The quantity of wheat now off the coast hasgot been included in the general account, the chances being for a somewhat similar quantity off the coast at the end of August. The above statements may be of service towards elucid-ating more accurately the stocks with which the next harvest will have to be met, and which cer-tanity promise to be very short in this country, par-ticularly as the quantity reported, as above, on pas-sage for the United Kingdom is liable to be more or less seriously reduced by the continental de-mand. Since the 17th June 89,157 qrs of wheat have been diverted from the British coast to the, continent. When we look to France we find that the stocks of home-grown wheat must be very of a car of mixed, averaging 1,125 lbs, at \$42; a car of mixed, averaging 1,050 lbs, at \$37; a car of mixed, averaging 1,000 lbs, at \$4; a car of a teers, averaging 1,200 lbs, at \$55; two lots of choice steers, averaging about 1,400 lbs, at \$4.75 per cental for one lot, and \$5 for the other.
