

It was rumored around the street this morning that the Silver Queen directors had decided to pass the divi-dend for the quarter, but no announcement was made until after the close of the market, the directors not having concluded their session until well

on in the afternoon. The strong features of the market still consist of the newer issues, such as Hargrave, Otisse, and in the un-listed department Silvers Limited. All three of these issues are being taken three of these issues are being taken largely by buyers from the States and in Eastern Canada. The prices of these stocks were decidedly firm, and closed the day with a strong under-

The market was free from any reactions of more than ordinary market fluctuations, and it would have required very little more buying power to have given a steady undertone to althe whole list

HARGRAVE LISTED

ed on several other exchanges, but some days will elapse before arrange-ments are completed to carry this out. Despite weakness in most of the Cobalt stocks, Hargrave shares were firm.yesterday at the two Toronto curb markets.

wganda?" asked the reporter. "Well, there is a doctor there now," "and I follow the medical profession

New York Curb. A. J. Pattison & Co. report the following uotations at New York yesterday: Silver Oueen, 66 to 68. Green-Cananea. Swamp. The properties in Cobalt in

erty Fully Equipped for Active Operations.

After long delay the complete mining plant has been assembled and installed at the Otisse Mine and aggressive work to open up this great property is about to start. Of course much work has been done to get ready for the machinery. The main shaft on No. 1 vein is down fifty feet and good progress has been made with the main shaft on the big vein on No. 3. Mining operations by machinery of the most approved

Stock New Regularly Dealt in at New York Curb. Hargrave stock was listed on the New York Curb yesterday, and ex-ceedingly heavy transactions were re-ported in the shares. The price closed strong with 61 bid, with a little stock offering at 62. The stock is to be list-ed on several other exchanges, but some days will elapse before arrangecount the exact number. Seven of them are very rich, and are all strong leads running in a straight line east and west, parallel to each other. The veins are so strong and true that I have no doubt they continue to great depths. These seven veins lie in a bed and the An undertaker is to be Gowganda's hetest. He applied for a ticket and sleeper accommodation at the Canadian North-ern city office yesterday. "What is your reason for going to Gowganda?" asked the reporter. "Well there here here to great depths ore from them can be easily mined, as a cross cut of three hundred feet long will tap them all. When the pro-perty was discovered, Sam Otisse, who is an experienced prospector, knew inal rich discourse, From the orig-

is an experienced prospector, knew, how to do the staking. From the orig-inal rich discoveries he staked ten onains each way, so that now all of the rich veins lie within the lines and give them an immense body of silver-bearing vein matter. It is what I call a well-staked property. The Otisse property recembles the rich Cobelt

One of the BEST BUYS in the entire Cobalt Camp to-day. A few reasons why we make this statement:

THE TORONTO WORLD

1st. Agaunico is not a prospect, but a SHIPPING MINE, containing the "King Cobalt Vein" of the entire Camp, with a shaft 125 feet deep, from which 75 to 100 tons of high-grade ore HAS BEEN SHIPPED, and there is now blocked out 300 tons of this ore. The vein in places in the shaft is 18 inches wide, consisting of practically

2nd. We have a large acreage, not only in Cobalt, but in the WONDERFUL GOWGANDA COUNTRY.

3rd. Our Cobalt property is ideally located, being on the shore of Lake Temiskaming, only three miles from Haileybury and North Cobalt, with a FIRST-CLASS wagon road leading to either place, both of which allow us to get supplies in and ORE OUT at a low cost. This alone is an important fact to consider.

4th. Agaunico's Officers and Directors are men of the HIGHEST STANDING, men who have taken hold of Agaunico with the DETERMINATION of making it one of the BEST MINES in the entire Cobalt Camp. 5th. President D. K. Martin or Manager Arthur Faithorn spend their entire time on the ground seeing to it that all work is pushed as rapidly and economically as possible. This is another IMPORTANT point to be considered

Development work on Agaunico has been held up owing to the fact that the entire plant was destroyed by fire.

We are now installing a FIRST-CLASS PLANT. The new buildings are up and about all enclosed and they onsist of a power house 30 x 40 feet, hoise house 10 x 12 feet, blacksmith shop 16 x 20 feet, bunk house and cook house that will accommodate about 40 men, ice house, water tank with capacity to furnish water to all buildings, manager's residence, office building, pump house, stable 20 x 24 feet, and such other buildings as are necessary to complete a first-class camp.

The plant consists of one 125 h.p. STEAM BOILER, which is now set in place, a 6-DRILL SULLIVAN COMPRESSOR, large STEAM HOIST, STEAM PUMP, and all other machinery necessary to operate the plant

The plant should be running within the next few weeks, at which time we will begin MINING and SHIPPING ore now blocked out, and at the same time push other development work on the property.

We will begin at the 125-foot level cross-cutting to the West to reach two very rich silver veins which we believe are located within a short distance of our main shaft.

We will also crosscut East, in order to reach another silver vein which we believe is located between our shaft

by machinery of the most approved designs, run by ample steam power, will now be carried on and expecta-tion runs high at Elk Lake City and other northern towns. In regard to the Otisse property, Mr. R. L. Symmes of Niagara Falls, a min-ing man of large experience in the Cobalt district, said: "Thad heard a good deal about the Otisse property, and the talk about it As to our GOWGANDA CLAIMS, we have nine claims in this section of the Camp. There is no longer a question about the richness of Gowganda, and we feel that there is NO QUESTION about our claims, as our men were early on the ground last Fall, before the great rush, and we NOW have a gang of men doing work, with satisfac-

We have a block of Agaunico Stock to offer for a short time at 30c. per share, on the following attractive terms

PLAN A-Cash, at 30c. Per Share, Less 5 %

PLAN B-Credit, Remittance with Application at the rate of \$6.00 for each 100 Shares; balance in Six Monthly Instalments, each at the rate of \$4.00 per 100 Shares.

No application taken for less than 100 shares, and we reserve the right to reject any subscription if the allotment oversubscribed.

A FEW POINTS TO REMEMBER-

That less than one year ago Temiskaming and Crown Reserve, which have made such phenomenal records in the past year, were each selling at about the present price of Agaunico. To-day Temiskaming is worth \$1.60 to \$1.65 and Reserve \$2.90 to \$2.95.

That Agaunico is a SHIPPING MINE, with a larger acreage than most of the mines of Cobalt, consisting of 198 acres in Cobalt Camp, and nine claims in the WONDERFUL GOWGANDA Country.

That we are on the verge of a GREAT UPWARD movement in Cobalt Stocks.

That NOW IS THE TIME to get AGAUNICO STOCK. Don't wait until the new plant is running, for then, within a short time, we believe Agaunico will be worth from 50 to 100 per cent, more than the present price, and will

trict, say alongside of the Nipissing, where crowds could go and see for themselves every day what it is, the stock, which is now around 60, would

Information from an Official Prospectus of the Agaunico aines Development Company, dated Dec. 4, 1908, and filed in the office of the Provincial Secretary at Toronto. DIRECTORS, D. K. Martin, Martin & Thomas, 409 Manning Chambers, Toronto, Ont.; H. W. Johnson, director Ford & Johnson Co., Chicago, III.; William Ford Johnson, treasurer Fiduciary Co., Chicago, III.; Harry Hamill, Snow, Church & Co., Chicago, Ill.; James Sidwell, Sidwell, DeWendt Shoe Company, Chicago, III.; Thomas Madill, Sherwin-Williams Paint Co., Chi-cago, III.; D. B. Rochester, managing director Cobalt Lake Mining Co., Cobalt, Ont. The Company has gone to allotment. All stock has been fully paid up and is not subject to call. All the capital of 5,000,000 shares (less the incorporator's holdings) was issued as fully paid-up stock by issuing same to one B. H. Bal-sasanian of Haileybury, Ont.; in return for his transferring to the company all the shares (less one share each held by five directors) of the Agaunico Mines Development Company, Limited, a company incorporated in Ontario, which owns the properties; 3,500,000 of these shares have been donated back for the purpose of the Treasury. The charter gives power to pay commissions, but the Board of Directors made a contract with the Fiduciary Co'y., selling them 1,000,000 shares of stock, to the extent of \$15,000.00. DATES AND PARTIES OF MATERIAL CONTRACTS. 1. Contract Oct. 5, 1908, between B. H. Balassanian, the Fiduciary Company, this Company and the Agaunico Mines Development Company, Limited. stock, which is now around 50, would sell at \$2 to \$3. The only property in Cobalt I can compare it with is the Lawson, but the Lawson has only one very rich vein, whereas the Otisse has seven very rich veins, eight more that carry native silver, and seven in addition to these which have not

been opened as yet to see what they do contain. The Otisse is really a remarkable property. Nothing in the Montreal River can compare with it, and very few in Cobalt. I was given free access to the whole property, and made a thoro examination.

Contract Oct. 5. 1908, between B. H. Balassanian, the Fiduciary Company, this Company and the Agaunico Mines Development Company, Limited.
Contract June 20, 1908, this Company and the Fiduciary Company. The preliminary expenses of the Company that is, incorporation fees for this and the Canadian Company are estimated at \$1,000.00, advanced by the Fiduciary Company. AUDITORS.
William W. Thompson, Chartered Accountant, 100 Washington Street, Chicago, Ill. No director had any interest in the property acquired, but the Fiduciary Company was interested indirectly in the stock issued to the original vendor, Balassanian. The only interest any director has or had in either such property or in the Company's promotion is what may be preceived by or through the Fiduciary Company.

Silver Queen Shareholders Decide to This Property Lies as the Hub of a

TORONTO.

It has been anticipated for some time Wheel; the Spakes Being. that the regular quarterly dividend on Silver Queen would not be paid. 'The directors of the company met yesterday and, under the advice of President Culver decided to pass the dividend

GOWGANDA, Feb. 15 .- (From the Man on the Trail.)-Some remarkable yet characteristic finds have been made for the current quarter. The company has hitherto paid 12 per cent. in 3 per cent. quarterly divion the Fairburn property, numbered dends, and on two occasions bonuses 1995. This claim is, as it were, a hub in the wheel. Around it are the

F. L. Culver, the president of the O'Kelley claims, famous for their silver company, discussing the action of the chlorides; the Bartlett Mines, the directors, said: "It was entirely on my advice that the directors decided not seven veins of almost pure silver have plenty of money on hand, but we have of equal importance.

run into a lean streak, such as most mines experience in their development. On the Fairburn there are exposed to public view four acres of quartzite and 28 acres of diabase. In the interest of the shareholders I thought it wise to hold the money we Expert examination of same have have in order to keep up the developproven that native silver exists in

ment until we got into good paying ore quantities and of a quality that has excited admiration. Mr. Culver thought that with active A gang of men are on the Fairburn work the mine would again be put into 20% a condition entirely satisfactory to the clearing it for actual operations, which are to be carried on on an unstinted

scale. This property carries beyond a New Secretary on Maple Leaf. The directors of Maple Leaf Mines, Limited, announce the J. Collins Da-vies has been retired from the podoubt some of the richest silver value to be found in the Gowganda district. O'Kelley Claims: "Men on the street" are asking one another about the 21 foot vein on the

Noted Claims.

sition of secretary-treasurer of the company. He will be succeeded by Mr. O'Kelley claim. To the inexperienced this term seems to be of an unusual character, but to the man who follows up mining, and its various phases, the

term is perfectly comprehensive. by what are known as the silver chlo-rides and volcanic ash, both ingredivein does not, of A fragmentary course, mean a solid vein, which is

ents signifying to the mining man nalimited to inches, not feet. By a fragmentary veln, it is under-stood that a formation exists, in this In this district there are no regular
