## A FISH STORY.

The Man Who Told It Sald It Was Simply a True Narrative. A man who formerly was a waiter on a big transatlantic liner told this story the other day:

"On a certain trip over I had at my table an trascible old gentleman who was a fresh air fiend. No matter what the weather he always insisted on having the porthole over the table It was no use to argue with open. It was no use to argue with him, but one day when the seas were very high and the ship pitching and rolling I ventured to remonstrate. He was up in arms in a minute. 'You are paid to obey orders, he said tartly. 'Open that port.' I did. The soup course was served in safety. Then I asked him if he would have fish. 'Of course I will,' he snapped. 'And I'll have it in a hurry. Don't keep me waiting all day.'

"Just at that moment an unusually big sea rolled by—that is, part of it did. A goodly portion came through the porthole, soaking the old man and depositing on the table in front of him a live fish. No waiter on board of our ship had ever served an order so quickly before. But I didn't get any credit for it. The queer thing about that story," he added, "is that it isn't a fish story at all. I never told it yet to any one who believed it, but it is absolutely true."-New York Press.

### HIS PLAN OF THE DAY.

Rigid Rules of Living Made by a Co-Ionial Minister.

An orderly arrangement of working hours is a desirable and time saving thing, but when one reads the plan of the day made by a colonial parson, be cannot help wondering where the good man's family life came in, and if the system held any possibility of relaxation. The record, quoted by William Root Bliss, in "Side Glimpses From the Coloniar Meeting House," is taken from the diary of Thomas Prince, a minister of the Old South church, Bos-

Dickens' Cramped Quarters. Bleak House at Broadstairs is of interest to the Dickens lover because the greater part of "David Copper field" was written there. But it is not the Bleak House of the novel, which is definitely located in Hertfordshire The novelist and his family appear to have been somewhat tightly packed in their Broadstairs, home. When Lord Carlisle contemplated paying a visit to "our watering place" in 1851 Dickens wrote promising him the North Fore land lighthouse for a night light in his bedroom, and he continues, "As we think of putting mignonette boxes out side the windows for the younger children to sleep in by and by I am afraid we should give your servant the cramp if we hardily undertook to lodge him." During recent years the house has been transformed out of all recognition.-London Spectator.

His Own Joke. "I admit I was found in the possession of firearms," said the prisoner "but it's only a joke of mine, my lord."

"Explain yourself," said the magis trate. "Why, I put two pistols in my pocket when I go out to a friendly gathering. Then I start talking of aero

And All of Them Americans. An English visitor has recently been expressing his wonderment at the facility with which America assimilates its stream of immigrants. A friend with whom he was talking on the subject remarked, "My housemaid is a Norwegian, my grocer a Scotchman, my butcher is a German, my druggist is a Finn, my barber an Italian, my newsman a Jew, my laundryman is Irish, my fishmonger English, my florist Greek and my tailor Russian."

# Horse Distemper

Prince Edward Farmer Solemnly Declares "Nerviline" Is a Specific.

"After fifty years' experience in raising horses I can safely testify that no remedy gives such good results for an all-round stable liniment as Nerviline." Thus opens the very earnest letter of J. J. Evanston, who lives near Wellington, P. E. "I had a very valuable horse that took distemper a month ago, and was afraid I was going to lose him. His throat swelled and hard lumps developed. His nostrils ran and he had a very valuable to relieve my horse of his pain and suffering till I started to use Nerviline. I mixed a bottle of Nerviline and sweet oil and rubbed the mixture on the throat and chest three times a day and you would scarcely believe the way that horse picked up. Nerviline cure him. I also have used Nerviline for colic in horses and cows, and earnestly recommend it to every man that is raising stock."

## A QUEER LEGEND.

Feder Kesmich, the Hermit, May Have

A curious legend is associated with the name of Alexander I. of Russia. It is to the effect that the emperor in 1825 was sojourning in the Crimea. When near Taganrog his coachman by some means managed to overturn the carriage of a court courier named Markof, who was killed. The emperor, wishing to rid himself of the cares of state, so the story runs, caused it to be reported that it was he himself who was killed. Then he carried out a plan which he had for long conceived of retiring to Siberia and living there under an assumed name. Schilder, the historian, professes to have satisfied himself that at all events the remains in the Cathedral of Peter and Paul are those of the courier. Schilder asserts that he learned this much from the children of Markof.

According to the legend, Alexander I. of Russia died in Siberia in 1864, but history records that he died at Taganrog in 1825. It seems that in 1825 a mysterious stranger appeared in Siberia. He gave his name as Fedor Kosmich and never revealed any other or the place whence he came. He lived the life of a hermit and was received generally with respect. In 1856 he accepted the invitation of a rich merchant to take up his abode in his house at Tomsk. There he was very retired and held communication only with Mile. Kromof and the merchant, her father. Every one who saw him was struck with his extraordinary resemblance to the defunct czar. The Grand Duke Nicholas Michailovitch contributed an article in the Revue Historique in which he denied the sensational part of the story, but admitted that the hermit of Siberia might have been a natural brother of Alexander I.—London Globe.

## IRISH BROGUE.

It Is Really the Old Time Method of Prenouncing English.

Perhaps nothing illustrates better the vicissitudes of pronunciation in English than a study of what is called the "Irish brogue." This lingual mode, for it is scarcely to be called a dialect, is usually presumed to be a deterioration of language due to lack of educa-tion and contact with legitimate sources of English. It proves after a little study to be a preservation of the old method of pronouncing English. which has come down to a great degree unchanged in Ireland from Shakespeare's time.

In Elizabeth's time, however, it came to be realized that if there was to be any real affiliation of the two countries then the Irish language must be supplanted by English, and a definite of fort in this direction was made. This change of speech, resented and resist ed, was nevertheless successfully ac complished all over the island except in the west within a decade after Shakespeare's death. This fact takes on a new significance when we study what we now call the Irish brogue in connection with what is known to have been the pronunciation of English at that time. The two are found to conform in practically every respect. Irishmen pronounce English as their forefathers learned it and have preserved its pronunciation because they have been away from the main cur rent of English speech variation ever since.-Harper's Magazine.

Uncalled For Courtesy.

The Vicomte Toussaint was formerly a colonel in the French army and mayor of Toulouse. He was a brave man and a dashing officer. During one of the hottest engagements of a terrible year of war, noticing that his troops were bending forward under a galling fire to escape the bul-lets of the enemy while he alone maintained an erect position, he exclaimed, "Since when, I should like to know, has so much politeness been shown to the Prussians?" The sarcasm took instantaneous effect, for the soldiers rushed forward and carried everything before them.

Devoted to Duty.
"Are you ever coming to bed?" he

called out. "I don't know," she replied. "I promised Mrs. Jones that I'd keep track of her husband while she is away, and I'm going to know what time he comes home if I have to stay up all night"-Detroit Free Press.

Went Further.

"Didn't I tell you that when you met a man in hard luck you ought to greet him with a smile?" said the wise and good counselor. "Yes," replied the flinty souled person. "I went even further than that.

I gave him the grand laugh."-Wash-You cannot be happy while you have corns. Then do not delay in getting a bottle of Holloway's Corn Cure, It removes all kinds of corns without pain. Failure with it is unknown.

### A WONDERFUL DISCOVERY.

An eminent scientist, the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or a sore, such injury is insured against blood poison! Not one species of microbe has been found that Zam-Buk does not kill!

Then again. As soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why

case, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again. As soon as Zam-Buk is applied.

Again. As soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of tresh healthy tormed. This forming of fresh healthy tissue FROM BELOW is Zam-Buk's-secret of healing. The tissue thus form-ed is worked up to the surface and liter-ally casts off the diseased tissue above it. This is why Zam-Buk cures are perman-
