Big Dome Production Should Then Show Material Increase.

SOUTH PORCUPINE, Feb. 24.-The first work of 1914 in opening up lower levels at the Dome Mine has been started in the sinking of the main or No. 2 shaft from the fifth level to the seventh level, glving a depth in the working of 575 feet when depth in the working of 575 feet when completed. The work which has recently been put under way from the 425-foot level, the lowest point attained by the company, will be completed in three months' time as only two shafts are working at sinking operations.

Dome Extension was strong, selling up to 11 1-2. It has been stated on good authority that arrangements have been completed for the sale of the million dollars of treasury stock and that actual development work will be started in April, as announced

been put in sight, but the ore reserves of the upper levels have not been thereby opened or blocked out. This work is still progressing, and by the time the new low level is reached at 575 feet the fifth level will be in fair chape as to ore reserves blocked out. The mill run on January was a record one, but during this month a marked decrease will be shown. The fact that February is the short month of the year will be further added to be

Annual Meeting.

H. E. Wills has sent out a special circular to the shareholders of the Timiskaming Mining Company. Limited, asking for proxies to bring in a new board of directors of the company at its annual meeting on March 9. He makes several charges against he present management such as breach of trust and mismanagements uch as breach of trust and mismanagement: "With combined holdings of only 1275 shares, I ask is all fairness: Are these men sufficiently interested to properly direct and control the future destinies and business affairs of the Timiskaming Mining Company: a \$2,500,000 correction? corporation? WAS IRREUGLAR

Some Issues Inclined to Be Reactionary, While Others Were Stronger.

The local mining market was again irregular yesterday, with some stock irregular yesterday, with some stock at higher prices and others under a reaction. Dome Lake was down to 31 1-2, which is the result of the selling by holders of the hew stock issue. Peterson Lake was also inclined to lower prices, but was firm at the close. Manipulation of the Peterson market is being attempted, but no great success has been made by the efforts to "ram" down the price of the stock. Timiskaming was also under a reaction, caused partly by the attempts of too many to take their profits. Beaver was stronger, closing at 31; while La. Rose, Nipissing and the other Cobatts were steady, with no material changes.

Dome Extension was the strong feature of the Beaver was the strong feature of the B Dome Extension was the strong feature of the Porcupine list, selling as high as 11 1-2. Pearl Lake was very inactive and while some of the lower priced Porcupines appeared on the market, no big price changes were

Random Notes on the Mining Stocks.

It is said that an English syndicate It is said that an English syndicate is trying to get control of the Timiskaming Mining Co., and with it the control of the North Dome. If this is the case it would be necessary for the syndicate to buy all the stock on the market, as it is pretty well scattered. It is quite probable that the present buying on the Standard Exchange is the first step that is being change is the first step that is being taken, and naturally the price is being kept down. It is rumored that a good strike has been made on Timiskaming lately, which has not been

At 425 feet, on which level the company has been working for some if the property is developed might prove to be one of the good mines of Porcupine.

Pearl Lake was again around 10. There has not been much attention paid to the Porcupines in the last few weeks, but it is said that with the short interest in Pearl Lake quite an interesting market should result when the shorts start to cover.

THE MANAGEMENT

The Eldorado Gold Mines Co., which was organized just before the big Porcupine fire, only sold 150,000 shares out of \$00,000 shares out of \$000,000 shares of treasury stock, and attho the buildings were rebuilt after the fire, they discontinued work and nothing of importance hard of the company since. It was rumored that a deal was going thru in England for the purchase of the property outright.

REACTION A MARKET BENEFIT

As indicated in our advertisement, a reaction in the prices of the recently active Cobalts would be quite natural, and a market benefit. We think it would be better if this proceeded some further, but as the buying power is good, we do not expect prices to decline materially from the present level. In expectation of a later heavy demand for gold stocks we believe it would be prudent to buy some of these at present low prices. We have one in which we have more confidence than some others, and we are advising its purchase. Those desirous of knowing this stock can obtain the same from us.
