It is to be hoped that we are not on the verge of another 400 years war at the other end of the Asiatic continent.

The gravity of the crisis in China hitherto has never been realized, even faintly, in Europe, Otherwise England would have long ago patched up any kind of a truce in South Africa which would have enabled her to have used her army for the defense of the threatened outposts of Western civilization. Even now, when the massacre of the legations has sent a thrill of horror through the world, few dream of the immensity and hopelessness of the struggle upon which they are invited to embark with such loud cries of ven-

The fact is that the whole world is face to face with a determined effort, by no means confined to China, on the part of the colored races, to assert their rights to live their own lives in their own way, without the perpetual bullying of the pale-faces.

The colored races have awakened to the fact that the supremacy of the white man is due to no inherent superiority, but solely to the fact that he has superior weapons. Hence the Chinese have provided themselves with the best artillery and magazine rifles, and have employed expert instructors.

Lord Wolseley told me long ago he considered the Chinese the very best fighting material in the world. They were better even than the Russians, because the Russian soldiers drink, whereas the Chinese are the most abstemious

He was an Australian who had the best atlases omit them for they engthen the name and make it more formidable to the foreigner. Fu means the capital of one of the departments into which a province is divided; in other words it is the residence of the official at the nead of the department. Hien signifies one of the districts into which a department is divided and when attached to a place name means that the official in charge of the district resides there. It is beter to omit these merely political designations. When we have more intimate dealings with China and better knowledge of the people and their country we shall have uniformity in the spelling of China's place names and know what these names mean; and we shall see clearly that these names show considerabble imaginative and descriptive facility and that they are really helpful in the study of Chinese geography. - Exchange.
