A GIDDY GEYSER.

Mexico City, Feb. 10.-The famous oil well known as the Dos Bocas, which for months shot a column of flames and smoke into the air for many hundreds of feet, has turned into a geyser, and fears are entertained that eventually the well, which for so long has furnished a grand spectacle of the powers of nature, may become an active volcano. The first evidences of this were made apparent yesterday, when in addition to the great volume of boiling water, which is lifted heavenward at the rate of 25,000 gallons each 24 hours a large quantity of volcanic stone was thrown out.
