OUR MINERAL WEALTH.

Report of the Mines Department the Geo ogical Survey of Canada.

Interesting Statistics of the Output From the Different

British Columbia occupies a considerable Mines for this province being reproduced.

The immense impetus in the development of quartz mining in British Columbia had, of course, not then reached the stage it has now attained, and the figures for the period under consideration, as well as the following year, have already been presented in the Provincial mining reports. A comparison of the output with that of the other parts of the Dominion and the mineral production of the whole of Canada are, however, of great interest, especially as the reverse of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest, especially as the results of the control of the whole of Canada are, however, of great interest are control of the whole of Canada are, however, of great interest are control of the whole of Canada are, however, of great interest are control of the whole of Canada are, however, of great interest are control of the whole of Canada are, however, of great interest are control of the whole of Canada are, however, of great interest are control of the w

ever, of great interest, especially as the report gives evidence of much care in preparation.

The mineral products of Canada for the year 1891 amounted in value to \$20,500,000, as compared with \$18,000,000 in 1890, and show a gradual yearly increase from \$12.000,000 in 1886, the first year given in the report. Metallio minerals (copper, gold, iron, lead, nuckel, platinum and silver) were produced to the value of \$5,451,195, against \$3,570,685 for 1890, owing chiefly to the immense increase in the nickel output in the famous Sudbury district. Non-metallic minerals, including coal, limestone, mica, asbestus and other useful minerals and structural materials, such as slate, marble and so forth, were valued at \$14,359,174, while unspecified products amounted to \$689,631.

The grant Republic of considerable interest to those operating in oil, on account of the discovery of petroleum in Welland of all Essex counties in Ontario, and of the further discoveries in the Northwest Territories and British Columbia. The output for the year was 755,298 barrels, valued at \$1,004,546, a considerable increase over the previous twelve months.

PHOSPHATE

Showed a falling off in production, the decrease in value being \$119,442. Quebec and Ontario were the only producers, the former having an output valued at \$206, 416, the latter \$35,187.

The production of the previous twelve months.

PHOSPHATE

Turning to the detailed report on the various minerals, it is to be observed that of grindstones the production was confined to two Provinces, as follows: New Brunswick, 2,499 tons, valued at \$22,787; Nova Scotia, 1,980 tons, valued at \$19,800; total output, 4,479 tons; total value, \$42,587.

Antimony and arsenio production was so meall as to be hardly worth roticing.

ASBESTUS. During 1891 the production of asbestus fell off considerably as compared with the output of the year previous, that for 1891 being only 9,279 tons, valued at \$999,878, against 9,860 tons, valued at \$1,260,240, which was the quantity extracted in 1890. An enormous increase is observable however in a comparative table which shows the growth of the outputs from 1880, when only 380 tons were produced. The seat of this important industry is in the Districts of Thetford and Black Lake. Province of Quebes and agency 2,125,000 are invested in it.

The production of this mineral shows a very encouraging increase on the figures of the previous year. The 3,127,661 tons, valued at \$6,496,110, returned for 1890, compared with the 3,623,076 tons, valued at \$8,144,247, produced during 1891, show the amount of this increase to have been 505,415 tons and \$1,643,137. This result must be credited almost wholly to British Columbia. The greater proportionate increase in the figures of value is also due to the greater proportion of this higher priced coal, inproportion of this higher priced coal, in-The production of this mineral shows a ngures of vatue is also due to the greater proportion of this higher priced coal, included in the total. In the grand total of tonnage by provinces, Nova Scotia stills retains the chief place; British Columbia comes next in the amount of its production, while the Northwest Territories and New Bennagid contribute but substitute and the contribute of the Brunswick contribute but a relatively small

proportion.

The ostput by Provinces was: Nova Scotia, 2,290,935 tons, valued at \$3,579,586; British Columbia, 1,152,588 tons, valued at \$4,116,388; N. W. Territories, 174,131 tons, valued at \$437,243; New Brunswick, 5,422 tons, valued at \$11,030.

COPPER.

The production of iron ore during 1891 shows somewhat of a decrease compared with that of 1890, the figures being 76,511 tons, worth \$155,380, for the latter, as comtons, worth \$165,380, for the latter, as compared with 68,979 tons, valued at \$142,005, for the former. Nova Scotia still continues the main contributor, its production constituting over 75 per cent. of the grand total, the rest being produced in the Province of Quebec, with a small quantity from British Columbia: Of the 68,979 tons of iron ore produced, 60,933 tons were smelted, producing 23,891 tons of pig iron, an increase over last year's yield of 2,119 tons. This quantity resulted from the running of four furnaces, operated by the Londonderry, and other pectoral remedies. Price 250.

London, Oct. 19.—The Laucet, against which also prizes were offered, was quite unrepresented. Bernshinges. Best brood sow in farrow at the meeting, or that has been so within six months, Paul Franck; best bred sow, under 12 months, A. Marcotte, boar, under 12 months, X. Marcotte, boar, under 12 months, Y. Resident and in the special part of the speci CHICAGO, Oct 19 .- Secretary of Agricul-The total output was 8,928,921 lbs., of which Quebec produced 5,401,704 lbs., and Ontario 3,527,217 lbs., the whole valued at \$1,160,760, an increase of 46 per cent. in output and of 28 per cent. in value as compared with 1890. The report states that there is little new to note in this industry, but in touching on the various Provinces it draws stention to the bright outlook for the Kootenay country, especially with the increase of railway communication.

The total quantity of gypsum mined and marketed in the Dominion during 1891 was 203,605 tons, valued at \$206,251, showing a decrease in quantity of 22,304 tons, while the world, then the United States wants of Ontario, Nova Scotia and New Brunswick.

TRON.

We all understand that so far as the grange and alliance organizations have attended to settled they have been worked, to use the parliance of the day, by journeymen farmers, who, for political purposes, farmed the farmers. These organizations, as a rule, attended to everything except agriculture. Many fallacies of the report of the farmer are very catching of the allure which have been evolved for the allure ment of the farmer are very catching. The state of the farmer are very catching of many of the journeymen farmers, who, for political purposes, farmed the farmers. These organizations, as a rule, attended to everything except agriculture. Many fallacies of the shown that he long wool class George Harrison carried off all the honors, while the farmer are very catching from the interest of the farmer are very catching from the interest of the farmer are very catching from the interest of the farmer are very catching from the interest of the farmer are very catching from the farmer are very catching from the short wool of the country is simply a legal fiction.

The total quantity of gypsum mined and marketed in the Dominion during 1891 was 203,605 tones, valued at \$206,251, showing a decrease in quantity of 22,304 tons, while world, then the United States wants gold. We must have a permanent standard the

this great congress of all nations illustrates fully the fact that the commerce of the world is an exchange of products, and money only settles unadjusted balances."

London, Oct. 19.—The Lancet, against which paper, Dr. Leslie Keeley brought a libel suit because of comments on his bitchloride of gold treatment for drunkenness, announces to-day that the action has been dismissed, Dr. Keeley paying all the costs.

SWINE.

Hardly any interest was taken in this competition, the entries being very few, and not by any means representative of what the J district contains in this line. There were some very fair Berkshires, but the Poland China class, in which also prizes were offered, was quite unrepresented.

BERKSHIRES—Best brood sow in farrow at the meeting, or that has been so within six months, Paul Franck; best bred sow, under 12 months, and in an 2, X. Marcotte; boar, under 12 months, and I and 2, X. Marcotte.

Though the preliminary summary of Canada's mineral production in 1891 was [1,510, an increase of Division of Mineral Statistics and Mines of the Dominion Geological Survey has only recently been published, Mr. Ingall, in charge of the Division, explaining that the delay arose from somewhat exceptional causes.

British Columbia occupies a considerable

The output was \$71,510, an increase of \$3,436.

NICKEL.

The output was \$71,510, an increase of \$3,436.

NICKEL.

The output was \$71,510, an increase of the North and South Saanich Agricultural Society opened at South Saanich yesterday, and will be continued to-day, when for a low, wind-up there will be an attractive programme of horse races. This is an important mineral jumped from 1,435,742 wind-up there will be an attractive programme of horse races. This is an important rises as an exporter of this metal, as the following table shows:

British Columbia occupies a considerable tant year in the history of the association, being its quarter centenary, and it was therefore unfortunate that the backwardness of the season prevented the holding of such a show as would fittingly celebrate the cocasion. As it is, the late spring caused sowing to be so long deferred that the harvest has not all been gathered yet, and the crops are all more or less below the average. To accommodate the busy farmers the society postponed the fair for a fortnight, the dates originally set for it having been October 5 and 6. The risk of having rain had to be run, but fortunately the weather.

Mr. Irwin, N. Shakespeare and P. Merriman:

Bushel Fall wheat, I, J. D. Bryant; 2, W. Heal.

Soring Wheat, J. D. Bryant, Cheviler Barley, J. D. Bryant, Cheviler Barley, J. D. Bryant, Proposition of the society postponed that fair for a fortnight, the dates originally set for it having been October 5 and 6. The risk of having rain had to be run, but fortunately the weather.

a show as would fittingly celebrate the cocasion. As it is, the late spring caused sowing to be so long deferred that the harvest has not all been gathered yet, and the crops are all more or less below the average. To secommodate the busy farmers the society postponed the fair for a fortnight, the dates originally set for it having been October 5 and 6. The risk of having rain had to be run, but fortunately the weather conditions have turned out to be very favorable, and a finer day than yesterday one scarcely could have desired.

The management of the fair is in good hands, as will be seen from the list of officers: President, E. John; Vice-President, X. Marcottee; Secretary, W. R. Armistrong; Treasurer, F. Halden; Committee, G. Harrison, E. R. John, M. Dean, John, W. Sluggett, A. Meneagh, J. T. Harrison, P. Franck, Geo. Stelly, jr., Fred. Turgoose, J. Sluggett, S. Sandover. The grounds are in excellent condition, and nothing has been left undone to secure comfort for exhibitors

left undone to secure comfort for exhibitors and visitors. Of the latter there were not

The show of horses was the most note-worthy under the head of live stock, the entries giving evidence of greater attention to improvement in breeding on the part of the farmers in the district. As will be seen from the prize lists, the honors were well divided amongst the exhibitors. Some very attractive roadsters were shown. Notable in these were two yearling colts by Martello,—a chestnut entered by A. Wain, and a coal black beauty owned by F. Turgoose, of which their owners are exceedingly proud. The judges in this class were C. W. T. Piper, G. Gerow and D. Robertson, and these were their awards:

DRAUGHT HORSES—Span, J. W. Sluggett.

DRAUGHT HORSES—Span, J. W. Sluggett. Single horse, I and 2, X. Marcottee. Three-year-old gelding or filly, 1, W. Thomp-son; 2, J. John. Two-year-old gelding or filly, 1, X. Marcottee; 2, P Merriman.

2, P Merriman.
Yearling colt. 1 and 2, J Sluggett.
Yearling colt. 1 and 2, J Sluggett.

Saddle horse (M. Dean.
Saddle horse (lady rider), I, Miss Brooks; 2,
R Sluggett.
Three year-old gelding or filly, J. W. Sluggett. Yearling colt, 1, A. Wain; 2, F. Turgoose, Brood mare with foal at foot, 1, F. Turgoo 2, W. Heal. , W. Heal.
Sucking colt, 1, F. Turgoose; 2, W. Heal.
GENERAL PURPOSE - Team, 1, J. T. McIlnoyle; 2, Wm. Thompson.

There were not many cattle on exhibition, but those on the ground showed the considerable improvement in the stock which has been going on of late. The herds of Holsteins shown by G. McRae, of Cedar Hill, and by W. Thompson, attracted much favorable comment; so did a beautiful herd of Jerseys shown by S. Dean, who, if he had no competition in his class, well deserved the many prizes awarded, as the herd would be hard to beat anywhere. An aged Holstein bull, exhibited by F. Turgoose, also won much deserved praise; it is an importation from Minnesota. The judges for cattle were B. B. Moore, J. T. McLimoyle and Robert Stevenson. This is the prize list; CATTLE.

Radnor, Que; John McDougall & Co., Drummondville, Que. The two latter firms use charcoal for fuel in smelting the bog of railroad car wheels.

ILEAD.

The amount of this metal produced in Canada was 588,665 lbs., valued at \$25,607. Small as this is, however, the figures are five times as great as those of 1890.

MICA.

THE SAANICH SHOW.

Ileape and full. There was but one exhibit of peas, but they made a splendid showing. The barley was very generally commented upon for its excellence, the Chevalier variety being notably fine, and showing what could be done in this line if a demand for malting could be created. The samples of fall wheat were not so good as usual, but still were creditable to the district, considering the drawbacks of the season. In grass seed, a bag of hand-picked timothy, shown by S. Deans, excited much and the prize-wind much as the season of the season. In grass seed, a bag of hand-picked timothy, shown by S. Deans, excited much as the season of the season.

DAIRY PRODUCE, ETC. The housewives made a good display of the product of their industry in the way of butter and of bread and cake, the butter particularly claiming attention. The judges were Mrs. Shakespeare, Mrs. Watson and Mrs. Adams, and these were their awards: Four pounds of fresh butter, 1, S. Dean; 2, MrsPollard; 3, Mrs. J. D. Bryant.
Package salt butter, not less than 50 pounds, 1, Mrs. Pollard; 2, Mrs. Macdonald; 3, J. John.
Bread (hop yeast) 1, Mrs. Sandover: 2, Mrs. J.
D. Bryant.
Bread (salt rising), 1, S. Dean; 2, Miss Pollard.
Grabam bread, 1, E. Caspell; 2, S. Dean.
Fruit cake, Mrs. Macdonald.
Lemon cake, E. Caspell,
Cocoanut cake, Mrs. Sandover.
W. R. Armstrong showed same tempting.

Cocoanut cake, Mrs. Sandover.

W. R. Armstrong showed some temptinglooking specimens of honey, a creditable result of an attempt at systematic bee-keeping recently made. There were no prizes
offered for honey, but the enterprising
secretary put in the exhibit to show what
could be done in a new branch of industry
in his district.

FRUIT.

Twelve early Autumn apples, 1, P. Franck; X. Marcottee. Twelve late apples, 1, J. John; 2, Mrs. Butler. Twelve largest apples, 1, W. Thompson, 2, J. ohn. Collection apples, 1, X. Marcottee; 2, J. John. Twelve pears, 1, J. D. Bryant; 2, W. Thomp-

on.
Twelve plums, 1, J. D. Bryant; 2, S. Dean,

In the Act of March 3, 1891, creating the

AVELAN VISITS CANROBERT.

Marshal Canrobert durin the course of the day. Replying to the Russian greeting, the marshal said the French officers in the secretary put in the exhibit to show what could be done in a new branch of industry in his district.

FRUIT.

In fruits, both fresh and preserved, the exhibit was remarkably interesting, the quality of many of the samples of fresh quality of many of the samples of fresh fruit being quite equal to the best importations from Oregon or California, and the variety seen in the collections of preserved fruit being such as would surprise those not a acquainted with the resources of the Sanich district. The preserves and jellies included cherries, strawberries, crabapples, black currants, citrons, gooseberries, prunes, peaches, 'rhabarb, grapes, plums, currants, bears, tomatoes and quinoes. In fresh fruit, the best samples, and they were really fine, were of apples, plums, prunes, pears and grapes. The judges were Rev. Mr. Irwin, N. Shakespeare and P. Merriman:

Twelve early Autumn apples, 1, P. Franck; 2, X. Marcottee.

Toulon, Oct. 20.—The authorities and Toulon, Oct. 20.—The authorities propose to change the name of the Boulevard Leygoutier to Boulevard Avelan, and have also suggested change of the name of the new ironolad to be launched on the 27th

THE CLOTURE.

voted four hours and a half to executive nsiness and gave the seal of its approval to the appointment of Mr. Van Allen as ambassador to Rome and Mr. Kilbreth as collector of customs at New York.

A cloture rule by Mr. Voorhees, practically the same as that fathered by Mr. Hill, was introduced. It provides that when any bill or resolution which occupies the advantageous position of unfinished business has been debated for thirty days, Senators may at any time make a motion fixing the time when a final vote shall be taken, that that motion shall be put immediately, and that during its pendency or when the time fixed for a final vote arrives no debate or amendment shall be permitted. The original motion, however, must have an affirmative vote of a majority of all the Senators entitled to seats. The resolution lies on the table and may come up for action to-morrow.

An amendment to the silver manner has the appointment of Mr. Van Allen as am-

PARIS, Oct. 19.—The striking miners at Lenz, Pas de Calais, continue to riot and explode dynamite cartridges. To-day they blew up part of a mineral railroad.

Dr. J. COLLIS BROWNE'S CHLORODYNE.

as alive. Whenever I caught cold I could not walk two blocks without fainting. 'Now I am free from it all and I can truly recommend Hood's Sarsaparilla. I received a letter from Mrs. Jennie Bigelow, now of Fremont, Mich. asking if my testimonial in behalf of Hood's Sarsaparilla was true; I replied it was, and sent particulars. I have a another letter from her thanking me very much for recommending

Hood's Sarsaparilla and stating that she also has been cured."

Court of Appeals, it is provided that in case proper rooms cannot be secured in Chicago, the United States Marshal, with the cago, the United States Marshal, with the approval of the Attorney-General of the United States, may lease such room elsewhere as may be necessary for the court. The inconvenience that the enforced removal will create will be seriously felt by Chicago lawyers and litigants, but it is not thought that the adjourned session in Milwaukee will be lengthy, as there are only a dozen cases or so on the calendar. Next month, however, a new calendar will be prepared.

original motion, however, must have an affirmative vote of a majority of all the Senators entitled to seats. The resolution lies on the table and may come up for action to-morrow.

An amendment to the silver purchase bill was offered by Mr. Pfeffer (Populist, Kansas), and occupies the position of being the first amendment that must be voted on. It is a free coinage amendment, but it specifically receives and puts in force the free coinage act of 1837. Two hours were then ocpied by Mr. Pfeffer in continuation of the discourse, which he began last Friday and which he may finish next week, and at 8 p.m. the Senate took a recess till to-morrow.
