THE ATHENS REPORTER, JANUARY 31, 1917

WOLVES OF THE SEA.

Killer Whales Travel in Packs and Are Ferocious.

The killer whale usually travels and hunts in "schools" or packs of from three to a dozen or more individuals. Unlike most whales, the members of these schools do not travel in a straggling party, but swim side by side, their movements as regularly timed as those of sailors. A regularly spaced row of advancing long black fins swiftly cutting the undulating surface of the sea produces a singular sinister effect. The evil impression is well justified, says the National Geographic Magazine, since killers are the most savage and remorseless of whales. The jaws are armed with rows of effective teeth, with which the animals attack and devour seals and porpoises and even destroy some

of the larger whales. Killers are like glant wolves of the sea, and their ferocity strikes terror to other warm-blooded inhabitants of the deep. The Eskimos of the Alaskan coast of Bering Sea consider killers as actual wolves in sea form. They believe that in the early days, when the world was young and men and animals could change their form at will, land wolves often went to the edge of the shore ice and changed to killer whales, and the killers returned

to the edge of the ice and came out as wolves, to go ravening over the land. Some of the natives assure us that even to-day certain wolves and killers are still endowed with this power, and, on account of their malignant character, are much feared by hunt-

scals and porpoises entire and attack large wholes by tearing away their fleshy lips and tongues. When attacking large prey they work in packs. with all the unity and fierceness of

DODD'S KIDNEY PILLS CURED WHERE DOCTORS FAILED. Mr. and Mrs. Sawyer, After Years of Suffering, Found the Remedy They

Sought in Dodd's Kidney Pills. Capreol. Ont., Feb. 1.—(Special) — Firm believers in Dodd's idney Pills are Mr. and Mrs. Adolphe Sawyer, of this place. They have their reasons and are quite willing to make them public.

"I was a complete wreck when started to take Dodd's Kidney Pills," Mr. Sawyer says. "I had suffered for ten years. I tried fit e doctors alto-gether. Some said it was rheumagether. Some said it was recuma-tism. Others called it lumbago, but

SPOILED HIS SYSTEM. mer. It is evident that the insect's muscle will be 1,000,000 times lighter than the man's, while it's section, and consequently the force it can exert, will be only 10,000 times less. The conclusion is that since a man can lift 62 pounds the insect will lift 10,009 times less, or 154 grains, and one gets the impressing spectrale of an insect He Thought It Couldn't Be Done, I know man who wears his shirts in chronological order—that is, if he buys a new shirt he tags it with his initials, numbers it and places it at the bottom of the pile. And, no matter how much .e likes it, he does not wear it until it comes out at the top of the pile. He mean intermedue

The Common Cause is Lack of Blood the impressive spectacle of an insect lifting more than 100 times its weight. Therefore You Must Build Up the In fact, the smaller the insect is the more it will astonish us by an appear-ance of extraordinary strength. But it is no longer the same if one There is the most intimate relation between the condition of the blood and the activity of the stomach. The blood depends upon the stomach for a large part of its nourishment; while examines the mechanical work effect

ed. The muscle of the insect, suppos-ed to be one one-hundredth of a man's the food enters the stomach and is as-similated by the blood needs plenty of pure well-oxidized blood. The mus-cles, glands and nerves of the stomach work only according to the quality of in linear dimensions, furnishes, when In inear dimensions, furnishes, when it contracts, a force 10,000 times less than the human muscle exerted through a space 100 times smaller; the work produced will thus be 1,000, 600 times smaller, which re-establishthe blood. tion is lack of rich, red blood. Not only does impure blood weaken the

muscles of the stomach, but it lessens the product of the glands of the intestines and stomach, which furnish the digestive fluids. Nothing will more promptly cure indigestion than plenty of pure blood. Dr. Williams' Pink Pills are the safest and most cer-tele blead builders to the sub-subtain blood-builder. A thorough trial of these pills gives a hearty appetite, perfect digestion, strength and health. Here is proof of the value of these pills gives to its mass a movement cap-able of raising it twelve inches. Man can raise his own weight about five feet by leaping. For equal weight the human muscle thus furnishes five in cases of indigestion. Mr. Danled Dexter, Liverpool, N. S., says: "For s more work than that of the flea several years I was a great sufferer from indigestion. I was greatly trou-bled with gas on the stomach, which in a single contraction, since the work is the product of the weight by the height to which it is raised.—Washheight ington Star caused disagreeable sensations.

STOMACH TROUBLE GROWTH IN ONE YEAR EXCEEDS EIGHTEEN MILLION DOLLARS-BANK ASSISTS FINANCING OF IMPERIAL MUNITION BUSINESS

The fifty-second annual statement of the Union Bank of Canada, cover-ing the year ending November 30, 1916, shows a remarkable growth and strengthening of the Bank's position, and at the same time indicates large cash resources both in private and business accounts throughout the Dominior

The Union Bank, with headquarters in Winnipeg and 200 branches in the West, as well as a splendid old-estab-lished system of branches in the East, is in close touch with every part of Canada, and its surprising growth for the year reflects the financial recov-

ery of both East and West, and the increasing savings of the people. Interest-bearing deposits amount now to \$60,144,940 against \$50,685.304 a year ago, while deposits not bearing interest have reached \$29,122,848, com-Interest have reached \$29,122,848, com-pared with \$21,999,832 shown in the previous year's statement. The as-sets, which a year ago were \$90,663,-063, showed an increase of eighteen and a half millions, bringing them up to \$109.040.228. This 20 per cent. advance is the more remarkable as it follows an increase of over nine milfollows an increase of over nine mil-lions, or 11 per cent., in 1915, making an increase for the two years of \$27,-500,000, or 33 per cent. From these figures it is clear that Canadians are Saving as well as making money and that the Union Bank of Canada en-tors a large measure of their confidjoys a large measure of their confid

Similar strengthening of the financial position of businesses generally, through the liquidation of bank indebtedness from cash profits has prevented much expansion of current loans and discounts in Canada, which of current loans and discounts in Canada, which stand practically the same as in the previous year. The new funds at the disposal of the Bank are invested chiefly in figuid accets and cash, of which the Bank holds \$56,587,825. compared with \$39,138,385 at the end of 1915. This increase of seventeen and a half millions follows an increase of nearly thirteen million dollars during the previous year and constitutes an extremely strong reserve, readily comvertible into cash.

It is interesting to note that of this reserve \$13546,248 is invested in Do-minion and Provincial Government Securities, Canadian Municpal Securities and British, Foreign and Colonial Public Securities other than Canadian, whereas a year ago the amount afmi-larly invested was but little over one million dollars. By far the greater proportion of this sixteen million item consists of securities of the Imperial Government issued for the financing of munition business in Canada. The note issue of the Bank has in-

creased over a million dollars, to \$3, 815,117, with a corresponding increase in the War Tax on "lank 'lote Circa-lation to \$56,000. Profits for the year were about the

Dillwyn, Kan., which has twenty-four inhabitants and four grain ele-vators, a ratio of one to cix, is the \$150,000 transferred to Contingent Ac-biggest wheat shinning town, per count. \$20,000 appropriated for the Pension Fund, \$5,000 donated to the British Sailors' Relief Fund, and \$450,-British Sailors Reher Fund, and \$400,-000 for the usual 8 per cent. divideod and 1 per cent. bonus, the sum of \$93,-160 was carried forward to the credit of Profit and Loss Account. It is worthy of note, that the Bank has maintained its dividend and bonus and met all charges for depreciation and contingencies throughout the war out of its annual unofits and he new out of its annual profits and has now a larger profit balance than at the end of 1913. The immense increase in the scope of its business during those years, and the great strengthening of its position, holds out the prospect of greatly increased carnings upon the return of normal conditions.

INSECT STRENGTH.

# For One Family Many Misconceptions, Says French Investigator.

At intervals there appear accounts setting forth the prodigious strength of insects. Their muscular force is usually compared with their size by stating, for example, that a flea can leap so many times its own length and that an ant can drag so many times its own weight. Then it is stated that man, if he were strong in the same proportion, could jump so many rods or lift so many tons. These comparisons, according to the Freach investigator, Leo Robida, are mislead-ing, to say the least. He states that it is interesting to consider, solely from a machanical
