

POULTRY AND EGGS PURE BRED

Pure breeds have many advantages over scrabs. Pure bred fowls eat no more, they lay better, sell better their eggs may be sold for hatching purposes—in every way they are more profitable than fowls of non-descript breeding.

Why don't you keep pure bred poultry? Farm and Dairy will start you right. Our proposition is: In return for a club of four new yearly subscriptions to Farm and Dairy taken at our exceedingly low rate of

Only \$1.00 a Year

we will return give absolutely free a pair of pure bred fowls of any of the well known standard varieties of fowls, included amongst which are those best suited and most profitable for the farm.

Refuse Any Roofing Which is NOT Guaranteed for at Least 25 Years

Why should you take ANY risk when you can make the maker take ALL the risk? The cost to you now will differ very little, no matter what roof you put on. So you might as well get the most you can for your money. Don't you think so?

Oshawa Steel Shingles are clearly, positively, responsibly guaranteed. A signed guarantee written in plain English which plainly states that if your roof of Oshawa Steel Shingles should ever rot or break within 25 years from the day it is first put on, you get an absolutely new roof free. There's a \$200.00 worth of "meat" of homestead value, and the biggest amount of its kind in the British Empire, and this written guarantee makes it as legally binding as any that could be given you. So then, why on earth will you take chances with any other kind of a roofing?

The ONLY Roof That is Guaranteed AT ALL

Isn't it reasonable to assume that makers of other roofing would give you a written guarantee if they dare? If they are, why can't they do so for Oshawa Steel Shingles? Their roof will last as long as mine, and that's good for a new roof if the first one prevents them giving you such a guarantee except their roofing. Then, nothing to prevent them from giving you such a guarantee as to take the risk of having to give you a new roof? They want YOU to take that risk. Will you let Oshawa Steel Shingles, and only Oshawa Steel Shingles, have something you can positively depend on which is the best bargain from your point of view?

For the life of me I can't understand why any sensible man will go blindly ahead and buy an inferior wood shingle roof, or a metal roof not guaranteed in writing, without seriously investigating the facts. It is so clearly to his own advantage to get the roof he can see for himself that you'd think he would be glad to know. Surely it must be his own interest to better than any he has yet used. Surely it must be his own interest to buy a material which is more "human nature" to do with than any other. By giving him the fruits of modern industrial progress.

Cost Far Less Than Wood Shingles

Don't be too quick about deciding that a wood shingle or a slate roof is the best you can get just now. You ought to go to a little Shingles. You'll find they cost about the same as low to keep on and keep in perfect condition. are by far the cheapest. That's no more silly than a man who says that a horse is the best because it is the only one.

Proof Against Both Fire and Lightning

This alone makes any "Oshawa Steel Shingles" worth more to you than any other kind of roof. Half a million dollars would not cover the damage year—all of which would be saved if these shingles were roofed with any Oshawa Steel Shingles. There's no more other reason for your choice of Oshawa Shingles, this is the ONLY one.

I offer to sell you a roof which you know to be good, and which I back up or go out of business. Now will you please give me any roof you want—any man—YOU, if interested in getting the best for my lock and get all the particulars about my Oshawa Steel Shingles. The book is free—the only man who owns or will ever own a building. W.B.W.O. please. W.B.W.O. please.

PEDLARIZE All Your Buildings—Inside and Out

By "Pedlarizing" I mean doing for the whole building what Oshawa Steel Shingles do for the roof. Oshawa Steel Shingles make other building materials make your building more fire-proof, more substantial. You should know about this. I'll send you a booklet which tells the whole story and pictures that tell the whole story. It's free. Just ask me to tell you about "Pedlarizing."

It's "Oshawa Steel Shingles" for other roofing should give you a written guarantee. What do you see they issue a guarantee that won't absolutely square? They say they will give you a new roof if it breaks and signs—the same as mine. Then they say they will give you the WHOLE cost of the new roof.

Isn't This The Kind of Roof YOU want?

A roof that you are absolutely sure will give you a whole year's protection. You pay the same for a roof that will last for 25 years as you pay the same for a roof that will last for 25 years. You pay the same for a roof that will last for 25 years as you pay the same for a roof that will last for 25 years. You pay the same for a roof that will last for 25 years as you pay the same for a roof that will last for 25 years.

Can't Leak, Rust Rot, Warp or Burn

Oshawa Steel Shingles cover your roof with one big seamless sheet of heavy-gauge galvanized iron, without a cross joint between any two pieces. And it stays that way for twenty-five years. And it stays that way for twenty-five years. And it stays that way for twenty-five years.

I Want to Send You My Valuable Book—"Roofing Right"

Let me have your name and address, please. When you really get a clear and correct understanding of all sides of this roofing question, you'll find that the Oshawa Steel Shingles are the only roofing which you can be sure of. Write the book to me. I'll send you a copy entirely free.
