonderfully; but to do this one must have another cage in which the bird may be kept till the washed one is perfectly dry again. It is a good plan to keep a small bag of powdered sulphur hanging in the cage. This will not harm the bird, and will keep off the vermin that are apt to be troublesome in cages even when one is careful as regards cleanliness.

**A Cheap Crib for Baby.**—When baby needs a bed by herself, take three-foot poultry wire of desired length for the springs, one-foot wire for sides. Chair legs or rounds, which can be obtained at any furniture factory, make fine legs. They can also be used for head and foot. Make frame and tack wire on firmly. Paint all over with white enamel paint, and you have as cute a bed as one could wish for.

**Cream Cheese.**—A cook whose pantry was depleted of its supply of soft cream cheese, so handy for making sandwiches because spreading so easily, tried an experiment. She took a slice of the common Canadian cheese, cut it into small pieces, then crumbled it with the back of a fork, then worked in enough butter to bring it to the consistency of cream cheese. When spread on sandwiches she was complimented on the excellent quality of the filling.

**Ironing-Day Hints.**—Proper starching lessens the work of ironing—hence these few hints. To make delicate fabrics look like new: Boil one cupful of rice in three quarts of water; drain and use water for starch. Wet the clothes in it, wring, roll in dry cloth for an hour or two, then iron. (The rice comes in handy for dinner.) Corn starch is better than laundry starch for stiffening lace curtains or other laces. Starch of all kinds should become lukewarm before using. Hot starch turns dainty colors dark and ruins their beauty. Dissolve two ounces of powdered gum arabic in a quart of boiling water, strain, and keep bottled. A little added to starch for dresses and skirts (white or colored) gives an appearance of newness, and they will keep stiff and clean longer than when starched with ordinary clear-starch.

**A Brass Cleaner.**—A brass fire-set of shovel, tongs and poker I had always wanted. At last, when the much-desired set was in my possession, I thought my happiness was complete, but I soon discovered that I was wrong. The articles were bought for use, not for ornament, so of course had to be cleaned. Then trouble began in finding something that would do the work thoroughly and in as short time as possible.

At last the problem was solved. A lemon cut in halves and dipped frequently in salt did the work well. If the articles were badly soiled it took two lemons, but generally one lemon, a handful of salt, and about five minutes' rubbing did the work.

This remedy is tried and true and is passed on to some other sister suffering under a brass affliction, as guaranteed.

Repeat it:—"Shiloh's Cure will always cure my coughs and colds."
