

A Revolution in Graining

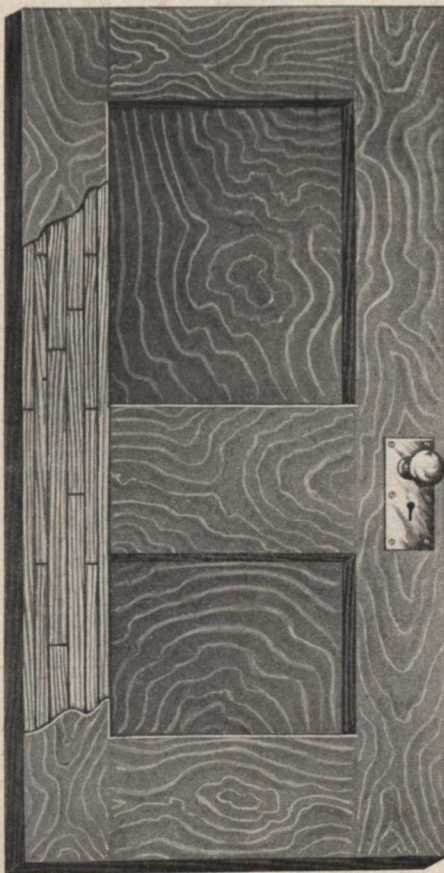

¶ We have the only perfect machine ever invented. It makes a PERFECT IMITATION of all open grain woods. Convex and concave articles can be run through without any trouble.

¶ ONE OPERATOR and a couple of boys can do more work with this machine than TWELVE MEN with any other so called machines or pads now on the market.

¶ Let us send you samples and prices.

Posselius Bros. Furniture Mfg. Co.

DETROIT, MICH., U.S.A.

Very often we are asked whether the

. . Falls No. 43 . .
Undercut Face Planer

will do as good work as is turned out on a hand planer.

To this we reply that we have known instances of it doing better work, for example: it turns out better work on door stiles than is possible on a hand feed planer and will at the same time, do a great deal more work. We have a case in mind now where it is doing **seven times** the amount of work on this particular stock than was formerly turned out on the hand planer.

Ask for Circular "C" which will give you full details
