Guide-Advocate

WATFORD, APRIL 2, 1920.

NOTE AND COMMENT

The Dominion Government is pre paring a scheme of state-aided insurance for returned men. The bill has, it is understood, been drafted, but a number of points remain for decision before it will be brought down in the house. The aim is to give assistance to ex-members of the forces who, because of disability incurred on service, are unable to secure life insurance at prevailing rates.

Don't think it would be sacrilege to say your prayers to some of the new outfits for feminine adornment. They are not like anything in the "heavens above, the earth beneath or the waters under the earth." If folk will persist in making guys of themselves there will likely always be some promoter ready to show the styles to outdo the past season for these connoiseurs of fashion. Automobile language might describe some of the garments as "high gear" and low gear."

A Community Laundry is one of the live questions in connection with the Women's Institutes. Proposition is to cover a rural territory of perhaps 3 miles, and have family washings all done at a centre laundry run by hydro or gasoline power machines. This would not only cut out wash day at the individual home, but makes it possible to distribute with it would help solve the problem of hired brands which are not so popular to help. The practicability of the plan fill orders. has been evidenced by the community kitchen in some places. Careful high prices for grain feeds and the estimates will show that the idea is uncertain market conditions of the and will supply a real need to the women folk of many a community.

When the size of the Canadian one cent piece is changed to the proposed smaller coin, one Ottawa man will suffer a dead loss of \$30,000 or more besides the closing up of a lucrative business. Several other businesses using slot machines in Ottawa and throughtout the country will be losers to a smaller extent, while the Post Office Department is faced with the necessity of changing the mechanism of stamp vending machines, which at present represent an investment of over \$100,000.

New York Evening Post-Up to the present it has been possible only to make small cavities in concrete, but under a new German patent much larger ones can be made. Pieces of ice, corresponding to the measurements of the cavity required, are embedded in the concrete mass, and small channels are introduced to allow the melted ice to be drawn off rapidly. In this way not only small concrete construction such as pillars, stairs and beams can be supplied with a hollow space, but large blocks with several chambers, such as those required for walls of houses or ships.

Silver, in spite of the fact that it is worth much more than before the war can still be had at the moderate price of \$1.15 per ounce. Tanned goat skin, commonly called kid, costs the shoe manufacturer on an average af \$1 per square foot for the light weight hides. These hides will averas about four-fifths of an ounce to square foot, which is at the rate of a \$1.25 per ounce. There is considerable waste in cutting kiddleather for use in shoes, so that the leather which finally goes into the finished snoe really costs about \$1.50 per ounce, about 40 per cent more than

SOME PECULIAR SAYINGS

When someone pleases you and you say "He is a brick," you may not remember that you are repeating a phrase coined by a Spartan king who said of his soldiers "There is my wall and every man is a brick."

The original source of these every day sayings is an interesting subject. Shakespeare, of course, gives us Shakespeare, of course, gives us more of these savings than any other writer, as for "instance, "All is not gold that glitters," "This is the long and short of it," "Comparisons are odious," "They laugh that win," "Frailty, thy name is woman," "A "Frailty, thy name is woman," "A Daniel come to judgment," "As merry as the day is long," and many others. "Every dog has is day" is commonly attributed to Shakespeare, as in Hamlet's speech appears "The as in Hamlet's speech appears cat will mew, and the dog will have its day," but forty years before Shakespeare wrote "Hamlet," Hey-wood wrote, "But as every man saith, a dog hath his doie."

Bacon is responsible for a very popular one, namely, "Knowledge is

Children Cry FOR FLETCHER'S CASTORIA

Our Bacon "Snapped Up At Once"

" 'Why don't you ship more Can adian bacon?' This is the question asked me from one end of England and Scotland to the other. It was a source of great regret that I had to reply that Canadian packers were not able to ship more bacon because more hogs were not being produced in the country." In these words, Brig. Gen. J. A. Gunn, President of Gunns, Limited, Toronto, who has just returned from Great Britain where he spent three months investigating conditions, stated the position of the Canadian bacon industry.

'Conclusive evidence of the value of Canadian bacon on the English market and a fact which all will, I am sure, be interested in," he went on is that while shipments of bacon from other countries may be put into storage from time to time because of lack of demand, yet not one pound of Canadian bacon goes into storage in England. It is snapped up for immediate consumption as fast as it arrives. Besides for every case of Canadian bacon sold, the buyer has to take a few cases of other brands. The popularity of Canadian bacon

"I explained to business men that nast autumn had seriously curtailed hog production in Canada. But I believe the prospects for the future are so good that the preservation of our breeding stocks is a vital national concern which should engage the attention of all classes. If there is one thing which should convince the Canadian farmer that our bacon has a place by itself on the British market it is that the price being paid in Canada for hogs is far in excess of what the American farmer is getting. Previous to the war, Canadian bacon found its way into certain parts of England only. To-day, wherever vou go, from Land's End to John O'Groat's, you find the consuming public familiar with Canadian bacon and asking for it. After a close study of the markets of Great Britain and Europe, I consider that if Canada is to reap the reward commercially which was opened to her by war service she must follow it up by a national peace effort. The name of 'Canada' is the finest introduction to European markets to-day. No one class in Canada must endeavor to im-

country.'
