PROSPECTUS OF THE SCIENTIFIC AMERICAN ELEVENTH YEAR.

The Proprietors of the Scientific American respectfully give notice, that the Eleventh Annual Volume of their Journal will commence on the 16th of September next.

THIS work differs materially from other publications, being an Illustrated Periodical, devoted chiefly to the promulgation of information relating to the various Mechanical and Chemical Arts, Industrial Manufactures, Agriculture, Patents, Inventions, Engineering, Millwork, and all interests which the light of Practical science is calculated to advance.

The Scientific American is printed once a week, in convenient quarto form for binding, and presents an elegant typographical appearance. Every number contains eight pages of reading, abundantly illustrated with original engravings. All the most valuable patented discoveries are delineated and described in its issues, so that, as respects inventions, it may be justly regarded as an Illustrated Repository, where the inventor may learn, what has been done before him in the same field which he is exploring, and where he may bring to the world a knowledge of his own achievements.

Reports of U. S. Patents granted are also published every week, including Official Copies of the Patent Claims; these Claims are published in the Scientific American in advance of all other papers.

The Contributors to the Scientific American are among the most eminent, scientific, and practical men of the times. The Editorial Department is universally acknowledged to be conducted with great ability and to be distinguished, not only for the excellence and truthfulness of its discussions, but for the fearlessness with which error is combated and false theories are exploded.

Mechanics, Inventors, Engineers, Chemists, Manufacturers, Agriculturists, and people of every profession in life, will find the Scientific American to be of great value in their respective callings. Its counsels and suggestions will save them hundreds of dollars annually, besides affording them a continual source of knowledge, the experience of which is beyond pecuniary estimate.

Terms of Subscription, \$2.00 a year, \$1.00 for six months.

HASZARD & OWEN, Agents for P. E. Island.

AN AFFECTING INCIDENT.—Night is upon earth. Darkness is in the valley and upon the hill-top. But the moon rising and clearing away the clouds, dispels the gloom. As she rolls upwards the, stars gather around her. Come with me and look upon a scene of intensely exciting interest. Enter this chamber softly—it is the sanctuary of innocence—the a bode of love and peace. Bonding beside a table, behold a blooming maiden—lovely girl of seventeen—on her knees. Her cherry lips move, her graceful form is anxiously awaying to and fro. She is labouring under an excitement. The cool air rushes in upon her through the lattice. She is strengthened—could we view a more interesting picture!—Ah! Was that a word or a long-drawn sigh! List again. "Ah! Can she be unconscious of our presence! Her dark eye in frenzy flashes. The sweet smile has vanished from her features. But lo! it returns in triumph! She speaks! "Mary! Mary!—I've killed that great old flea at last!"

A RECIPE FOR HAPPINESS.—When you rise in the morning, form a resolution to make the day a happy one to a fellow-creature. It is easily done; trifles in themselves light as air will do it, at least for the twenty-four hours. By the most simple arithmetical sum, look at the result; you send one person, only one, happily through the day; that is three hundred and sixty-five in the course of the year; and, supposing you live forty years only, after you commence that course of medicine, you will have made 14,900 human beings happy, at all events for a time. Now, worthy reader, is this not simple! It is too short for a sermon, too homely for ethics, and too easily accomplished for you to say, "I would if I could."—Sydney Smith.

If one of our regimental chaplains in the East be found kissing a turkish lady, can he be charged with embracing Mahometanism?

A BLUNDERING compositor, in setting up the toast, "Woman: without her, man would be a savage," put the punctuation in the wrong place, which made it read, "Woman, without her man, would be a savage."

You eat me—you drink me—deny who it can! I'm sometimes a woman, and sometimes a man; — Toast.

WHY are watches and clocks extremely modest!—Because they always keep their hands before their faces, and however good their works may be, they are always running them down.

WHAT dreadful death does a sculptor die—He makes faces and busts.

MIDNIGHT PASTIME.—A Yankee has just invented a method to catch rats. He says, "Locate your bed in a room infested by these animals; and on retiring, put out the light. Then strew over your pillow some strong-smelling cheese, three or four red-herrings, some barley-meal or new malt, and a sprinkling of dried codfish. Keep awake till you find the rats at work—then make a grab."

WANTS.—A contemporary wants a fifer and drummer to beat time for the "march of intellect;" a pair of snuffers to trim the "light of other days;" a ring that will fit the "finger of scorn;" a loose pulley to run on the "shaft of envy," and a new cushion for the "seat of government."

THE MOST AGREEABLE OF CHIMES.—We should imagine the most agreeable chimes must be the must be the accents of courtship, as the *domine bellas* (!) (Bow Bells have ever been celebrated for their attractive tones).
