Indigenous wheat no longer entered into business, and here and there there was some enquiry for foreign wheats. At Odessa the trade remained in the same inactive state, the export business growing less and less; prices were stationary, and holders, confident in their ex-pectations of next to no further supplies from

PRODUCE.

The market cannot be said to have been, on the whole, active during the week; but still ousiness scems to have been improving, and prices have been steady nearly all over. There has not been much offered, and holders have been inclined to press sales: companying inclined to press sales; consequently quiatude and steadiness have been the most pro nent features of the situation. Stocks have been rather on the increase, save in the case of rley, which has been reduced by large shipments from the States; and a good deal seems to have en going from outside stations as well as from ksstood on Monday asfollows :-- Flour, 10,138 bbls; fall wheat, 122,872 bush.; spring wheat, ush.; oats, nil; barley, 305,605; peas, \$5,017 and rye, 12,633 bush.; against on the same date last year-Flour, 18,400 bbls.; fall wheat, 178,197 bush.; spring wheat, 162,411; oats, 22,350; barley, 129,303; peas, 57,552; and rye, 3,728 bushels. English advices show markets to have been rather unsettled. Associated press despatches show a fall of 1d. in all sorts of wheat, and of 11d. on corn since our last. Cable advices state that in the latter int of last week markets lost the previous gain, and foreign grain was weakening in all posi-tions, with Australian the only wheat that held its own. Since then, however, an improvement acting to have set in, as cargoes were reported in better domand, and quoted at an advance on both Tuesday and Wednesday, with ar-rivals small. Supplies for last week show a considerable decrease. The imports amounted to 200,000 to 205,000 qrs. of wheat, and 110,000 to 145,000 bbis. of flour, and home deliveries to 138,740 qrs., making a total supply nal to 400,575 to 408,327 qrs. of wheat, against and average weekly consumption of 451,000 quar-ters. The quantity of wheat and flour in transit inst. was 2,400,000 qrs., against-2,329,000 qrs. on the 10th inst., and 1,917,000 on the corresponding date last year. The I supply from the opening of the harvest year o the 19th ult. was equal to 11,875,289 quarters of wheat, against 11,796,031 in the corresponding weeks last year. The net imports thus far were at the rate of 16,618,000 quarters per annum, which is in excess of those in the previous har-rest year, when they amounted to only 16,-14,000 quarters. The average price of Engwheat per quarter to the above date in cason was 42s. 6d., against 47s. 1d. in responding part of the previous year. ental advices for the week ending on the the cor Continental avvices for the week ending on the 26th ult, state that in France the wheat trade ex-hibited a firm tone, but not much animation. Farmers generally were indisposed to accept any further decline, and offered sparingly, but the de-mapd, on the other hand, also remained very limited, partly owing to the unremunerative sale of form. imited, partly owing to the unremunerative sale of flour. The week closed with quietude pre-valent in the interior; farmers' deliveries de-creasing, but prices varying little, wheat, rye, and oats ruling firm, and barley weak. Farmers were actively engaged in spring work, and sow-ing had commenced in some districts. In the ports' transactions remained very restricted. Marseilles quoted no change, Bordeaux was steady for wheat, and at Nantes transactions abpost nil. At Havre prices were maintained, but business was difficult. Red winter free on

abpost nil. At Havro prices were maintained, but business was difficult. Red winter free on railway waggon was offered at equal to 45s. 3d, per 480 fbs. At Marseilles the week's imports amounted to 45.500 qrs.; at Bordeaux nil; at Havre 16,000 qrs. At Marseilles the stock in the docks increased to 201.500 qrs. Holgian markets showed increased firmness for wheat, and ryc steady. In Germany a ceimilar situation prevailed; wheat was neglected at Berlin, closing with very little change on the week. Ryc was decidedly quieter, with more offers from the German and Hussian Haltio ports. At Hamburg there was a good locil demand for wheat at firm prices.
