Mr. Lanceley states it is his intention at the next meeting of the trustee board that he will bring up tht old custom of segragtion in the church. He figures it out that if all the men sit on one side of the church, and all the womtn on the other, that there would be no more trouble about the big hats.

That might be so, but there is grave danger that this agile leap out of the frying-ran would land him safely inside the coal range. Or even worse, how would it work out with the young man who has just mustered up courage to take "the only one" to church for the first time? It is doubtful if this deft disasociation would be conducive to a har-
