Temagami Reserve is Great in Possibilities

REAT POSSIBILITIES the east of Cobalt Lake, near the boundary between the Nipissing and O'Brien properties. The shaft on it is down 60 feet, and drifting has been done at that level in two directions. The surface showing was silver and cobalt, with calcite shot thru the ore, and its width was eight inches, which it received with Jeans 10 feet. GREAT POSSIBILITIES

Island Properties in Cross Lake Section Are Making Splendid Displays of Wealth.

COBALT, May 8.—(From the man on the spot.)—The great possibilities of the Temagam Reserve district will be thoroly exploited during the control of the spot. The great possibilities of the temage of the control of the spot. The great possibilities of the temperature of the spot. The great possibilities of the temperature of the spot. The great possibilities of the temperature of the spot. The great control of the spot. The great possibilities of the temperature of the spot. The great control of the spot. The great possibilities of the temperature of the spot. The great possibilities of the temperature of the spot. The great control of the spot of the sp

There are seven acres in the island. One of these veins is a strong silver galena. At the surface it had a width of 2 feet and at the bottom of shaft had widened to work on it again will be put to work on it again this summer. The work to-date on this consists of a huge

plant has been installed and one of dou-ble the present capacity has been order-ed. Superintendent R. E. Patterson predicts a shipment of two cars of ore from island A within six weeks. He has had wide experience and was superin-

tendent for the Clergue Copper Co., Lake Superior, before coming to the new Temagami camp.
A good shore house, sleeping and eating

installed in the camp.

A good shrie house, sleeping and eating houses, blacksmith shop and small power house have been erected.

Island A has seven acres and B and C each three acres, but the company has the bedrock of 120 acres of the lake. Their property lies about 17 miles south or southwest of Temagami station, and a good water route from Temagami to about two miles from the camp is available during the open season. When the lake is frozen access to the camp is easy and during the past to the camp is easy and during the past winter this summer's supplies were all taken in. An excursion is being arranged by the directors from North Bay to the camp. The date is not decided on, but it will be in about two weeks and a general invitation is extended to the public to take it in.

Shipments Disappointing. The shipments for April from Cobalt camp, at first reading, may appear disappointing, but when one realizes that there are still three feet of snow in the woods and that the roads were in many sections of the camp almost impassable

during last month, there need be no of Mr. Francis Penoit of St. Anne's, surprise.

There were only six shipping properties during April and only 513.25 tons of ore sent out of the camp. The Nip. did not sent out any ore, neither did the local of Zam-Buk was given to me, and box of Zam-Buk was given to me, and the local of Zam-Buk was given to me, and local outside the local of Zam-Buk was that did me Drummond. As soon as the ice is out of Cobalt Lake the Nip. will have at least 13 cars brought over to their siding and shipped. The Drummond will continue to store its ore until the Kerr Lake T. & N.O. spur like is finished. Lake T. & N.O. spur like is finished. and embrocations in containing no and April shipments are as follows: mal oil or fat. It is compounded from rich, healing, herbal essences, and is tons; Trethewey 83.70 tons; Kerr Lake 40.00 tons; Green-Meehan 33.60 tons and Buffalo 20 tons: 127.73 tons were sent to the Copper Cliff smelter; 32.55 to Delwich, settling on to wounds and skin ora and the balance went to the Ameridiseases, set up festering, blood poison.

can Smelting & Refining Co. at Perth etc. For cuts, burns, bruises, vicers, abscesses, pimples, boils, skin eruptions.

Nip Strikes Big Vein.

R. Drummond, the new superindent, is now in charge of the Nipister, where the companies of the Nipister.

Mr. Linney has gone to New or from Zam-Puk Company. Toronto, tendent, is now in charge of the Nipissing. Mr. Linney has gone to New York and will return to Cobalt in a few days, when an announcement will be made of his future movements. The present indications are that he will not be allowed to leave the camp entirely. Two hundred and fifty men are at work at the Nip. and when the 12 sleeping camps, now in course of erection, are completed over six hundred men will be completed over six hundred men will be employed. In at least one Wall-street paper attempts have been recently made to belittle the development work and plans for this year at this mine. The truth is that the development for mill be most systematic and thoro. Nine shafts are being sunk and one of the street of the medical building in the universely sund and the street of the medical building in the universely sund and the street of the medical building in the universely sund and the street of the medical building in the universely sund and the street of the medical building in the universely sund and the street of the medical building in the universely sund and the street of the will be most systematic and thoro. Nine shafts are being sunk and one of the most important development features this year in the camp was made some few days ago at this property, when in the cross-cut which is being run at the 110-ft level from one of the new shafts, they struck vein 26 at this depth. The vein was found to be nine inches wide they struck vein 26 at this depth. The vein was found to be nine inches wide at that depth and very rich. This demonstration at that depth of the continued richness of this great shipping vein and richness of this great shipping vein the detectives to further interest of the complexion, but every struck vein 26 at this depth. The inquest was adjourned a week the military also given me a good appetite and improved my general health also."

Not only the complexion, but every monstration at that depth of the continued richness of this great shipping vein is very important, when it is remembered that nearly a quarter of a million dollars has been realized from vein 26, out of the big open-cut 40 feet long and 60 feet deep.

This vein lies up in the north angle of that part of "Nip," which lies to
