## S3. BETA-2 AGONISTS

All selective and non-selective beta-2 agonists, including all optical isomers, are prohibited;

Including, but not limited to:

Fenoterol; formoterol; higenamine; indacaterol; olodaterol; procaterol; reproterol; salbutamol; salmeterol; terbutaline; vilanterol.

## Except:

- Inhaled salbutamol: maximum 1600 micrograms over 24 hours, not to exceed 800 micrograms every 12 hours;
- Inhaled formoterol: maximum delivered dose of 54 micrograms over 24 hours;
- Inhaled salmeterol: maximum 200 micrograms over 24 hours.

The presence in urine of salbutamol in excess of 1000 ng/mL or formoterol in excess of 40 ng/mL is presumed not to be an intended therapeutic use of the substance and will be considered as an *Adverse Analytical Finding (AAF)* unless the *Athlete* proves, through a controlled pharmacokinetic study, that the abnormal result was the consequence of the use of the therapeutic dose (by inhalation) up to the maximum dose indicated above.

## S4. HORMONE AND METABOLIC MODULATORS

The following hormone and metabolic modulators are prohibited:

- 1. Aromatase inhibitors including, but not limited to:
  - 4-androstene-3,6,17 trione (6-oxo); aminoglutethimide; anastrozole; androsta-1,4,6-triene-3,17-dione (androstatrienedione); androsta-3,5-diene-7,17-dione (arimistane); exemestane; formestane; letrozole; testolactone.
- 2. Selective estrogen receptor modulators (SERMs) including, but not limited to: raloxifene; tamoxifen; toremifene.
- Other anti-estrogenic substances including, but not limited to: clomiphene; cyclofenil; fulvestrant.
- Agents modifying myostatin function(s) including, but not limited, to: myostatin inhibitors.
