The public are invited (in confirmation of this fact) to peruse the numerous testimonials of medical men and others, and par- ticularly that of Dr. Nelson, who speaks of its effects produced on members of his own family. Such being the case, it cannot be wondered at that the Montreal Water has driven all competitors from the field, and that its value should be placed so much above all other Springs ever discovered in the country.

As evidence of this, it is only necessary to refer to the names of the eminent Physicians, and pub- lic and private individuals, who have certified to the value of the Plantagenet Waters, and who regard it as a boon to the country.

In conclusion, let it be borne in mind, that it is not simply as a saline drink that these Waters are beneficial, but because they have an oily, fat- tening property, unknown to any Water besides. There is, in fact, but one Plantagenet spring, and the more that is known, the higher its reputation, and the more all others sink into insignificance beside it.

It is enough to read the names given below, of those who have used the Plantagenet Waters, to be satisfied of their superior excellency over all others:—Doctors Crawford, W. Nelson, W. Fraser, Horatio Nelson, George W. Campbell, Archibald Hall, Alex. McCulloch, P. Jean L. McDonnell, J. G. Rhind, E. H. Trudel, H. Mount, J. L. Le- veque, S. C. Sewell, F. Badgley, H. Peltier, J. E. Perrin, L. F. Tavernier, G. D. Gibb, P. E. Cowell, James Grant, L. H. Masson, S. B. Cahill, W. F. Smith, P. Munroe, T. Leduc, W. Wright, L. Boyer; the Hon. A. N. Morin; the Hon. Peter McGill; the Hon. Louis Joseph Papineau; C. Wilson, Esq., Mayor; R. Fisher, Esq., Ex-Mayor; — Bellaire, Esq., Mayor of Quebec; J. B. Renaud, Esq.; Louis Boyer, Esq.; E. M. Taschereau, Esq.; J. Belle, N. P.; Maurice Roux, Esq.; J. S. Cameron, Esq.; and many others.

The great cause of this preference is the distinct character of the Plantagenet Water, and more particularly its solidity of body, and the glutinous quality it possesses, which distinguishes it in a remarkable degree from all other waters. Others appear poor and thin in comparison with it. It may be truly said to have done more for the public health in four years, than any other water has ever performed in fifty, and scores of the cures it has effected are truly miraculous. Many of these facts are already before the public, and others can be ascertained at Plantagenet, where the public are invited to judge for themselves. In cases of rheumatism and other chronic dis- eases it almost infallible, a number of cases having occurred where parties who had lost the use of their limbs have been restored to health and vigor by the use of it. Truth for the Million.
The great number of parties, (including the most eminent physicians of the Province,) who have attributed to the efficacy of the subscriber's Pills, has induced some other proprietors of so- called mineral springs, to try to put their waters upon the same footing with the Plantagenet. No- thing can be more absurd than this. These other Mineral Springs have been known to the public in their vicinities for fifty years, and in that time what have they done? Have they anything to show for the patronage they have received from the public? How have they stood since the Plan- tagenet came into the field? It is now only three short years since the Plantagenet Waters were introduced to the Public, and in that short space of time has become of other Springs, which have been known before them? Can any amount of puf- fing make the public believe that they deserve to be named in the same breath with the Planta- genet Spring? It may be safely said that no one who has once used the Plantagenet Water will ever use any other water. Their inferiority is so marked, and they are comparatively so worthless, that business have declared that they would rather pay three times the price for Plantagenet Water, than for the best of them. Yet these new Springs have a great advantage in point of low price over the Plantagenet, in as much as they originate Montreal, and are accessible, (if they are worth seeking,) to all classes without dis- tinction.

The great cause of this preference is the distinct character of the Plantagenet Water, and more particularly its solidity of body, and the glutinous quality it possesses, which distinguishes it in a remarkable degree from all other waters. Others appear poor and thin in comparison with it. PLANTAGENET WATER.
Among the objects of attraction at the late Industrial Exhibition, the celebrated Plantagenet Water held a conspicuous position, and its exhibition was attended, we learn, with the most favorable results. The demand at the Fair for this health-inspiring draught was so urgent that it was with great difficulty strangers and visitors to the city could be supplied. The celebrity of these Mine- ral Waters has been thoroughly and satisfactorily esta- blished that testimony of the most valuable character seems daily accumulating. The highly respectable cer- tificates given in our paper of to-day will, if possible, in- crease their reputation, and add to their value throughout the Province. The testimony of the medical gentlemen certainly highly favorable to the character and quality of them. Drs. Nelson and Gibb placing them on a par with the celebrated Mineral waters on the Continent:—

"I believe I am not too sanguine in my expectations when I state that the Plantagenet Waters will, in a few years, be as much sought after as the Waters of Spa, Seltzer, Vichy, Carlsbad, Pyrmont, Harrowgate, &c., &c. Their composition is such as to render them peculiarly valuable in Dyspepsia, Chronic Diarrhœa, Dysentery, Diseases of the Liver, Kidneys, Bladder, Gravel, Stone, Scrofula, Cutaneous Affections, Rheumatism, Gout, Nervous Affections, Hysteria, Hypochondriasis, Mania, Epilepsy, Paralysis, Tetanus, Chorea, Hydrophobia, Amaurosis, Deafness, Tic Douloureux, Sciatica, Lumbago, Neuralgia, Dysmenorrhœa, Sterility, Leucorrhœa, Impotency, Nervous Debility, Hypochondriasis, Hysteria, Hydrocephalus, Chronic Inflammation, Ulceration, Scrofula, Tubercular Consumption, Chronic Catarrh, Asthma, Bronchitis, Laryngitis, Pleurisy, Pneumonia, Hæmoptysis, Hæmatemesis, Menorrhagia, Metrorrhagia
