

A Big Money Saver for Contractors

THE J. W. HARRIS EXCAVATOR

Is now working at the excavation of the New Montreal Light, Heat & Power Company's Power House, on the corner of St. Urbain & Craig Streets. It's doing the work of about one hundred [100] men at a cost of about thirty dollars [\$30.00] a day.

It will work in any kind of excavation, except in hardpan. It's a wonderful device to work on Railroad Construction. It will excavate the earth in a cut and dump it in carts or cars at the rate of one [1] cubic yard per minute.

If anyone wants to know if the above statement is right, they can apply to John Quinlan, Montreal, who is actually using the Machine.

We Sell Fixtures of All Kinds

If you want gas or electric light fixtures in new and exclusive designs—

If you want fire place fittings in brass or wrought iron, in plain and fancy patterns—

If you want hall standards in bronze or brass—

If you want portable lights in handsome designs—

If you want floor or wall tiling; mantels in weathered, quartered, or plain oak, mahogany, white enamel, or brick—

We can supply your wants.

Most of our fixtures are our own exclusive designs—made in our own factory.

Unlike most imported fixtures, ours are substantially made of solid cast brass and handsomely lacquered.

For the price there are no better or cheaper fixtures sold in Montreal.

We design and make gas and electric brackets and hanging lights for banks, clubs, hotels, public buildings, private residences, etc.

We are sole agents for Quebec Province for the famous Welsbach gas mantel.

The sale of Metile, for this province, is also controlled by us.

Metile is a perfect substitute for porcelain tiling, and has this advantage that it won't crack, and can be applied to curved walls and ceilings.

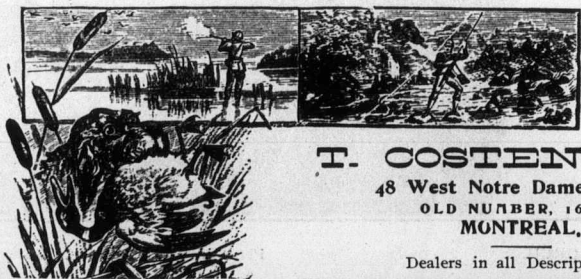

Always ready and pleased to show our goods whether you buy or not, so come in.
