The Model TOWN

B-H PAINT

the paint protected town

The finest town buildings soon get to look "dingy" if they are not kept painted. Worse still, the omission of the Spring painting leaves them open to weather-attack and time's decay. And—with materials so high as to make every building worth double today what it was worth in 1913—you are making a mistake if you let a building "go to seed."

Have your town a "model" town—have it fresh with paint—have it protected with a paint that affords real protection.

Other B-H Products of Sterling Worth

We carry and recommend the following B-H products:

- For Interior Finishing: "China Lac"—the perfect Varnish
- "Plaster Coatings and Walls"
- "Frescoette"—a flat tone oil paint.
- Staining the Roof: "Anchor Brand Shingle Stain" in 19 different colors.
- Varnishing a Floor: "Floorlute"—excellent for Interior Floors.
- For Porch Floors: "D-H Porch Floor Paint"
- For Barn and Outbuildings: "Imperial Barn Paint"

Colour cards and Prices from our local agents.

The Day of Judgment.

(By Dr. Frank Crane)

Soon or late comes the Day of Judgment.

Whether there is to be a great court room scene after the moon has fallen like a ripe fig and the earth turned ashes, let the theologians and their opponents discuss.

But that the Day of Judgment comes at its set time here below with its great bell of doom, its irrevocable verdict and its pitiless punishment, let no man dispute, unless he would dispute the Himalayas or the height of the sky.

Before the eye are men's activities, their plans, ambitions, wars and governments, and institutions. Concealed, deep hidden, where only the eye of wisdom can see them, are the immutable laws of God, the sluggish yet irresistible movements of destiny whose path is progress, whose direction is righteousness, whose end is justice.

When by and by the machinations of men have reached the sum of their iniquity, and mark of hell has been decreed for them, and are met and judged by the stern decrees of all mighty right—that is their Day of Judgment.

Rome brought senuous luxury with her triumph, her day came, and the Spies, with her insane vanity colored by fanaticism, murdered the Jew, oppressed the Dutch, exterminated the Incas and the Aztecs, but at last the Eternal Tribunal reversed her decisions, scattered her galleons, stripped her of her territories and relegated her to the shame of impotency.

And how comes the latest monster trying the famous task of overcoming by the might and craft of man the everlasting equities of a silent Deity? For forty years Prussia had developed her military machine. Then at that mad moment fixed by the stars she launched the terrific act long foretold in her fevered thought. Her dark battle line moved out upon an unrounded, paralyzed world. That she had subsided of military efficiency was conceivable; that she could rise to such heights of moral insanity, to such depths of bestial inhumanity was inconceivable.

The world shuddered, heaved, and strength of the human race gathered head against the dead menace, and the glow of the Day of Judgment red-dened the horizon.

For the vast machine of German egotism could devastate Serbia, Poland and Roumania, could roll juggernaut car over Italy, but it could not reverse the laws of eternal justice, change the unalterable instincts of humanity, nor pull down the pillars of right and wrong which, since the first appearance of conscience among humans, have supported the edifice, organized society.

Out of insane pride emerged the German army; out of the wounds of outraged humanity emerged her opponents. The bloody gods of the Kaiser, the Austrian Emperor and the Turk, at last stood against themselves the God of All the Earth.

This is the Day of Judgment.

Of the verdict there can be no doubt. He who sent proud Lucifer to hell, who drowned the Bourbon in blood, and wrecked the ambitions of vain glories Spain, will know what to do with this modern criminal, whose methods are characterized by the newest prodigies of frightfulness, but the quality of whose crime and sin is as old, as foul, as familiar as the heart of Cain.

A Sheep-Dog Story.

Some twenty years ago, on a large farm near Wen, in Shropshire, we employed a Welsh shepherd, who possessed a remarkably clever sheep dog. At the same time we had a most purely and dangerous bull, who gave a good deal of trouble in getting him back into his fence when he was let out of it. On one of these occasions the sheep-dog came into the yard, and we asked it, "thought B.B., as the dog was named, could get the bull in the pen. The man sharply pointed to the dog, and the bull ran out.

The dog was washed at the bull, not at his heels but at his nose. Immediately the bull lowered his head to attack the dog, who rapidly retreated into the loose box, followed by the bull, and as he went in, the dog slipped off, and the man in charge who had half a dog's design, shut the door before the bull could turn around.

In all this the dog showed reasonable powers of the highest order. It was a pity he had never been called upon to perform before. All his previous training had been to drive sheep; but he instantly realized that he could not do with a bull, so he adopted the only possible way of inducing the bull to follow him into the loose box by barking and biting at the bull's nose.

Important Points In Hatching Chickens.

During the hatching season the poultry house and particularly the nest should be kept clean. Clean water and a supply of whole grain should be accessible to the sitters and a dust bath should be provided also if more than one hatch is being taken off, clean out and disinfect the nest after each hatch and put in new food and fresh litter. Dust the hen with insect powder before putting her in the nest, again a day or two before hatching the eggs with the chicken. It is a good plan to put into the dust bath a little dry sulphur or grain tobacco.

Be sure also that the house is free from mice. These little pests get into the cracks and corners of the building and at night, as the hens are sitting, they come out of their hiding place, get on the hen's body and they do not take very many of them to make a hen so uneasy that she cannot sit. In some cases the mice become so troublesome that they actually worry the hens to death.

How to Get Rid of Mites.

Clean out the house and thoroughly sweep, not forgetting the windows wells and ceiling. When this is done sweep out clean, use a garden hose or a still brush and hot water. See that everything in the cracks and crevices is washed out. After this is done allow the house to dry for a while and everything then appears to be clean. Use a good disinfectant and be sure that the disinfection is forced by the spray or brush right into the cracks and crevices. If the mites are bad use boiling hot water followed by coal oil and a liquid lice killer or kerosene. Be sure that this goes into the cracks and crevices and when you have gone over your house thoroughly according to the above treatment, in all probability the mites will be exterminated, but it is advisable if the course of three or four days again to inspect for the mites and perhaps to repeat the dose once more.

Mr. Smith—"I see that Mrs. McQueen has just passed without speaking. I thought you were great friends."

Mr. Brown—"No, we are not of the best of terms just now."

Smith—"How is that?"

Brown—"Well, you see, it's like this. You remember the fire that took place at their house about a fortnight ago. Well, I ran for a long plank to put up at the window so that she might slide down before the fire broke arrived. But how was I to know there was a nail in the plank?"

A little lot of runs enables a bawling team to win in a walk.

When Horses Are Poisoned

When a horse, out at pasture or in the stall, is found staggering in a lumpy condition with the pupils of the eyes dilated, it is usually apparent that he has eaten something that does not agree with him. The cause, of course, is not always the same. Bulletin No. 26 Scientific Series, of the Health of Animals Branch, Department of Agriculture, Ottawa, has been had free on application to the Publications Branch of the department, explains at least one cause of this state of things. The authors, Messrs. S. H. Eaton, D. V. Sc. Pathologist, and E. A. Bruce, V. S. Assistant Pathologist, tell of experiments by which it was found that stricken was frequently at fault. They say a disease known as "tagas" has been prevalent on the Pacific slope for many years, and then proceeded to detail the results of their research to show the serious nature of the complaint. They quote an instance in which 24 horses, owned by 11 farmers, died. Not only are the symptoms fully set forth but the treatment that should be followed is given and the steps that should be taken for the eradication of the germ from the horse's feed, whether gathered in the field or supplied from the stable. The title of the bulletin is "The Poisoning of Horses by the Common Bracken."

That Missing Hour.

After a fortnight of daylight saving, people in the United States appear to have completely forgotten that they are one hour ahead of the old conventional time. What they do know is that a turning of the minute hand once round their clocks and watches has endowed them with an hour more of glorious sunlight. Merchants in New York state report that artificial light is no longer necessary in their stores at the closing period of the day. Not only is there a saving of the electric light bills, but customers have the advantage of an extra hour in which to select their fabrics in natural light. We know also how many men's by which it was found that stricken was frequently at fault. They say a disease known as "tagas" has been prevalent on the Pacific slope for many years, and then proceeded to detail the results of their research to show the serious nature of the complaint. They quote an instance in which 24 horses, owned by 11 farmers, died. Not only are the symptoms fully set forth but the treatment that should be followed is given and the steps that should be taken for the eradication of the germ from the horse's feed, whether gathered in the field or supplied from the stable. The title of the bulletin is "The Poisoning of Horses by the Common Bracken."

But really there is no call whatever for a farmer to change his working hours. He can still begin with daylight and end with darkness and arrange his time to suit himself. What benefits the public generally will in the long run also benefit him if he has any at all. Exchange.

A Builder of Health.

Nothing can be of greater assistance in building up the system than Dr. Chase's Nerve Food, for this food, sure to be new, rich blood, and nourishes and restores the feeble, wasted nerve cells. Gradually the body and mind regain vigor and energy, and you feel again the joy of living which comes only to people in good health.

Excessive politeness is seldom on speaking terms with truth.

Controlling Potato Disease From the Start.

(EXPERIMENTAL FARM NOTE)

Potatoes are plentiful this spring. Preserve your seed from a field which produced a good heavy crop the previous year. The smooth appearance of the seed alone is no guarantee of its freedom from potato diseases. Soak them in three hours in a barrel containing either of the following solutions: Corrosive sublimate, 2 oz. in 25 gallons of water. (Note: fatal poison to man and beast.) Formalin, 1 pint in 25 gallons of water.

In cutting for sets throw out all potatoes showing rot or brown spots, or signs of the stem end and in the flesh.

Cut the sets immediately before planting. The longer you keep them out, the smaller the yield. Be prepared to meet the ravages of the potato bug. Spray your potatoes. Spraying pays! Use poisoned Bordeaux mixture for Late Blight. This is the solution: 6 lbs. bluestone, 4 lbs. lime, 20 gallons water. Dissolve bluestone first in 15 gallons of water. Shake the lime in another vessel, strain it off lumpy. Pour both solutions together and make up to 40 gallons by adding water. Add arsenate of lead paste, 2-3 lbs. per 40 gallons of solution; or use 8 oz. Paris Green and 1 1/2 lbs. of arsenate of lead for 40 gallons solution. Stir well and fill pump through fine meshed sieve. Particles will clog nozzles and are most annoying. Spray thoroughly and cover all leaves well with spray. Don't drench. Commence as soon as the plants are a few inches high and continue every two weeks throughout the season.

For a large field use a high pressure horse-power outfit. For smaller areas there are many good hand-sprayers on the market.

Buy your spray chemicals tight and arrange for the purchase of a sprayer; sometimes it is a good practice for several farmers to club together and buy a good power sprayer.

Watch the field and throw out any sickly looking or dying individual plants. Mark the one hundred best hills for future seed supply. From these select 50 which yield the largest number of uniform potatoes and plant these separately next year, and in seven years this practice will pay your strain yields highest in the neighborhood.

WOMAN'S NERVES MADE STRONG

By Lydia E. Pinkham's Vegetable Compound.

Winona, Minn.—"I suffered for more than a year from nervousness, and was unable to rest at night—would be awake and get so nervous I would have to get up and walk around the room in my nightgown. I would be all tired out, I read about Lydia E. Pinkham's Vegetable Compound and thought I would try it. My nervousness was soon relieved. I sleep well and feel fine in the morning and am able to do my work. I gladly recommend Lydia E. Pinkham's Vegetable Compound to make weak nerves strong."—Mrs. ALABY BIRDA, 608 Olmsted St., Winona, Minn.

How often do we hear the expression "nervous woman," "I am so nervous, I cannot sleep," or "it seems as though I should fly." Such women should profit by Mrs. Pinkham's experience and give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial.

For forty years it has been overcoming such serious conditions as displacements, indigestion, nervousness, irregularities, periodic pains, backache, dizziness, and nervous prostration of women, and is now considered the standard remedy for such ailments.

For forty years it has been overcoming such serious conditions as displacements, indigestion, nervousness, irregularities, periodic pains, backache, dizziness, and nervous prostration of women, and is now considered the standard remedy for such ailments.

Missard's Linctum Cures Diaphragm.

Sciatic Pains

from Exhausted Nerves

SCIATICA or sciatic rheumatism is attended with pain and tenderness along the sciatic nerve in the hips and thighs, and indicates an exhausted condition of the nervous system.

Relief is sometimes obtained by external applications or the use of heat, but at the slightest provocation the distressing pains return and from time to time become more severe as the nervous system becomes more exhausted.

The only way to obtain actual cure is by a reconstruction of the wasted nerve cells, and this is best accomplished by Dr. Chase's Nerve Food. It need not cost you much to restore vigor to the nervous system, but it will take a little patience, particularly at first. After you have used a few boxes and got the building-up process established you will find improvements from day to day which will encourage you to keep up this treatment until the nervous system is completely restored.

Nervous disorders do not right themselves, but naturally, become more acute as the system becomes further exhausted. It is only wise to be warned by sleeplessness, headaches, neuralgic and sciatic pains and to take immediate action to restore the depleted nerves before paralysis, locomotor ataxia or some form of helplessness is developed.

Dr. Chase's Nerve Food

50 cents a box—do not pay more—at all dealers or Edmondson, Bates & Co., Ltd., Toronto. On every box of the genuine you will find the portrait and signature of A. W. Chase, M.D., the famous Receipt Book author.
