Old Year—New Year

NEED Year, New Year,
What do you bring?
Your bag might hold
Anything!
Old Year, Old Year,
What will you do
With all the hope
That I gave you?
There is a moment
When you meet,
Like two travelers
On one street.
Old Year, New Year,
In the sky,
Out where the winds
And ghosts go by.
Old Year, Old Year,
What do you say,
Meeting the New on
The Milky Way?
You took from me
Like a thief,
Larkspur joy and
Juniper grief,
But you leave me
One bright hour,
Glad like sun on
A crimson flower
This is mine
Eternally,
You may not
Take it from me!
New Year, New Year,
What do you
Heir as you pass him
In the blue?
Old Year, Old Year,
Where do you go,
Out on that path
Men do not know?
LOUISE DRISCOLL, in N. Y. Times.

**To Travel
Heavenward**

TO BE strong and true; to be gen-
erous in praise and appreciation
of others; to impute worthy mo-
tives even to enemies; to give without
expectation of return; to practice hu-
mility, tolerance and self-restraint; to
make the best use of time and oppor-
tunity; to keep the mind pure and the
judgment charitable; to extend intel-
ligent sympathy to those in distress;
to cultivate quietness and nonresist-
ance; to speak little and listen much;
to adhere always to a high standard
of thought, purpose and conduct; to
grow in grace, goodness and gratitude;
to seek truth and righteousness; to
work, love, pray and serve daily; to
aspire greatly, labor cheerfully and
take God at His word—this is to travel
heavenward.—G. Kleiser in Y. M. C.
C. Central.

To Welcome the New Year.

A PRETTY ceremony handed
down from the past is to
open the front door prompt-
ly on the stroke of midnight for
the passing of the old year to
join the centuries of the past,
and for the entrance of the baby
new year, who is just about to
commence his earthly career.

NEW YEAR'S EGGS.

The Persians still exchange presents
of eggs at New Year's just as we do
at Easter. But the rest of us now do
our giving of presents at Christmas
parties, though we may give to each
other on January 1. In Scotland and
England everybody calls on everybody
else New Year's day, and drinks punch.
Here in America calling has gone out
of style, but if we do nothing more,
we at least shout "Happy New Year"
to everybody we meet on New Year's
morning. When we shout that, we
mean good luck to them for all the new
year through.

NEVER AGAIN
Ostrich — New-fangled breakfast
food, eh? Well I swore off from that
stuff the first of last year!

PUMPKIN PIE.

Stew the pumpkin and rub through
a colander. Beat the yolks of four
eggs light; add a cupful of sugar and
beat until you have a quart of the
stewed pumpkin. Pour in a quart of
milk, a teaspoonful of nutmeg, and cin-
namon. Fold in the stiffened whites
of four eggs. Line a deep pie plate
with puff paste, then fill with the
pumpkin and bake in a moderate oven
till done.

SHORT LIFE IS LONG.

As the cartoonists have it, a year
comes in as a baby and 365 days later
dies as an old man. How fortunate it
is that the human comes in as a hu-
man and not as a year.

MAKE YOUR NITROGEN

**Growing Legume Crops Will Help
You Do It.**

Clovers, Peas and Vetches Store Up
Nitrogen From the Air—Good
Bacteria Will Work for You—
Determining the Need of Chem-
ical Fertilizers.

(Contributed by Ontario Department of
Agriculture, Toronto.)

Nitrogen costs money when pur-
chased through the medium of the
chemical fertilizer dealer, usually
about twenty cents a pound. Some
of our farmers are spending from ten
to forty dollars per acre a year for
nitrogen to increase crop production.
With five million pounds of nitrogen
floating as a gas over every acre of
land such expenditure may not al-
ways be justified. That nitrogen is
highly valuable as a plant food is
appreciated by comparatively few of
our farmers. If those who do appre-
ciate its value are willing to pay
twenty cents a pound for it, and these
are the men working on small areas
with intensive culture crops, why
don't those larger area farmers who
have a few billion pounds of nitrogen
floating above their farms wake up
and get at least a small quantity into
the soil of their fields?

The Fertilizing Value of Legumes.

Legume plants such as the clovers,
peas and vetches, together with the
bacteria that are parasitic on the
roots of this class of plants, form a
link between the nitrogen of the air
and the plant food nitrogen of the
soil. This link is an implement al-
ways available to the farmer. A ton
of alfalfa or clover or vetch hay may
contain as much as fifty pounds of
nitrogen. The roots that go with the
alfalfa plants covering an acre may
contain as much as three hundred
pounds of nitrogen. The roots of the
red clover or vetch plants that cover
an acre may contain as much as one
hundred and fifty pounds. The roots
from wheat, corn or oat plants cover-
ing an acre may contain twenty-five
pounds of nitrogen.

The Bacteria Work for Nothing.

The point is, a great quantity of
nitrogen is collected by the bacteria
which alone work on the clovers,
peas, vetches and other legume
plants. With one million dollars' worth
of special needs, and with the legume
crops growing two years out of four
there will be little used to worry
about the nitrogen supply.—L. Stev-
enson, Secretary Department of Agri-
culture, Toronto.

ABOUT SOIL FOODS.

Determining the Need of Chemical
Fertilizers.
The appearance of the growing
leaves and tissues can frequently be
taken as an indicator for the pres-
ence or absence of nitrogen in suf-
ficient quantity to satisfy the max-
imum demands of plants. A yellowish
tinge or a dull green is an indicator
of abundant nitrogen. Drouth and
excessive moisture may also cause
the yellowing or weakening in the
coloration of foliage. Failure of
clover or lucerne may be taken as
an indication of a shortage of lime
and phosphorus. A decline in the
wheat grade after years of wheat pro-
duction can generally be attributed
to a shortage or failure in the phos-
phorus supply.

How to Make Experimental Plots.

However, these generally observed
conditions are not sufficiently accu-
rate to be a definite guide, and should
be supplemented by a miniature field
test, using square of rods areas with
various chemical mixture applica-
tions. This is accomplished by sim-
ply staking off a representative area
one rod wide and six rods long, and
dividing it into six plots. This done
apply before seeding on plot one,
nitrogen; on plot two, phosphorus;
on plot three, potash; on plot four,
nitrogen and potash; on plot five,
nitrogen, potash and phosphorus;
plot six, potash and phosphorus.
The adjoining soil will serve as a
check plot for all areas. By watching
the plots during the crop season and
the following two years, a fairly defi-
nite conclusion relative to the needs
of the field can be secured.

Every soil area should be studied

by itself, since the requirements of
one field may differ from the re-
quirements of the field adjoining.—
L. Stevenson, Secretary Department
of Agriculture, Toronto.

Gestation Period of the Cow.

The gestation period of the cow is
nine and one-third months, or two
hundred and eighty days. Sometimes
a breeder figures it as nine months
to the day, and then worries because
it seems to run over a couple of
weeks and the calf is not born when
supposedly due. For example, a cow
bred on January 1 would be due
about October 7 and not October 1.
A cow bred on February 1 would be
due about November 8, not on Nov-
ember 1. The date of calving is found
by counting forward the two hun-
dred and eighty days from the date
of service.

TO THE RATEPAYERS OF THE TOWN OF AYLMEER

Ladies and Gentlemen:
Having served you during the past
year in the capacity of Reeve, and
having been requested to run for a
second term I have consented to do
so. I feel, with the experience I have
gained I can serve the people even
more efficiently in the coming year.
I would solicit your vote and in-
fluence on Monday next.
Wishing you a Happy New Year.

thought a country cow would notice
it."

TO THE ELECTORS OF THE TOWN OF AYLMEER

Ladies and Gentlemen:
Having been solicited by a great
many electors of Aylmer to allow my
name to stand for the position of
Reeve, I have decided to do so.
I find I will not be able to see you
all personally and will ask you for
your vote and influence at the coming
election on Monday next.
And if elected I will try and reduce
the present rate of taxation if in my
power to do so.
Wishing you all a Happy New Year,
I remain sincerely,
