PORTABLE AND STATIONARY.

Our REVOLVING BED MOULDING MACHINE stands unrivalled, and has never yet been beaten in competition.

**BURNELL'S**  
 FOUR POINTED GALVANIZED  
**STEEL BARB WIRE FENCING.**

There are now before the public a number of Four Pointed Barbs which to the casual observer, are similar in appearance to the Burnell's Barbs which are making, but a close examination of them will show the difference and their inferiority.

The Grand Trunk Railway Company of Canada give it a preference over all others, and have contracted with us for over one hundred tons of wire for immediate delivery.

This Barb was patented in the United States in 1877, and is no infringement on any other patent, and we will defend our rights and our name against the threats of pretended monopolists. We claim our rights for our Barb Wire over all others for the following reasons:

- 1st. We use only the best quality of Galvanized Annealed Steel Wire.
- 2nd. The two strands of No. 12 Wire are twisted together in such a way to allow for the contraction and expansion of the metal caused by heat and cold, and not so much as to injure the strength of the wire.
- 3rd. The Barbs on our Wire are four pointed, thus always presenting a Barb laterally or at a right angle, which is a great advantage over the Two Barb Wire, as cattle are unable to get their heads down to break it or push it down.
- 4th. The Barbs are fastened to the Wire at intervals of 7 inches, in a manner entirely different from any other, being securely locked around and between both wires, so that they cannot slip or move toward each other, and they also prevent the untwisting of the cable should either wire get broken.
- 5th. The machinery by which the Barbs are put on is so perfect that the cable Wires are not injured or weakened by the process, as is the case with other Four-Pointed Barb Wires.

Manufactured by the CANADA WIRE COMPANY, Montreal.  
**H. R. IVES, Manager**

**DUNDAS COTTON MILLS CO.**

 Bolts, Tire Bolts, Bright Rivets, Store Bolts.  
 The quality of the Iron, finish of the Bolts  
 and the style of packages, is  
**SUPERIOR TO THE AVERAGE,**  
 And equal to the best Foreign Bolts, Nuts  
 and Screws.

**To Maltsters.**

THE undersigned beg to inform maltsters  
 and the trade that, having lately added  
 new and powerful steam machinery for the  
 special purpose of weaving extra strong  
**STEEL WIRE CLATH** for malt and grain  
 kiln floors, they are now prepared to quote  
 prices for the above goods. These floors are  
 much more economical than iron tiles, saving  
 from 30 to 40 per cent. in fuel and labour, and  
 producing a brighter sample of malt.
