

A prompt action. An ag for the doctor may serious consequences, of Croup, Pneumonia, and lung troubles...

THE STOMACH.

A Member that should be Respected by Everybody.

Let no man take liberties with his stomach—nor woman either, for that matter. The stomach is a long suffering member, but like the worm it will "turn upon occasion."

Most men love their stomachs, but few respect them. It is that is where they make a large mistake. Take care of your stomach. You have only one and you don't know when you're going to get another.

The ancients made the stomach the seat of affection, and with good reason. Some even go so far as to center the soul there. It is certain that the head of the divorce court is filled with cases that can be traced directly to a defective cuisine.

Married women eat more than single women, not so much as a matter of degree as of habit, and because food is lying around. Men must have their regular meals, and what they don't want women will eat rather than see it go to waste.

It is not surprising that women become untidy domesticated as to their eating when the "men folk" are away from home for any length of time. Whether the family be rich or poor seems to make little difference with the women, who almost invariably abandon the regular dinner when the head of the house is away, and drift into the slovenly and harmful habit of "picking up" such odds and ends—mostly a sweet stuff and pickles—as may come handy.

When used according to directions, Ayer's Stomach Cure is warranted to eradicate from the system, Fever and Ague, Intermittent, Remittent, and Bilious Fevers, and all malarial diseases. Try it.

It can do no harm to try Freeman's Worm Powders if your child is illing, feverish or fretful. It is a safe and reliable medicine. It is a safe and reliable medicine.

Never insist upon the members of your household going without dinner just because you do not happen to be hungry yourself, and never confide to your guest the statement that if you had your own way no one but members of the family should ever be invited into the house.

Lovell's Darling Deed.

Harry Lovell, a railway fireman living in Hamilton, did a noble thing Monday. The express train that leaves Toronto for Hamilton at 5 p. m. had got as far as the exhibition grounds last evening, when a wet girl not more than three years old tumbled onto the track and stood there staring in wonder at the approaching train.

When he glanced out again he saw with horror that the child had not moved, but, with her little hands clasped behind her head, stood gazing with wide eyes at the strange looking monster that was rapidly coming nearer and nearer.

When he saw the child in the situation at a glance, he didn't take time to make up his mind how to act. In less time than it takes to tell it, he climbed out of the cab and swung himself down onto the cow catcher where he crouched, like a cat waiting to spring. The train got to within a few yards of the little innocent. She looked into Lovell's face and laughed. Then the gallant fellow, with all his strength leaped forward, and throwing his arm about the baby he flung himself sideways from the track.

The passengers also, aware that something unusual had occurred, crowded about the child and its gallant rescuer, and heard with wonder and admiration the story of Lovell's noble deed. [Hamilton Spectator.]

Mr. Thos. Bales, of Varna, cut down a beehive the other day, expecting a sweet find. When the tree was down, much to his disgust, he found neither bees nor honey.

Two Kings of Swazies. "James," said the father of the family, sternly, "your school reports have been anything but favorable this term. I suppose you failed in your examination as usual?"

Don't specialise. Run no risk in buying medicine, but try the great Kidney and Liver regulator, made by Dr. Chase, author of Chase's Recipes. Try Chase's Liver Cure for all diseases of the Liver, Kidneys, Stomach and Bowels. Sold by James Wilson, druggist.

Phosphate, or Nerve Food, a Phosphate Element based upon Scientific Facts, Formulated by Professor Anatin, M. D. of Boston, Mass., cures Palsy, Consumption, Sick Headache, Nervous Attacks, Vertigo and Neuralgia and all wasting diseases of the human system. Phosphate is not a Medicine, but a Nutrient, because it contains no Vegetable or Mineral Poisons, Opium, Narcotics, or Stimulants, but simply the Phosphate and Glyceric Elements found in our daily food.

Fashions of Ancient Times.

Heliopolis is said to have been the first to wear a robe of pure silk. This emperor, one of the most unworthy and debauched of rulers, who made his home a consul, had a Senate of women, over whom his mother presided, who prescribed all the modes and fashions. The Emperor Aurelian is said to have refused his wife a robe of pure silk, on account of its excessive cost. Indeed it was not until more than five centuries after the Christian era that silkworms were brought from the East, and introduced into Constantinople by some monks in the time of Justinian.

Purple was always much admired by the ancients, the dye coming from the murex, as is well known. The color was thought finer the darker it was. Under Augustus, violet and bright red became familiar fashionable colors, as well as scarlet, and purples, especially, appeared in public dress. Nero and Caesar afterwards reserved the amethyst and purple for imperial use exclusively.

Disorders of the stomach, liver, and kidneys, can be cured by restoring the body to a healthy condition, though the vitalizing action of Ayer's Sarsaparilla, which is the most powerful and highly concentrated alterative available to the public.

A man living in the shade of the Catalina mountains has entered upon a new branch of business. He heard that well water would be found in his neighborhood, and he set to work to dig a well and half into his well and felt blissful and happy. It turned out, that because of the dryness of the season, there was only three feet of water in the well, and ever since his experiment has been selling a good article of whitewash to his neighbors at 50 cents a bucket for a cent, and walking a mile and a half to the creek for drinking water for his family.

Counterfeits are always dangerous, more so that they always closely imitate the ORIGINAL IN APPEARANCE AND NAME. The remarkable success achieved by Nasal Balm as a positive cure for Catarrh and Cold in the Head has induced unprincipled parties to imitate it. The public are cautioned not to be deceived by cheap imitations of Nasal Balm in name and appearance, bearing such names as Nasal Ointment, Nasal Balm, etc. Ask for Nasal Balm and do not take imitation dealers may urge upon you. For sale by all druggists or sent postpaid on receipt of price (\$5 per bottle) by addressing Fulford & Co., Brockville, Ont.

Not to know more of Christ as the days go is to know less of him. To the Editor.—Please inform your readers that I have a positive remedy for the above named disease. By its timely use thousands of hopeless cases have been permanently cured. I shall be glad to send two bottles of my remedy free to any of your readers who have consumption, if they will send me their Express and P. O. address. Respectfully, Dr. T. A. STOCUM, 37 Yonge St., Toronto, Ont.

It is estimated that about 2000 apple barrels are already delivered through Stanley township. The apples, on the whole, are a good crop, and this business has developed into immense proportions within the past few years, and leaves with the farmers what is badly needed.

A Reward of one dozen "TRABERY" to any one sending the best four lynchym on "TRABERY," the remarkable little gem for the Teeth and Gums. Ask for or direct our address.

LA Story of recent invention.

A pretty story tells us of the invention of the stocking-loom. W. Lee was a very young man of Oxford, who saw among the Greek letters of his land only the bright eyes of the instructor's daughter, and heard in the professor's tones but the click of her swift knitting need. In despair he threw away his books, hurried to his love, and with her to the parson's. When the Oxford doctor heard of the proceedings at the rectory, he decided in grave council that this crime of marriage must be made an example of, and accordingly the young man was degraded and dishonored, and he and Peggy were cast out into the world, with only four knitting-needles to look to for bread. But Peggy went merrily to work, her eyes glowing brighter, her fingers flying faster, while her envious husband sat before her in helpless inefficiency, watching the gleaming needles as if entranced. "Eureka!" he exclaimed one day. "Who?" Peggy looked up anxiously. "She?" he had never been even to a grammar school. "I can do it, Peggy, better than you," he answered, and he was soon at work in a workshop, while Peggy watched, and soon her spinning needle gave away to the stocking-loom, which revolutionized the whole industry.

More Trouble May be Expected. If you do not heed the warnings of nature and at once pay attention to the maintenance of your health. How often we see a person put off from day to day, tillly medicine which if procured at the outbreak of a disease would have remedied it almost immediately. Now if Johnston's Tonic Liver Pills had been taken when the first uneasiness made its appearance the illness would not have appeared in the head. Johnston's Tonic Liver Pills are decidedly the best medicine on the market for general tonic and invigorating properties. Price 25c per bottle. Bitters 50c and \$1 per bottle, sold by the druggist, Albion block, sole agent.

Baby's Knitted Socks. Materials for one pair:—One ounce of single Berlin wool, one yard of narrow pink or blue ribbon, two fine steel needles. This sock fits well and is easy to make. It is knitted up in the ordinary back-and-forth. Cast on 22 stitches and knit 22 rows, but increase once at the end of every other row on the right side of the work so that there are 33 stitches in the 22nd row. Now cast off 28 stitches and knit 12 rows, increasing one stitch at the end of every other row; now 12 rows more, decreasing one stitch at the end of every other row; this forms the toe. Cast on 28 stitches on the same needle, and knit 22 rows, decreasing one stitch at the end of every other row, and cast off. Pick up the 65 stitches on the upper part of shoe, and knit 20 rows, alternating two plain and two puri rows, decreasing one stitch on each side of the 12 stitches in every other row, which forms the toe and front of sock. Knit 14 rows of two plain, two puri stitches alternately, then three open rows with one plain row between, three times over. The open rows are worked as follows: (1) knit 2 together, puri 1, make 1, repeat from (1), three times over, one open row, one plain row, and cast off. The sock is sewed together under the back of the leg, the centre of the sole, and the point is joined like a gusset to form the toe.

Ear fever is a type of catarrh having peculiar symptoms. It is attended by a swollen condition of the lining membranes of the nostrils, ear-tacta and throat, affecting the lungs. An acrid mucus secreted, the discharge is accompanied with a burning sensation. There are severe spasms of sneezing, frequent attacks of headache, watery and inflamed eyes. Ely's Cream Balm is a remedy that can be depended upon. 50c per bottle, at druggists; by mail, registered, 60c per bottle. Ely Brothers, Druggists, Oswego, New York.

Asphalt Lake of Trinidad. Asphalt is a substance as familiar now as are its related substances, coal and petroleum. It is used in great quantities for paving streets and roofing houses. A large part of the supply is brought from the lake of La Brea in the island of Trinidad. This lake is said to have been discovered in 1595 by Sir Walter Raleigh, who employed the pitch found there in caulking his ships.

This wonderful bituminous sheet has an area of nearly one hundred acres, between elevations close to the hill top. It is a broad surface of pitch, sealed with small channels of water. The pitch is dug from the hardened top, and the quantity taken away is constantly replenished by the soft asphalt oozing up from below, which becomes hardened by the evaporation of its constituent oil in the sun. Night supplies the exhaustion of day.

FARM, FIELD AND GARDEN.

Practical Information on Subjects of Widespread Interest. Concerning the Corn Crop—The Chief Insects That Affect the Growing Plant. The Modes Practiced in Different Sections for Harvesting Corn.

While the products of the corn crop are of more importance to the country at large than those of wheat, nothing like the same anxiety is felt about it in advance as the time of harvest draws near. Corn, which is native to America, says The New York World, has so many excellencies that in enumerating them some are liable to be overlooked. Among them, and not the least, is the fact that the gathering of the grain may be delayed or greatly neglected without very serious loss, while with the other cereals, especially with wheat, delay can be tolerated, and when threatened with rust, neglect for a couple of days may cause a loss of the crop.

The chief insect affecting the corn plant, especially in the prairie states, is the chinch bug, and from the July report of the Ohio experiment station it is learned that it is now injuriously abundant in adjacent corn fields on foot. It is also reported as destructive in Illinois and other states. This is essentially a dry weather insect. The spring brood is largely developed in the wheat fields, and when the wheat harvest is over and the supply of food in that quarter is exhausted, the bugs, usually only partly grown and without wings, migrate to adjacent corn fields on foot.

The manner in which corn is harvested varies greatly in different parts of the country. In the prairie states, where the lowlands are first stripped off white green, and tucked in small handfuls between the stalks of a hill to dry, when they are gathered into larger bunches and stored away making a small amount of the best possible corn fodder. Afterward the tops are cut off just above the ears and cured in small shocks, leaving the stalks standing to support the ears until the ears are well out of the milk and the grain has hardened it must to some extent recall the latter of which it is made.

As to the profit in growing small fruits, in many sections, the fruits come in the following order: Strawberries, black raspberries, red raspberries, currants—although different localities and markets would vary the order. The black raspberries are the most profitable, and the black raspberries are the most profitable, and the black raspberries are the most profitable.

For raspberries furrow from five to six feet apart and plant three feet apart in the rows and cultivate the ground between the rows. Strawberries may be grown in hills or in the matted bed. For large plantings the former is preferable, as the culture is less troublesome and the fruit is likely to be larger, though perhaps not so abundant. The rows should be three and a half feet apart and the plants twelve inches apart in the rows. The matted beds are four feet wide and slightly elevated, with intervening paths, that the fruit may be picked without tramping on the beds. Currants should have a rich soil and be set out in hills, and are among the most easily propagated of all the small fruits. Of late years the currant worm greatly lessens the profits.

An Interesting Fact About Butter. The oil of butter is a substance of peculiar richness unlike any other known oil, and the fat of butter, when compacted by expressing the oil, is almost identical with the fat of the human body. Chemical analyses and experiments prove that the butter is cow's milk comes direct from the fat of the animal. The fatty globules are carried into the circulation, deprived of stearin by respiratory combustion, and the oil is then sent to the vessels, where, under the influence of many agencies, it is changed into the components of butter. It is on this principle that the oleomargarine now being made in immense quantities is manufactured from cows' fat or beef tallow.

It is estimated that there are 10,000 florists in the United States, with 1,000 shops entirely covered with glass, in the shape of greenhouses, devoted to flowers.

Asks for Marriage.

"Dear me, Clara, don't let me hear you use that vulgar expression again. 'Do you want me to say sweet?' 'No, you wretched scoundrel! you must say you are 'bedewed with heat.' The first thing you know people will say we haven't got no style about us."

The best regulator for the stomach and bowels, the best cure for biliousness, sick headache, indigestion, and all affections arising from a disordered liver, are without exception Johnston's Tonic Liver Pills. Small in size, sugar coated, mild and effective. 25 cts. per bottle, sold by Goode, druggist, Albion block, Goderich, sole agent.

It is a breach of etiquette to stare round the room when you are making a call. To remove the gloves when making a formal call. To open the piano or to touch it if found open when waiting for your hostess to enter.

To go to the room of an invalid without an invitation. To walk about the room examining its appointments when waiting for your hostess. To open or shut a door, raise or lower a curtain, or in any way alter the arrangement of a room in the house at which you are a caller.

To turn your chair so as to bring your back to some one seated near you. To remain after you have discovered that your host or hostess is dressed to go out. To forget with hat, cane or parasol during a call.

To profess your departure by remarking "Now I must go," or to insinuate that your hostess may be weary of you. To resume your seat after having once risen to say adieu.

For a lady receiving a several callers to engage in a tete-a-tete conversation with one.

To call upon a friend in reduced circumstances with any parade of wealth in equipage or dress.

Branches of Etiquette.
