THE RAZOR STEEL, SECRET TEMPER CROSS-CUT SAW.

We take pleasure in offering to the public a saw manufactured of the finest quality of steel, and a temper which toughens and refines the steel, gives a keener cutting edge and holds it longer than by any process known. A saw to cut fast "must hold a keen cutting edge."

This secret process of temper is known and used only by ourselves.

These saws are elliptic ground thin back, requiring less set than any saws now made, perfect taper from tooth to back.

Now, we ask you, when you go to buy a saw, to ask for the Maple Leaf, Razor Steel, Secret Temper Saw, and if you are told that some other saw is as good, ask your merchant to let you take them both home, and try them, and keep the one you like best.

Silver steel is no longer a guarantee of quality, as some of the poorest steel made is now branded silver steel. We have the sole right for the "Razor Steel" brand.

It does not pay to buy a saw for one dollar less, and lose 25 cents per day in labor. Your saw must hold a keen edge to do a large day's work.

Thousands of these saws are shipped to the United States and sold at a higher price than the best American saws.

TESTIMONIAL FROM A WELL KNOWN OWNER OF HORSES IN MONTREAL:

J. H. KIMBALL, Horse Exporter and Dealer, Proprietor Horse Exchange.—English Veterinary Embrocation Co., City.

Kimball's Horse Exchange, Montreal, July 12, 1897.

GENTLEMEN,—It is with pleasure that I recommend to all horsemen the use of your English Veterinary Embrocation. I have, as you are aware, been a large purchaser of it for the past year, and do not buy less than one dozen at a time. For sore Throats, accompanied by Inflammation, it gives most satisfactory results. For Capped Hocks, Bruised Knees, and Strained Sore Tendons, it has no equal. I always supply it to men going in charge of horses to Europe from my stables, and when once used they always ask for it. Yours truly,

(Signed), J. H. KIMBALL.

LEMIRE

STONE & STUMP LIFTER

Patented 1894.

Capacity of Lifting 18,000 lbs. (With no equal.)

Lifting and carrying stones at will, so you can make with them fences from 4 to 5 feet high. When buying this strong and durable machine, you can make your fence with big stones instead of buying spike wire for fences. You will clear your land for the mowers and reapers. To lift a stone you make the lever work and the hooks will hold it when lifting. You can lower it in the same manner or make it fall by touching a ring fixed in the wheel. You can lift, remove and put into fence a stone in 10 minutes. Agricultural Societies should buy it. Farmers if they like may join in club to buy it. Price moderate. For all particulars address to

A. LEMIRE, Proprietor, Wotton,

Or at the Plessisville Foundry, Somerset.
