The financial statement of the road for the past year shows a favorable decrease in the deficit and with the vigorous and economical policy now in force a still greater decrease may be expected. It is nothing to cry over that the road does not make money or even that there is a small deficit. The people of the west who fancy they receive no benefit from the road, do most of the complaining while slutting their eyes to the fact that their canal system ran behind last year to the amount of \$1.726.864.92, last year and this is the average yearly deficit. The balance between receipts and expenditure can still be more nearly equalized by a furtherance of the present policy and more accurate book keeping. But the most important, requisite towards making the road can transact their business without having to wait several days until the superpinendent, hears from Otta

WHY IS IT?

In the statistical year book of Canada for 1891, just issued, is given in tabulated form the revenues and expenditures of the different provinces of the Dominion from the years 1867 to 1890 inclusive. The only province whose statistics are not given is New Brunswick and on page 122 Mr. Roper. Assistant Statistician says: Roper, Assistant Statistician says: "The Treasurer of the Province of New Brunswick was applied to, but at present without success."

The reader of the Year Book will

The reider of the Year Book will have the privilegs of drawing several conclusions as to why New Brunswick's figures were not given for the benefit of the public. They may infer that the finances of the province are in such a condition that the government in justice to their own security did not feel like making a full statement and presenting it in a concise form which would be readily understood by an ordinary reader, or it may be inferred that owing to Mr. Blair's absence in Europe a statement flavored to the public taste could not be given. Had Mr Blair been at home, doubtless he would have exercised his well known culinary ability and given Mr. Roper something for his bill of fare which might have been made to do which might have been made to do duty in the coming by elections. A. part from the question as to why the provincial treasurer withheld his stateent it is rather regretful that the completeness of a very interesting table is broken by the absence of the figures from New Brunswick,

The totals for the different pro vinces given in the tables are interesting. Quebec's statistics begin at 1868, British Columbia's at 1871 and Manitoba's at 1873. The others at confed

—As reporting the different villages at this season appears to be in order, we propose to say a few words regarding this locality. The farmers should be thankful to benificent Providence for giving a bountiful harvest and fair weather for gathering in the products of the field.

—There have been several visitors here from the States and, elsewhere. Among those we might mention, Mrs. Smith Orr, the well known and popular proprietess of the 'Albion House,' Mr. Richard Orr and family. Miss A. M. Chappeli. They appeared to enjoy their visit very much, Mr. Netis. Now the laborer's task is o'er;
Now the battle day is past;
Now upon the other shore
Lands the voyager at last,
Resting well for evermore.
On Friday evening last the mortal remains of the deceased were placed in the local cemetery. The large funeral procession of over three score carriages each one carrying those willing thus to fhow their deep regard for a dead brother, and his sorrowing family; showed the respect we had from the community. As the throng gathered round the grave each head bowed, each face was stricken with grift, the scene was a solemn one.
