

Batibouw (Core Area Stand)

Brussels, Belgium – February 28-March 10, 1991

Forest Products

This annual event for the Belgian construction industry features furniture, heating, chimneys, fireplaces, plaster, doors, frames, windows, insulation, glass products, and kitchens. Over the years, Batibouw has become an important vehicle for Canadian exporters of forest products. Attracting 350 000 visitors, this fair provides the opportunity for market education on the timberframe construction techniques, and for the display of new products and energy-efficient concepts used in Canada.
